100% Pass Quiz 2026 Oracle Reliable Valid Test 1z0-1104-25 Format

What's more, part of that ActualPDF 1z0-1104-25 dumps now are free: https://drive.google.com/open?id=1hkVTRLPr2E0bS4Bs_kLAXdtQbW-yHA8j

A second format is a Oracle 1z0-1104-25 web-based practice exam that can take for self-assessment. However, it differs from desktop-based 1z0-1104-25 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Oracle 1z0-1104-25 web-based practice exam does not require any other plugins. It also includes all of the functionalities of desktop 1z0-1104-25 software and will assist you in passing the 1z0-1104-25 certification test.

Oracle 1z0-1104-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• OCI Security Introduction: This section of the exam measures the skills of Cloud Security Professionals and covers the basics of security in Oracle Cloud Infrastructure. It introduces the shared security responsibility model, the core principles of security design, and the use of foundational security services to secure deployments on OCI.

Topic 2	• Protecting Data: This section of the exam measures the skills of Cloud Security Professionals and highlights data security practices in OCI. It tests knowledge of using the Key Management Service for encryption keys, managing secrets in the OCI Vault, and applying features of OCI Data Safe to ensure sensitive data remains protected.
Topic 3	• Implementing OS and Workload Protection: This section of the exam measures the skills of OCI Administrators and looks at securing workloads and operating systems. It includes the use of OCI Bastion for time-limited access, vulnerability scanning of hosts and containers, and the use of OS management for automated updates. The goal is to ensure that workloads remain resilient and well-protected.
Topic 4	• Protecting Infrastructure - Network and Applications: This section of the exam measures the skills of Cloud Security Professionals and covers methods for securing networks and applications on OCI. Topics include network security groups, firewalls, and security lists, while also focusing on the use of load balancers for availability. The section further addresses the configuration of OCI certificates and web application firewalls to strengthen infrastructure security.

Intereactive 1z0-1104-25 Testing Engine - 100% 1z0-1104-25 Correct Answers

We now live in a world which needs the talents who can combine the practical abilities and knowledge to apply their knowledge into the practical working conditions. To prove that you are that kind of talents you must boost some authorized and useful certificate and the test 1z0-1104-25 certificate is one kind of these certificate. Passing the test 1z0-1104-25 Certification can prove you are that kind of talents and help you find a good job with high pay and if you buy our 1z0-1104-25 guide torrent you will pass the 1z0-1104-25 exam successfully. And our pass rate of 1z0-1104-25 exam prep is high as 99% to 100%.

Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q18-Q23):

NEW QUESTION # 18
A company has deployed OCI Zero Trust Packet Routing (ZPR) to secure its network. They have two compute instances, VM1-01 and VM-02, in a public subnet. VM-01 is tagged with the security attribute app:
vm01, and VM-02 is tagged with app:vm02. The VCN is labeled with network:vcn01, The ZPR policy states:

```
IN ZPR:network:vcn01 VCN ALLOW ZPR:app:vm01 TO CONNECT ZPR:app:vm02 ON PORT 22
```

"What is the expected outcome of this policy?

- A. VM-01 can SSH into VM-02, but VM-02 cannot SSH into VM-01.
- B. VM-02 can SSH into VM-01, but VM-01 cannot SSH into VM-02.
- C. Neither VM-01 nor VM-02 can SSH into each other."
- D. Both VM-01 and VM-02 can SSH into each other.

Answer: A

NEW QUESTION # 19
Which are the essential components to create a rule for the Oracle Cloud Infrastructure (OCI) Events Service?

- A. Install Key and Service Connector
- B. Install Key and Actions
- C. Rule Conditions and Actions
- D. Rule Conditions and Management Agent Cloud Service

Answer: C

NEW QUESTION # 20
"Your company is building a highly available and secure web application on OCI. Because of increasing malicious web-based attacks, the security team has mandated that web servers should not be exposed directly to the Internet.
How should you architect the solution while ensuring fault tolerance and security?

