#### NEW QUESTION # 192

Which one of the following is the baseline behavior of a table in a privately-scoped application?

- A. The table and its data are not accessible using web services
- **B. All application scopes can read from the table**
- C. Any Business Rule can read, write, delete, and update from the table
- D. Only artifacts in the table's application can read from the table

**Answer: B**

Explanation:

[https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c\\_DefaultDesignAccessPermissions.html](https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_DefaultDesignAccessPermissions.html) The baseline behavior of a table in a privately-scoped application is that all application scopes can read from the table. A privately-scoped application is an application that restricts write access to its tables and resources to scripts within the same scope. However, read access is allowed by default for all scopes, unless the administrator explicitly denies it using an Access Control rule. This allows for data sharing between different applications while maintaining data integrity and security. #### NEW QUESTION # 193

Application developers configure ServiceNow using industry standard JavaScript to...

- **A. Extend and add functionality**
- B. Customize the organization's company logo and banner text
- C. Enable the right-click to edit the context menus on applications in the navigator
- D. Configure the outgoing email display name

**Answer: A**

Explanation:

Application developers configure ServiceNow using industry standard JavaScript to extend and add functionality. JavaScript is a scripting language that enables developers to create dynamic and interactive web pages, as well as manipulate data and logic on the server-side. ServiceNow provides various APIs and frameworks for developers to use JavaScript to customize and enhance the functionality of their applications, such as client scripts, UI policies, business rules, script includes, UI actions, and more.
