By getting the Salesforce PDII-JPN Certification, you can avoid thinking about negative things, instead, you can focus on the positive and bright side of taking this step and find a new skill set to improve your chances of getting your dream job.

## Salesforce Sample Questions (Q140-Q145):

### NEW QUESTION # 140

Universal Containersは、外部JavaScriptファイルとCSSファイルの組み込みを必要とするVisualforceページを開発しています。ページの効率的な読み込みとキャッシュを実現したいと考えています。この目標を達成するには、どの機能を活用すべきでしょうか？

- A. @リモートアクション
- B. <apex:アクション関数>
- C. 静的リソース
- D. <apex:pageBlockTable>

**Answer: C**

Explanation:

To optimize the performance of a Visualforce page that uses external assets, Static Resources (Option A) is the platform-native best practice. Static resources allow you to upload content such as archives (.zip or .jar files), images, stylesheets, and JavaScript files that you can reference in a Visualforce page.

The primary benefits of using Static Resources over other methods (like hosting files externally or hardcoding styles) include:

\* Caching: Salesforce serves static resources from a Content Delivery Network (CDN). This means once a user's browser loads the JavaScript or CSS file, it is cached locally, significantly reducing page load times for subsequent requests.

\* Relative Referencing: Using the \$Resource global variable (e.g., {!URLFOR(\$Resource.MyZipFile, 'styles/main.css')}) ensures that your page references the correct version of the file across different environments (Sandbox, Production) without changing hardcoded URLs.

\* Efficiency: By bundling related files into a single ZIP archive as a static resource, you reduce the number of HTTP requests the browser must make to render the page.

Options B and D are related to AJAX and JavaScript-to-Apex communication, and Option C is a component used for rendering data tables; none of these address the storage or caching of external front-end assets.

### NEW QUESTION # 141

Universal Containersは、Salesforceを使用してorder\_\_cオブジェクト内の注文を追跡します。

order\_\_cオブジェクトには、組織全体のプライベートなデフォルトがあります。order\_\_cオブジェクトにはカスタムフィールドQuality\_Controller\_\_cがあり、これはユーザーへのルックアップであり、指定されたユーザーがorder\_\_cで品質管理を実行していることを示すために使用されます。

Quality\_Controller\_\_cフィールドに設定されたユーザーに読み取り専用アクセスを自動的に付与するには何を使用する必要がありますか？

- A. Apex管理による共有
- B. ユーザー管理の共有
- C. レコードの所有権
- D. 基準に基づく共有

**Answer: A**

Explanation:

Apex managed sharing provides a programmatic way to share records when the organization-wide default for an object is Private. The Quality\_Controller\_\_c field can be used within a trigger or class to share records with the specified user using Apex managed sharing.

References: Apex Developer Guide - Sharing a Record Using Apex

### NEW QUESTION # 142

RESTは\_\_\_\_\_を使用します。

- A. HTTPRequest クラス
- B. HTTPResponse クラス
- C. 上記すべて
- D. HTTP クラス

**Answer: C**

### NEW QUESTION # 143

開発者は、様々なデバイスでレスポンシブな Lightning Web コンポーネントを作成するという課題を抱えています。この目標を達成するために役立つ 2 つのコンポーネントはどれですか。

- A. ライトニングナビゲーション
- B. Lightningレイアウト項目
- C. Lightningレイアウト
- D. Lightning入力場所

**Answer: B,C**

Explanation:

To build a responsive user interface in Lightning Web Components (LWC), developers rely on the layout system provided by the Lightning Design System (SLDS). This system is primarily implemented through two tightly coupled components: lightning-layout and lightning-layout-item.

lightning-layout acts as a flexible container (a flexbox wrapper). It allows developers to arrange child components in a row or column and manage horizontal and vertical alignment. It provides the overall structure for the grid. lightning-layout-item is the child component that resides within a lightning-layout. It is responsible for defining the actual proportions of the content across different breakpoints (small, medium, and large devices) using attributes like size, small-device-size, medium-device-size, and large-device-size.

Together, these two components allow a developer to specify exactly how much space a piece of content should occupy depending on the user's screen size. For example, a sidebar might occupy 100% of the width on a phone but only 25% on a desktop. lightning-input-location is a specific input field for geolocation data, and lightning-navigation is a service used for page routing; neither is involved in the visual responsiveness or structural layout of the component. Therefore, options B and C are the essential building blocks for responsive design.

### NEW QUESTION # 144

開発者は、プロセスの最終実行前に 3 つのセーブポイント SP1、SP2、および SP3 (順番に作成) を設定する必要があります Apex ベースの注文作成プロセスをデバッグしています。

最終的な実行プロセス中に、開発者は特定の条件に対して SP1 にロールバックするルーチンを実行します。条件が修正されると、コードは 2 を呼び出して SP3 にロールバックし、最終的な実行を続行します。ただし、SP3 へのロールバックを呼び出すと、Funtime エラーが発生します。

開発者が実行時エラーを受け取るのはなぜですか？

- A. SP1 をロールバックすると SP3 が無効になりました。
- B. 開発者がセーブポイント間に持つ DML ステートメントが多すぎます。
- C. 開発者が 1 つのトリガーセッションで使用したセーブポイントが多すぎます。
- D. 開発者は SP3 を呼び出す前に SP2 を呼び出す必要がありました。

**Answer: A**

Explanation:

Savepoints in Apex are markers within a transaction and rolling back to an earlier savepoint (SP1) invalidates any savepoints created after it. Thus, SP3 is invalidated when the code rolls back to SP1, causing a runtime error when a rollback to SP3 is attempted. References: Apex Developer Guide - Savepoint and Transaction Control

### NEW QUESTION # 145

.....

If you don't progress and surpass yourself, you will lose many opportunities to realize your life value. Our PDII-JPN study training materials goal is to help users to challenge the impossible, to break the bottleneck of their own. A lot of people can't do a thing because they don't have the ability, the fact is, they don't understand the meaning of persistence, and soon give up. Our PDII-JPN Latest Questions will help make you a persistent person. Change needs determination, so choose our PDII-JPN training braindump quickly! Our PDII-JPN exam questions can help you pass the PDII-JPN exam without difficulty.