- A. Deploy at least three web servers in different fault domains within a private subnet. Place a public load balancer in a public subnet and configure a back-end set for all web servers. Deploy Web Application Firewall (WAF) and set the load balancer public IP address as the origin.
- B. Deploy at least three web servers in different fault domains within a private subnet. Place a public load balancer in a public subnet, but skip WAF configuration.
- C. Deploy at least three web servers in different fault domains within a public subnet, each with a public IP address. Deploy Web Application Firewall (WAF), and configure an origin for each public IP.
- D. Deploy at least three web servers in different fault domains within a public subnet. Use OCI Traffic Management service for DNS-based load balancing."

Answer: A

NEW QUESTION # 21

Task 7: Verify the OCI Certificate with Load Balancer
Verify HTTPS connection to the load balancer by running the following command in Cloud Shell curl -k https://<Public IP of PBT-CERT-LB-01> Enter the following URL in the web browser:
https://<Public IP of PBT-CERT-LB-01>
If prompted with a certificate error, accept the risk and continue.
Verify web page content by ensuring the text, "You are visiting Web Server 1" from the index.html file is displayed in the browser
See the solution below in Explanation.

Answer:

Explanation:
Task 7: Verify the OCI Certificate with Load Balancer
Step 1: Obtain the Public IP of the Load Balancer
* Log in to the OCI Console.
* Navigate to Networking>Load Balancers.
* Click on PBT-CERT-LB-01.
* Note the Public IP Address from the load balancer details page.
Step 2: Verify HTTPS Connection Using Cloud Shell
* Open the OCI Cloud Shell from the top-right corner of the OCI Console.
* Run the following command, replacing <Public IP of PBT-CERT-LB-01> with the public IP you noted:
curl -k https://<Public IP of PBT-CERT-LB-01>
* Expected output: You should see the text "You are visiting Web Server 1" if the connection is successful. The -k flag ignores certificate validation errors (common during initial testing with self- signed or newly issued certificates).
* If you encounter an error, ensure the load balancer is active, the listener is configured correctly, and the backend server (PBT-CERT-VM-01) is reachable.
Step 3: Verify in a Web Browser
* Open a web browser.
* Enter the following URL, replacing <Public IP of PBT-CERT-LB-01> with the public IP you noted:
https://<Public IP of PBT-CERT-LB-01>
* If prompted with a certificate warning (e.g., due to a self-signed certificate or untrusted CA), accept the risk and proceed (click "Advanced" and "Proceed" or similar, depending on your browser).
* Verify that the web page displays the text "You are visiting Web Server 1" from the index.html file created on PBT-CERT-VM-01.
Step 4: Troubleshoot (if needed)
* If the text is not displayed:
* Check the load balancer health status under Backend Sets>Health in the OCI Console.
* Ensure the security list PBT-CERT-LB-SL-01 allows port 443 and the compute instance security list allows port 80.
* Verify the Apache service is running on PBT-CERT-VM-01 by SSHing in and running sudo systemctl status httpd.

NEW QUESTION # 22
Your organization needs to implement strong password policies for users in OCI.
Which of the following statements is TRUE about password policies in OCI IAM?

- A. The default password policy cannot be modified.
- B. Only one password policy can be applied to all users in a domain.
- C. Simple password policies are suitable for production environments.
- D. Custom password policies allow for granular control over password complexity.

Answer: D

NEW QUESTION # 23
......

The goal of a Oracle 1z0-1104-25 mock exam is to test exam readiness. ActualPDF's online Oracle Cloud Infrastructure 2025 Security Professional 1z0-1104-25 practice test can be accessed online through all major browsers such as Chrome, Firefox, Safari, and Edge. You can also download and install the offline version of Oracle Cloud Infrastructure 2025 Security Professional 1z0-1104-25 Practice Exam software on Windows-based PCs only. You can prepare for the Oracle Cloud Infrastructure 2025 Security Professional exam without an internet connection using the offline version of the mock exam.
