* SAP Documentation Excerpt: From the Career Site Builder Administration Guide: "Site setup settings within Career Site Builder are critical and should be restricted to trained administrators via Role-Based Permissions to ensure proper configuration and maintenance."

* Option C (Until CSB Role Based Permission is enabled, all users with access to CSB have all permissions in the tool): Correct. Without RBP, access is unrestricted, posing a risk to site integrity.

* SAP Documentation Excerpt: From the Career Site Builder Security Guide: "If Role-Based Permissions are not configured in CSB > Users > Roles, all users with access to the tool will have full permissions until restrictions are applied."

* Option B (Administrators receive a notification): Incorrect. No such notification mechanism exists in CSB for Admin Center permissions.

* Option D (NO users can access CSB): Incorrect. Users can access CSB without RBP, but with full permissions. SAP's security model supports A and C as key reasons. References: SAP SuccessFactors Recruiting: Candidate Experience - Career Site Builder Security Guide.
