New Deep-Security-Professional Exam Name | Deep-Security-Professional Exam Consultant

While the Trend Deep-Security-Professional practice questions pdf can help you learn all the relevant answers for the Trend Micro Certified Professional for Deep Security, Actualtests4sure also provides an online Sitecore Practice Test engine to enhance your

confidence and skills. This practice test engine is an effective tool for both learning and practicing Trend Deep-Security-Professional Exam.

Trend Micro Certified Professional for Deep Security Sample Questions (Q10-Q15):

NEW QUESTION # 10
What is IntelliScan?

- A. IntelliScan is a malware scanning method that monitors process memory in real time. It can identify known malicious processes and terminate them.
- B. IntelliScan is a mechanism that improves scanning performance. It recognizes files that have already been scanned based on a digital fingerprint of the file.
- C. IntelliScan is a method of identifying which files are subject to malware scanning as determined from the file content. It uses the file header to verify the true file type.
- D. IntelliScan reduces the risk of viruses entering your network by blocking real-time compressed executable files and pairs them with other characteristics to improve mal-ware catch rates.

Answer: C

NEW QUESTION # 11
Policies in Deep Security can include a Context value. Which of the following statements re-garding Context is correct?

- A. The Context provides Deep Security Agents with location awareness and are associated with Firewall and Intrusion Prevention Rules.
- B. The Context provides Deep Security Agents with location awareness and are associated with Log Inspection and Integrity Monitoring Rules.
- C. The Context provides Deep Security Agents with location awareness and are associated with Anti- Malware and Web Reputation Rules.
- D. The Context provides Deep Security Agents with location awareness and are associated with Web Reputation Rules only.

Answer: A

Explanation:
The Context setting in Deep Security policies gives agents location awareness (such as "Office," "Data Center," or "Untrusted"), which affects Firewall and Intrusion Prevention rules. The context can change dynamically based on network/environment, allowing adaptive protection.
From the official documentation:
"Context provides location awareness and is associated with Firewall and Intrusion Prevention rules, allowing policies to adapt rule application based on the protected computer's environment." Option B is correct.
Options A, C, D are incorrect (context is not associated with Anti-Malware, Web Reputation, Log Inspection, or Integrity Monitoring rules).

NEW QUESTION # 12
Which of the following statements is true regarding Firewall Rules?

- A. Firewall Rules applied to Policy supersede similar rules applied to individuals computers.
- B. Firewall Rules are always processed in the order in which they appear in the rule list, as displayed in the Deep Security manager Web console.
- C. Firewall Rules applied through a parent-level Policy cannot be unassigned in a child-level policy.
- D. When traffic is intercepted by the network filter, Firewall Rules in the policy are always applied before any other processing is done.

Answer: C

Explanation:

Firewall Rules assigned at the parent policy level are inherited by all child policies and cannot be unassigned at the child policy level. To change or remove such rules, you must edit the parent policy.

Option D is not entirely accurate because Deep Security supports rule priority and other processing behaviors, not just list order.

NEW QUESTION # 13

Based on the script displayed in the exhibit, which of the following statements are correct? Select all that apply.

- A. Deep Security Agents deployed using this script will be assigned a specific policy when activated.
- B. Deep Security Agents deployed using this script will be activated against Tenant 0 in a multi-tenant environment.
- C. Deep Security Agents deployed using this script are activated against a specific tenant.
- D. This script will deploy the Deep Security Agent on a server, but will not automatically activate it.

Answer: A,C

NEW QUESTION # 14

Based on the Malware Scan Configuration displayed in the exhibit, which of the following statements is false.

- A. Deep Security Agents using this Malware Scan Configuration will not monitor for compromised Windows processes.
- B. Any document files that display suspicious behavior will be submitted and executed in a sandbox environment on a Deep Discover Analyzer device.
- C. Deep Security Agents will only be able to identify malware in files by using patterns downloaded from the Smart Protection Network.
- D. Internet access is required to properly enable the features identified in this configuration.

Answer: A

Explanation:
Configure Malware Scan

NEW QUESTION # 15

......

With the pass rate is 98.65% for Deep-Security-Professional learning materials, our product has gained popularity among candidates, the also send some thank letter for helping them pass the exam successfully. We have a professional team to research the latest information for Deep-Security-Professional exam materials, and we can ensure that Deep-Security-Professional Exam Dumps you receive are the latest one. What's more, Deep-Security-Professional exam dumps are high quality, and you can pass the exam just one time. We offer you free update for 365 days after purchasing, and our system will send the update version for Deep-Security-Professional exam dumps to you automatically.
