**Exam C-ACDET-2506 Pattern, C-ACDET-2506 Reliable Test Price**

Generally speaking, a satisfactory practice material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our C-ACDET-2506 practice materials contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our C-ACDET-2506 practice materials. We would like to take this opportunity and offer you a best C-ACDET-2506 practice material as our strongest items as follows.

## **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q35-Q40):**

### **NEW QUESTION # 35**

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- A. SourcingProject
- **B. ExtendedAddressRep**
- C. ContractWorkspace
- D. AbstractDocument

**Answer: B**

### **NEW QUESTION # 36**

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Project Studio
- B. SAP for Me
- **C. SAP Ariba Enablement Workbook**
- D. SAP Cloud Application Lifecycle Management

**Answer: C**

Explanation:

The SAP Ariba Enablement Workbook is an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

### **NEW QUESTION # 37**

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. Neither the templates nor the data is migrated using the tool.
- **B. The templates are migrated by the tool, but the data must be loaded manually later.**
- C. Only the data of the flex master data templates is migrated; templates must be created manually.
- D. Both the templates and their data are fully migrated by the tool.

**Answer: B**

Explanation:

In SAP Ariba, the migration tool (Intelligent Configuration Manager - ICM) migrates flex master data templates (the structure and definitions), but it does not migrate the actual master data records. The master data itself must be manually exported from the source and imported into the target environment after templates are migrated. This separation helps ensure data integrity and allows for more controlled migration processes.

### **NEW QUESTION # 38**

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- B. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- C. Subsequent migration activities follow Bluefield deployment scenario.
- D. Subsequent migration activities will require a complete reconfiguration of existing solutions.

**Answer: B**

#### NEW QUESTION # 39

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field change value, your custom field does not change. What scenarios could cause this? Note: There are 3 correct answers to this question.

- A. Your dependent field does not have the property Refresh screen on value change enabled
- B. Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field
- C. The parameter Application.Base.RecomputeValueOnFieldChange is not enabled
- D. The custom field has the property Lock Initial value enabled, which prohibits a field to be changed once it's set
- E. The defaulting Expression sets a value that violates the custom field Validity Condition

**Answer: A,B,D**

#### NEW QUESTION # 40

.....

You may urgently need to attend C-ACDET-2506 certificate exam and get the certificate to prove you are qualified for the job in some area.
