

F5CAB3 VCE Torrent & F5CAB3 Exam Dumps & F5CAB3 Study Materials

We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our F5CAB3 actual exam is. In order to let you have a general idea about the shining points of our F5CAB3 training materials, I would like to introduce the free demos of our F5CAB3 study engine for you. There are the real and sample questions in the free demos to show you that how valid and latest our F5CAB3 learning dumps are. So just try now!

As we all know, practice makes perfect. It's also applied into preparing for the exam. F5CAB3 training materials of us contain both quality and quantity, and you will get enough practice if you choose us. In addition, F5CAB3 exam cram covers most of the knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning. We are pass guarantee and money back guarantee if you fail to pass your exam by using F5CAB3 Exam Dumps of us. Online and offline service are available by us, if you have any questions, you can consult us.

Authentic F5CAB3 Exam Hub, F5CAB3 Valid Exam Registration

As the old saying goes, "Everything starts from reality, seeking truth from facts." This means that when we learn the theory, we end up returning to the actual application. Therefore, the effect of the user using the latest F5CAB3 exam dump is the only standard for proving the effectiveness and usefulness of our products. I believe that users have a certain understanding of the advantages of our F5CAB3 Study Guide, but now I want to show you the best of our F5CAB3 training Materials - Amazing pass rate. Based on the statistics, prepare the exams under the guidance of our F5CAB3 practice materials, the user's pass rate is up to 98% to 100%, And they only need to practice latest F5CAB3 exam dump to hours.

F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q16-Q21):

NEW QUESTION # 16

Application administrators are reporting that nodes different from those configured in the pool are selected. The use of an iRule is suspected.

How can the BIG-IP Administrator check if an iRule is used for this traffic? (Choose two answers)

- A. Via TMSH with the list /ltm virtual <virtual_server> command.
- B. Via TMSH with the list /ltm rule <iRule> command.
- C. Via the GUI at the Resources tab for the virtual server.
- D. Via the GUI at the iRule tab for the virtual server.

Answer: A,C

Explanation:

In BIG-IP systems, iRules influence traffic only when they are attached to a Virtual Server. If application traffic is being sent to nodes or pool members that are not defined in the pool, this typically indicates that an iRule is overriding the default load-balancing behavior by explicitly selecting a pool or node.

According to BIG-IP Administration: Data Plane Configuration and official F5 guidance:

iRules are associated with Virtual Servers, not directly with pools or nodes.

To determine whether an iRule is actively affecting traffic, the administrator must inspect the Virtual Server configuration.

Explanation of the correct answers:

B . Via the GUI at the Resources tab for the virtual server

The Resources tab in the Configuration Utility displays all traffic-handling objects applied to the Virtual Server, including assigned iRules. This is the primary GUI location to verify whether an iRule is influencing data plane traffic.

C . Via TMSH with the list /ltm virtual <virtual_server> command

This TMSH command displays the full Virtual Server configuration, including any iRules listed under the rules section. It is the authoritative CLI method to confirm iRule usage.

Why the other options are incorrect:

A . Via TMSH with the list /ltm rule <iRule> command

This command only shows the contents of an iRule and does not indicate whether the iRule is attached to or used by any Virtual Server.

D . Via the GUI at the iRule tab for the virtual server

BIG-IP does not provide a dedicated "iRule" tab on Virtual Servers. iRules are viewed and managed under the Resources tab.

Correct Conclusion:

To verify whether an iRule is responsible for unexpected node selection, the BIG-IP Administrator must examine the Virtual Server configuration, either through the Resources tab in the GUI or by using TMSH to list the Virtual Server configuration.

NEW QUESTION # 17

A Standard Virtual Server reports poor network performance for Internet-based clients.

What configuration should be applied?

- A. Client TCP: f5-tcp-optimized
- B. Client TCP: f5-tcp-lan / Server TCP: f5-tcp-wan
- C. Client TCP: f5-tcp-wan / Server TCP: f5-tcp-lan
- D. Client TCP: f5-tcp-lan

Answer: C

Explanation:

WAN TCP profiles are optimized for high latency and packet loss typical of Internet clients, while LAN profiles are ideal for backend servers.

NEW QUESTION # 18

Refer to the exhibit.

