In today's data-driven business world, sharing and visibility of data are critical aspects of customer relationship management. The Salesforce Certified Sharing and Visibility Architect certification exam is designed to test the proficiency of architects in developing and implementing sharing and visibility solutions that meet the needs of an organization's unique business requirements.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q68-Q73):

NEW QUESTION # 68

Universal Containers has two custom objects: Job and Job Interview. The Job Interview object has a lookup relationship to Job. Both objects are set to Private in sharing settings. The HR team will own all Job and Job Interview records. They have asked their

Salesforce Architect to automatically share the Job Interview when the Interviewer (lookup to user record) has been populated. The interviewer can be from any department. What method should the Architect use to achieve this requirement?

- A. Build a criteria-based sharing rule between the Job Interview and the Interviewer
- **B. Build apex Managed Sharing code to share Job Interview with the Interviewer user**
- C. Build a workflow email notification to notify the interviewer of the record assignment
- D. Build a standard sharing rule between Job Interview and the Interviewer

Answer: B

NEW QUESTION # 69

Universal Containers (UC) has created a public group with certain Sales Engineers to help on complex deals and a sharing rule to grant access to these opportunities. Opportunity OWD is private.

What is the impact of these sharing settings?

- A. Sales Engineers direct reports will also have access to these records.
- B. Subordinates of Managers who have Sales Engineers in the public group will also have access to these records.
- **C. Sales Engineers Managers and their managers in the role hierarchy will also have access to these records.**
- D. Sales Engineers that have a similar role of the Sales Engineers of the public group will also have access to these records.

Answer: C

Explanation:

Explanation

The impact of these sharing settings is that Sales Engineers Managers and their managers in the role hierarchy will also have access to these records. This is because sharing rules extend access to users in public groups, roles, or territories. The access granted by a sharing rule is inherited by users above those users in the role hierarchy¹. Subordinates of Managers who have Sales Engineers in the public group, Sales Engineers that have a similar role of the Sales Engineers of the public group, and Sales Engineers direct reports will not have access to these records unless they are explicitly granted by other means.

NEW QUESTION # 70

Universal Containers (UC) provides shipment tracking for its customers on a custom Shipment object. The .. yearly by the customers should be available on the Account record to the Marketing team, but the Marketing Shipment records. What recommend should an Architect provide to accomplish this?

- A. Public organization-wide default on Shipment, process builder, and lookup relationship to Account.
- B. Private organization-Wide default on Shipment, rollup summary, and Master-Detail relationship to Account.
- C. Controlled by Parent (Account) on Shipment, trigger, and trigger, and Master-Detail relationship to Account.
- **D. Private organization-wide default on Shipment, trigger, and Lookup relationship to Account,**

Answer: D

Explanation:

Explanation

Setting the organization-wide default on Shipment to Private, creating a trigger to update the Account record with the shipment information, and using a lookup relationship to Account are the best recommendations to accomplish this requirement. This way, the Marketing team can see the shipment information on the Account record, but not the Shipment records themselves. Option A is incorrect, since setting the organization-wide default on Shipment to Public would give access to all Shipment records to all users. Option B is incorrect, since using a master-detail relationship to Account would inherit the sharing settings from Account, which may not be Private. Option C is incorrect, since using a master-detail relationship to Account and setting the organization-wide default on Shipment to Controlled by Parent would have the same effect as option B.

NEW QUESTION # 71

Mary is Joe's manager in the role hierarchy. The OWD for a custom Invoice object is Public ReadOnly and Mary's profile is not granted the Read permission for the Invoice object.

What action can Mary take on Joe's Invoice records?

- **A. None**

- B. Read/Write
- C. Edit Only
- D. View Only

Answer: A

Explanation:

Explanation

The action that Mary can take on Joe's Invoice records is none. This is because Mary's profile does not have the Read permission for the Invoice object, which means she cannot view any Invoice records, regardless of the OWD or role hierarchy settings. Profile permissions override any other access settings³. Read/Write, Edit Only, and View Only are not possible actions for Mary.

NEW QUESTION # 72

Universal Containers has a Private Sharing Model for the Opportunity object. Sales Rep A at Universal Containers created the Opportunity record and then transferred ownership of the Opportunity record to Sales Rep B.

Both Sales Rep A and B have the same role in the Role Hierarchy.

What access will Sales Rep A have to the Opportunity after the transfer?

- A. Read Only
- B. Read/Write
- **C. No Access**
- D. Full Access

Answer: C

NEW QUESTION # 73
