Our staff is suffer-able to your any questions related to our MB-500 test guide. If you get any suspicions, we offer help 24/7 with enthusiasm and patience. Apart from our stupendous MB-500 Latest Dumps, our after-sales services are also unquestionable. Your decision of the practice materials may affects the results you concerning most right now. Good exam results are not accidents, but the results of careful preparation and high quality and accuracy materials like our MB-500 practice materials.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q255-Q260):

NEW QUESTION # 255

You are a Dynamics 365 Finance developer.

You need to configure integration between Dynamics 365 Finance and other tools.

Which integration types should you use? To answer, drag the appropriate integration types to the correct requirement. Each integration type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

Integration types	Requirement	Integration type
synchronous	Request information about product availability from a web page to calculate the extended price.	<input type="text"/>
asynchronous	Periodically update a reporting database.	<input type="text"/>
	Edit data in Microsoft Excel by using the Excel Data Connector add-in.	<input type="text"/>
	Import a credit card data file once each day.	<input type="text"/>

Answer:

Explanation:

Answer Area

Integration types	Requirement	Integration type
synchronous	Request information about product availability from a web page to calculate the extended price.	synchronous
asynchronous	Periodically update a reporting database.	asynchronous
	Edit data in Microsoft Excel by using the Excel Data Connector add-in.	synchronous
	Import a credit card data file once each day.	asynchronous

Explanation:

Requirement	Integration type
Request information about product availability from a web page to calculate the extended price.	synchronous
Periodically update a reporting database.	asynchronous
Edit data in Microsoft Excel by using the Excel Data Connector add-in.	synchronous
Import a credit card data file once each day.	asynchronous

Box 1: synchronous

A synchronous pattern is a blocking request and response pattern, where the caller is blocked until the callee has finished running and gives a response.

Box 2: Asynchronous

An asynchronous pattern is a non-blocking pattern, where the caller submits the request and then continues without waiting for a response.

Box 3: synchronous

Box 4: Asynchronous

A typical Batch job.

NEW QUESTION # 256

You are a Dynamics 365 Finance developer.

A long-running process times out in the system.

You need to implement the asynchronous framework to resolve this issue.

Which class runAsync method should you use for each use case? To answer, drag the appropriate classes to the correct use cases.

Each class may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 257

A company uses Dynamics 365 Finance.

You create two methods in a class:

* MethodA is called only from the class. MethodA is not called from other locations in the code. Within MethodA, you must access class variables.

* MethodB is called from other places in the app. MethodB does not need to instantiate the class or access the class variables.

You need to implement the methods.

Which method types should you use? To answer, drag the appropriate method types to the correct methods.

Each method type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Method types

- Private instance
- Public static
- Private static

Method

- MethodA
- MethodB

Method type

- Private instance
- Public static

NEW QUESTION # 258

A company has a cloud-based installation of Dynamics 365 Finance. The company also has Dynamics 365 Sales and Customer Service systems.

The company implements an analytical reports solution.

You need to select the applicable storage feature for each requirement.

Which storage feature should you use to meet each requirement? To answer, drag the appropriate storage options to the correct requirements. Each storage option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Storage types

- Entity store
- Bring your own database

Requirement

- Import data from various systems into one reporting database and extend tables.
- Develop and extend Power BI reports and publish automatically through the application deployment lifecycle.

Storage

-
-

Answer:

Explanation:

Storage types

- Entity store
- Bring your own database

Requirement

- Import data from various systems into one reporting database and extend tables.
- Develop and extend Power BI reports and publish automatically through the application deployment lifecycle.

Storage

- Bring your own database
- Entity store

Explanation:

Storage types

- Entity store
- Bring your own database

Requirement

- Import data from various systems into one reporting database and extend tables.
- Develop and extend Power BI reports and publish automatically through the application deployment lifecycle.

Storage

- Bring your own database
- Entity store

NEW QUESTION # 259

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: (One numbers are included for reference only.)

```

01
02 public class Vehicle
03 {
04
05     public int bike()
06     {
07     }
08     public int automobile()
09     {
10     }
11     public int bicycle()
12     {
13     }

```

You need to ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

```

public class ErrorWarningEnum : SysAttribute
{
    ErrorWarningEnum errorWarningEnum;
    string explanation;
    public void new(ErrorWarningEnum _errorWarningEnum, string _explanation)
    {
        super();
        errorWarningEnum = _errorWarningEnum;
        explanation = _explanation;
    }
}

```

Insert the following code at line 04:

```
[SysObsoleteAttribute("Deprecated. Please use the bicycle method instead", true)]
```

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 260

.....

Do you want to obtain your MB-500 exam dumps as quickly as possible? If you do, then we will be your best choice. You can receive your download link and password within ten minutes after payment, therefore you can start your learning as early as possible. In addition, we offer you free samples for you to have a try before buying MB-500 Exam Materials, and you can find the free samples in our website. MB-500 exam dumps cover all most all knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning.
