With the Nutanix NCP-MCI certification exam you will get an opportunity to learn new and in-demand skills. In this way, you will stay updated and competitive in the market and advance your career easily. To do this you just need to pass the Nutanix Certified Professional - Multicloud Infrastructure 6.10 NCP-MCI Certification Exam.

Nutanix Certified Professional - Multicloud Infrastructure 6.10 Sample Questions (Q20-Q25):

NEW QUESTION # 20

A database server has a corrupt database after a VM was restored from a recovery point. The database VM is part of the VIP_VMS category that is protected by a Protection Policy with asynchronous schedule.

After checking the state of NGT tools, an administrator is investigating the Protection Policy looking for the root cause of the database corruption.

What is the most probably cause?

- A. Set RPO is too high for protecting database VMs.
- **B. Take App-Consistent Recovery Point option is not selected.**
- C. Roll-up schedule is used in Protection Policy instead of Linear.
- D. The VM should have been added to the Applications category.

Answer: B

NEW QUESTION # 21

A company has recently purchased five new Nutanix clusters. The lab manager has been tasked with remotely deploying the Nutanix infrastructure in the most efficient way possible. Which tool would best help to accomplish this task?

- A. Standalone Foundation VM
- B. Foundation for Windows/Mac
- C. Phoenix ISO image
- **D. Foundation Central**

Answer: D

NEW QUESTION # 22

An administrator decided to simplify volume group management by automatically enabling vDisk load balancing for better performance.

How can the administrator enable vDisk load balancing by default for volume groups?

- A. Directly attach vDisk load balanced volume groups to VMs.
- B. For Linux VMs ensure the SCSI device timeout is no more than 30 seconds.
- C. Attach no more than 16 load balanced volume groups per guest VM.
- **D. Use the data services IP address for attached volume groups.**

Answer: D

NEW QUESTION # 23

An administrator needs to change the bond type on an existing virtual switch in a production AHV cluster running critical workloads. The administrator wants to avoid any disruption to running VMs during the change.

How should the administrator complete this task?

- A. Delete the virtual switch and recreate it with a new bond type to avoid a rolling update.
- **B. Use the Standard method to migrate VMs and apply changes sequentially to each node.**
- C. Place all of the nodes in maintenance mode simultaneously, then apply the bond type change.
- D. Use the Quick method to apply changes without putting nodes into maintenance mode.

Answer: B

NEW QUESTION # 24

A cluster of six AHV nodes has a Memory Runway of only 12 days, while the current cluster memory usage shows 60% utilization. What could be the reason?

- **A. The cluster memory usage is continuously increasing during the last 21 days.**
- B. The cluster has no historical data, causing the Runway to default to a conservative 12 days.
- C. The cluster contains a simulated workloads scenario.
- D. The cluster is configured with HA in "Guaranteed Mode".

Answer: A

NEW QUESTION # 25

.....

You will need to pass the Nutanix Certified Professional - Multicloud Infrastructure 6.10 (NCP-MCI) exam to achieve the Nutanix NCP-MCI certification. Due to extremely high competition, passing the Nutanix NCP-MCI exam is not easy; however, possible. You can use Test4Sure products to pass the NCP-MCI Exam on the first attempt. The Nutanix practice exam gives you confidence and helps you understand the criteria of the testing authority and pass the Nutanix Certified Professional - Multicloud Infrastructure 6.10 (NCP-MCI) exam on the first attempt.
