## Pass Guaranteed 2026 Fortinet High Pass-Rate FCP\_FML\_AD-7.4 Valid Exam Voucher

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test FCP\_FML\_AD-7.4 exam can make you achieve those goals and prove that you are competent. Buying our FCP\_FML\_AD-7.4 practice test can help you pass the exam fluently and the learning costs you little time and energy. The questions and answers of our FCP\_FML\_AD-7.4 Test Question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.

## Fortinet FCP\_FML\_AD-7.4 Exam Syllabus Topics:

---

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Email Flow and Authentication:</b> This section of the exam measures skills of a Messaging Security Engineer and focuses on configuring FortiMail to handle email flow securely. It includes enabling and matching authentication protocols, setting up secure MTA features, and implementing access control, IP policies, and recipient-based policies to control mail delivery and security.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Initial Deployment and Basic Configuration:</b> This section of the exam measures skills of a Network Security Administrator and covers the foundational setup of FortiMail. It includes understanding SMTP and email flow, performing initial configurations such as selecting operation mode, system settings, and defining protected domains. It also involves deploying FortiMail in high-availability clusters to ensure service continuity.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Email Security:</b> This section of the exam measures skills of a Network Security Administrator and deals with implementing security controls to filter and manage email threats. Candidates must configure session-based filtering, spam detection methods, malware protection, APT mitigation, and content filtering. The section also includes email archiving configurations for compliance and storage.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Encryption:</b> This section of the exam measures skills of a Messaging Security Engineer and addresses the implementation of encryption methods in FortiMail. It covers traditional SMTP encryption and identity-based encryption (IBE). Candidates are expected to configure these technologies and manage IBE users for secure email communication.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Server Mode and Transparent Mode:</b> This section of the exam measures skills of a Network Security Administrator and explains how to deploy and manage FortiMail in different operation modes. It includes configuring server mode to handle mail directly and deploying FortiMail in transparent mode where it acts as a gateway to filter email traffic without altering the existing mail infrastructure.</li> </ul>

## Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Refer to the exhibit which displays a topology diagram.

Which two statements describe the built-in bridge functionality on a transparent mode FortiMail? (Choose two.)

- A. Any bridge member interface can be removed from the bridge and configured as a routed interface.
- B. If port1. is required to process SMTP traffic, it must be configured as a routed interface.
- C. The management IP is permanently tied to port1, and port1 cannot be removed from the bridge.
- D. All bridge member interfaces belong to the same subnet as the management IP.

Answer: C,D

### NEW QUESTION # 40

What are two reasons for having reliable DNS servers configured on FortiMail? (Choose two.)

- A. HA synchronization
- B. FortiGuard Connectivity
- C. Email transmission
- D. Firmware updates

Answer: B,C

Explanation:

FortiGuard Connectivity

FortiMail relies on DNS to resolve FortiGuard service endpoints for antivirus definitions, antispam updates, reputation lookups, and other cloud services.

Email transmission

FortiMail's built-in MTA performs MX and A record lookups to route outbound mail and verify sender domains for SPF/DNSBL checks, so reliable DNS is essential for proper mail flow.

### NEW QUESTION # 41

Refer to the exhibit, which shows a few lines of FortiMail logs.

```
STARTTLS=server, relay=extsrv [100.64.1.99], version=TLSv1.3, verify=OK, cipher=TLS_AES_256_GCM_SHA384, bits=256/256
from=<extuser@external.lab>, size=561, class=0, nrccpts=1, msgid=<<20220909045805.2894w5jb001685@external.lab>, proto=ESMTP, daemon=SMTP_MTA, relay=extsrv [100.64.1.99]
to=<user1@internal.lab>, delay=00:00:30, xdelay=00:00:30, mailer=esmtplib, pri=120561, relay=[10.0.1.99], dsn=4.0.0, stat=Deferred: Connection timed out with internal.lab.
```

Based on these log entries, which two statements describe the operational status of this FortiMail device? (Choose two.)

- A. FortiMail is experiencing issues accepting the connection from the external.labMTA.
- B. The FortiMail device is in server mode.
- C. FortiMail is experiencing issues delivering the email to the internal.labMTA.
- D. The FortiMail device is in gateway or transparent mode.

Answer: C,D

Explanation:

The FortiMail device is in gateway or transparent mode.

The log shows FortiMail accepting mail from an external MTA (acting as a proxy) and then relaying it on to an internal MTA at 10.0.1.99, which is characteristic of gateway/transparent operation.

FortiMail is experiencing issues delivering the email to the internal.lab MTA.

The final log entry shows stat=Deferred: Connection timed out with internal.lab., indicating FortiMail successfully received the message but is unable to complete delivery to the downstream internal server.

### NEW QUESTION # 42

Refer to the exhibit, which displays a list of IBE users on a FortiMail device.

Enabled	Email	First Name	Last Name	Status	Creation Time	Last Access
<input checked="" type="checkbox"/>	extuser@external.lab	Mail	User	Activated		
<input checked="" type="checkbox"/>	extuser2@external.lab			Pre-registered		

Which statement describes the pre-registered status of the IBE user extuser2@external.lab?

- A. The user has completed the IBE registration process, but has not yet accessed their IBE email.
- B. The user has received an IBE notification email, but has not accessed the HTTPS URL or attachment yet.
- C. The user account has been de-activated, and the user must register again the next time they receive an IBE email.
- D. The user was registered by an administrator in anticipation of IBE participation.

Answer: B

### NEW QUESTION # 43

Refer to the exhibits, which shows a DLP scan profile configuration (DLP Scan Rule 1 and DLP Scan Rule 2) from a FortiMail

device.

### DLP Scan Rule 1

Message Scan Rule

Name: DLPOut  
Comment:

Scan Rule

Match all conditions **Match any condition**

+ New... Edit... Delete Total 3

ID ...	Condition
1	Body contains sensitive data "Credit_Card_Number"
2	Attachment contains sensitive data "Credit_Card_Number"
3	Subject contains Credit Card

FORTINET

### DLP Scan Rule 2

Message Scan Rule

Name: DLPOut  
Comment:

Scan Rule

Conditions **Exceptions**

+ New... Edit... Delete Total 1

ID ...	Condition
1	Sender contains sales@example.com

FORTINET

Which two message types will trigger this DLP scan rule? (Choose two.)

- A. An email message with a subject that contains the term "credit card" will trigger this scan rule.
- B. An email sent from sales@internal.lab will trigger this scan rule, even without matching any conditions.

- C. An email message that contains credit card numbers in the body will trigger this scan rule.
- D. An email that contains credit card numbers in the body, attachment, and subject will trigger this scan rule.

**Answer: A,C**

Explanation:

Any message whose subject line contains the phrase "credit card" meets one of the "Match any condition" criteria, so it triggers the rule.

Any message whose body contains a detected credit-card number likewise meets a condition and triggers the rule.

## NEW QUESTION # 44

.....

The Fortinet FCP\_FML\_AD-7.4 desktop-based practice exam is compatible with Windows-based computers and only requires an internet connection for the first-time license validation. The web-based FCP - FortiMail 7.4 Administrator (FCP\_FML\_AD-7.4) practice test is accessible on any browser without needing to install any separate software. Finally, the FCP - FortiMail 7.4 Administrator (FCP\_FML\_AD-7.4) dumps pdf is easily portable and can be used on smart devices or printed out.