Visit Us: Brave-Dumps.com

| General Properties | |
|----------------------------------|---|
| Name | VS-DNS |
| Partition / Path | Common |
| Description | |
| Type | Standard |
| Source Address | 192.168.100.0/23 |
| Destination Address/Mask | 192.168.21.50 |
| Service Port | 53 Other: <input checked="" type="checkbox"/> |
| Notify Status to Virtual Address | <input checked="" type="checkbox"/> |
| Link | None |
| Availability | <input checked="" type="checkbox"/> Unknown (Enabled) - The children pool member(s) eit |
| Syncookie Status | Off |
| State | Enabled |

Configuration: Advanced

| | |
|---------------------------|----------------------|
| Protocol | TCP |
| Protocol Profile (Client) | tcp |
| Protocol Profile (Server) | (Use Client Profile) |

DNS queries from two internal DNS servers are being load-balanced to external DNS servers via a virtual server on a BIG-IP device. The DNS queries originate from:

192.168.10.100

192.168.10.200

and target:

192.168.2.150

All DNS queries destined for the external DNS servers fail.

Which property change should the BIG-IP Administrator make in the Virtual Server to resolve this issue? (Choose one answer)

- A. Type to Performance (HTTP)
- **B. Protocol to UDP**
- C. Source Address to 192.168.10.0/24
- D. Protocol profile (Client) to DNS_OPTIMIZED

Answer: B

Explanation:

DNS traffic is primarily transported using UDP port 53. In the exhibit, the Virtual Server is configured with the Protocol set to TCP, which prevents standard DNS queries from being processed correctly. BIG-IP Virtual Servers must be configured with the correct Layer 4 protocol to match the application traffic they are handling.

According to the BIG-IP Administration: Data Plane Configuration documentation:

The Protocol setting on a Virtual Server defines whether traffic is processed as TCP, UDP, or another supported transport protocol. Standard DNS queries and responses use UDP, while TCP is only required for DNS zone transfers (AXFR) or exceptionally large

responses.

When a DNS Virtual Server is incorrectly configured with TCP, UDP-based DNS queries are dropped, causing all requests to fail.

Why the other options are incorrect:

A . Protocol profile (Client) to DNS_OPTIMIZED

A DNS profile enhances DNS functionality but does not correct an incorrect transport protocol configuration.

B . Type to Performance (HTTP)

Performance (HTTP) Virtual Servers are designed for HTTP traffic and are not suitable for DNS services.

C . Source Address to 192.168.10.0/24

The existing source IPs already fall within the allowed range, so this setting does not address the failure.

Correct Resolution:

Changing the Protocol to UDP aligns the Virtual Server with standard DNS transport requirements, allowing DNS queries to be successfully processed and load-balanced.

NEW QUESTION # 19

A Standard Virtual Server for a web application is configured with SNAT Automap. The original client IP must be known by backend servers.

What should the BIG-IP Administrator configure?

- A. HTTP profile with X-Forwarded-For
- B. HTTP Transparent profile
- C. Performance (HTTP) Virtual Server
- D. SNAT pool using client IP

Answer: A

Explanation:

X-Forwarded-For inserts the original client IP into HTTP headers while SNAT is enabled.

NEW QUESTION # 20

During high-demand traffic events, the BIG-IP Administrator needs to limit new connections per second.

What should be applied?

- A. Connection limit
- B. OneConnect profile
- C. Connection rate limit
- D. HTTP Compression profile

Answer: C

Explanation:

Connection rate limiting controls how many new connections per second are accepted, protecting backend resources.

NEW QUESTION # 21

.....

Learning at electronic devices does go against touching the actual study. Although our F5CAB3 exam dumps have been known as one of the world's leading providers of exam materials, you may be still suspicious of the content. Therefore, we especially provide several demos for future reference and we promise not to charge you of any fee for those downloading. Then you will know whether it is suitable for you to use our F5CAB3 Test Questions. There are answers and questions provided to give an explicit explanation. We are sure to be at your service if you have any downloading problems'

Authentic F5CAB3 Exam Hub: <https://www.passleadervce.com/F5-CA/reliable-F5CAB3-exam-learning-guide.html>

F5 Dumps F5CAB3 PDF You can use the computer or you can use the mobile phone, Moreover, without the needs of waiting, you can download the F5CAB3 study guide after paying for it immediately, Success in the F5 F5CAB3 certification exam gives a huge boost to your career in the sector, F5 Dumps F5CAB3 PDF It will certainly help candidates to enrich their knowledge and be ready to answer all questions in the real exam.
