## Quiz 2026 ISTQB-CTFL: ISTQB Certified Tester Foundation Level (CTFL v4.0) Pass-Sure Latest Braindumps

Web-based ISTQB-CTFL practice test of ActualPDF is accessible from any place. You merely need an active internet connection to take this ISTQB ISTQB-CTFL practice exam. Browsers including MS Edge, Internet Explorer, Safari, Opera, Chrome, and Firefox support this ISTQB-CTFL Practice Exam. Additionally, this ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) test is supported by operating systems including Android, Mac, iOS, Windows, and Linux.

## ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q191-Q196):

### NEW QUESTION # 191

In the newest version of payroll system number of changes were made. As a tester you got a task to perform regression and confirmation tests. Which of the following project activities are related to confirmation testing?

- A. Testing due to the application of a new version of the interface
- B. Testing that fixes resolved the defects in the search function
- C. Testing to ensure the adding of a new functionalities haven't broken existing functions
- D. Testing if a system still works after update of an operating system

**Answer: B**

Explanation:

Confirmation testing, also known as re-testing, is performed to verify that specific defects have been successfully fixed.

Option A: "Testing due to the application of a new version of the interface" would typically involve regression testing, not confirmation testing.

Option B: "Testing that fixes resolved the defects in the search function" fits the description of confirmation testing as it focuses on ensuring that specific issues have been addressed.

Option C: "Testing if a system still works after update of an operating system" is an example of regression testing, as it checks the overall system behavior after an update.

Option D: "Testing to ensure the adding of new functionalities haven't broken existing functions" is another example of re (ISTQB not-for-profit association)(Udemy)it checks for unintended consequences of new changes.

Therefore, the correct answer is B [【6 source】](#) [【9 source】](#).

## NEW QUESTION # 192

Which of the following is a key characteristic of informal reviews?

- A. Kick-off meeting
- **B. Low cost**
- C. Metrics analysis
- D. Individual preparation

**Answer: B**

Explanation:

A key characteristic of informal reviews is low cost. Informal reviews are a type of review that does not follow a formal process or have any formal documentation. Informal reviews are usually performed by individuals or small groups of peers or colleagues who have some knowledge or interest in the product under review. Informal reviews can be done at any time and for any purpose, such as checking for errors, clarifying doubts, sharing ideas, etc. Informal reviews have low cost, as they do not require much time, effort, or resources to conduct. The other options are not key characteristics of informal reviews. Kick-off meeting is a characteristic of formal reviews, such as inspections or walkthroughs. Kick-off meeting is a meeting that is held before the review process starts, where the roles and responsibilities of the participants are defined, the objectives and scope of the review are agreed, and the logistics and schedule of the review are planned. Individual preparation is a characteristic of formal reviews, such as inspections or walkthroughs. Individual preparation is an activity that is performed by the reviewers before the review meeting, where they examine the product under review and identify any issues or questions that need to be discussed or resolved during the review meeting. Metrics analysis is a characteristic of formal reviews, such as inspections or walkthroughs. Metrics analysis is an activity that is performed after the review process is completed, where the data and results of the review are collected and analyzed to measure the effectiveness and efficiency of the review, as well as to identify any improvement actions or lessons learned for future reviews.

## NEW QUESTION # 193

Which of the following statements about decision tables are TRUE?

- I. Generally, decision tables are generated for low risk test items.
- II. Test cases derived from decision tables can be used for component tests.
- III. Several test cases can be selected for each column of the decision table.
- IV. The conditions in the decision table represent negative tests generally.

- A. II, IV
- **B. II, III**
- C. I, IV
- D. I, III

**Answer: B**

Explanation:

A decision table is a technique that shows combinations of inputs and/or stimuli (causes) with their associated outputs and/or actions (effects). A decision table consists of four quadrants: conditions (inputs), actions (outputs), condition entries (values) and action entries (results). The following statements about decision tables are true:

\* II. Test cases derived from decision tables can be used for component tests. Decision tables can be used to test components that

have multiple inputs and outputs that depend on logical combinations of conditions. Decision tables can help cover all possible combinations or scenarios in a systematic way.

\* III. Several test cases can be selected for each column of the decision table. A column of a decision table represents a unique combination of condition entries and action entries. Several test cases can be selected for each column by varying other input values or expected results that are not part of the decision table. The following statements about decision tables are false:

\* I. Generally, decision tables are generated for low risk test items. Decision tables are not related to risk level, but rather to complexity level. Decision tables are generated for test items that have complex logic or multiple conditions and actions that need to be tested.

\* IV. The conditions in the decision table represent negative tests generally. The conditions in the decision table represent both positive and negative tests, depending on whether they are valid or invalid inputs for the test item. #### NEW QUESTION # 194

Which of the following project scenario gives the BEST example where maintenance testing should be triggered?

- A. Defect was found in a pre-released version of the customer service application
- B. Completion of architecture of the bank system
- **C. Delivery of the hot fix to mobile operating system and ensuring that it still works**
- D. Release of the early draft of the low level project design of an IoT application

**Answer: C**

Explanation:

Maintenance testing is triggered by changes such as bug fixes, enhancements, or environmental changes.

Option A: "Completion of architecture of the bank system" is not a typical scenario for maintenance testing, as it describes a design phase rather than an operational change.

Option B: "Release of the early draft of the low level project design of an IoT application" is again not suitable for maintenance testing, as it refers to the design phase.

Option C: "Defect was found in a pre-released version of the customer service application" is closer but not quite accurate, as maintenance testing focuses on changes mad (ISTQB not-for-profit association)system is released.

Option D: "Delivery of the hot fix to mobile operating system and ensuring that it still works" is the best example as it directly involves testing after a fix has been implemented.

Therefore, the correct answer is D#6source#.

#### NEW QUESTION # 195

Which of the following statements is NOT true about Configuration management and software testing?

- A. Configuration management helps maintain consistent versions of software artifacts.
- B. Configuration management supports the build process, which is essential for delivering a test release into the test environment.
- C. When testers report defects, they need to reference version-controlled items.
- **D. Version controlled test ware increases the chances of finding defects in the software under test.**

**Answer: D**

#### NEW QUESTION # 196

.....

If you decide to buy a ISTQB-CTFL exam braindumps, you definitely want to use it right away! ISTQB-CTFL training guide's powerful network and 24-hour online staff can meet your needs. First of all, we can guarantee that you will not encounter any obstacles in the payment process. After your payment is successful, we will send you an email within 5 to 10 minutes. As long as you click on the link, you can use ISTQB-CTFL Learning Materials to learn.
