最新的 SAP Certified Associate C_BCBAI_2509 免費考試真題 (Q17-Q22):

問題 #17

Which of the following are included in SAP's Responsible AI framework? Note: There are 3 correct answers to this question.

- A. SAP Global Human Rights commitment
- **B. Human-centered design**
- C. ESG reporting
- **D. Transparency and accountability**
- **E. Ethical governance**

答案: B,D,E

問題 #18

What are some advantages for businesses using Joule Agents? Note: There are 3 correct answers to this question.

- A. Unrivaled process mining and applications
- **B. Unmatched extensibility and built-in security**
- **C. Integration and collaboration across business functions**
- **D. Agile business transformation and sustainable value chains**

答案: B,C,D

解題說明:

Joule Agents provide significant advantages for businesses, as outlined in SAP Business AI documentation. Unmatched extensibility and built-in security allow businesses to customize AI solutions while maintaining robust data protection and compliance. Agile business transformation and sustainable value chains enable rapid adaptation to market changes and environmentally conscious operations through AI-driven insights. Integration and collaboration across business functions ensure seamless connectivity between departments, enhancing operational efficiency. While process mining is a feature of SAP Signavio, unrivaled process mining and applications is not a primary advantage of Joule Agents. These capabilities make Joule Agents a cornerstone of SAP's intelligent enterprise strategy.

問題 #19

(What are some advantages of SAP's generative AI hub? Note: There are 3 correct answers to this question.)

- A. Rely on data privacy policies
- **B. Orchestrate multiple LLMs**
- **C. Fine-tune generic LLMs**
- D. Use SAP anonymized data
- **E. Ensure secure and trusted operations**

答案: B,C,E

解題說明:

Comprehensive and Detailed Explanation From Exact Extract: The advantages of SAP's generative AI hub include the ability to orchestrate multiple large language models (LLMs) for complex scenarios, fine-tune generic LLMs to customize solutions, and ensure secure and trusted operations through enterprise-grade security and compliance. These features enable developers to build reliable AI applications while maintaining data privacy and operational efficiency.

Exact extracts supporting this:

Orchestrate multiple LLMs: "Generative AI hub is a central cockpit that allows developers to create, operate, monitor, and orchestrate their generative AI scenarios."learning.sap.com "The generative AI hub in SAP AI Core infrastructure provides customers with secure access to a broad range of large language models (LLMs)."news.sap.com Fine-tune generic LLMs: "Improvements to the generative AI hub capability in SAP AI Core and SAP AI Launchpad will allow developers to build, customize, and deploy complex AI-driven solutions more efficiently."sap.com "Choose from a selection of generative AI models for prompt experimentation and prompt lifecycle management."help.sap.com Ensure secure and trusted operations: "It also ensures secure and trusted operations with enterprise-grade security and compliance."help.sap.com "The generative AI hub provides customers with secure access to a broad range of large language models (LLMs) that ..."news.sap.com "Enables developers to build, customize, and deploy complex AI-driven solutions more efficiently and with greater confidence."sap.com Other options are incorrect because:

Option B: While data privacy is upheld, the advantage is more about ensuring secure operations rather than merely relying on policies; the hub actively enforces privacy through its design.

Option D: The hub focuses on using customer data securely for customization, not specifically on SAP anonymized data as a primary advantage.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP product page "Generative AI | SAP Artificial Intelligence Innovations" and SAP Help Portal for SAP AI Core, as well as community blogs on the generative AI hub. These resources position the hub within SAP BTP for building custom AI solutions in the SAP Business Suite, emphasized in the C_BCBAI_2502 certification and learning journeys like "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI."
