

Practice HPE0-S59 Exam Online, Authentic HPE0-S59 Exam Hub

BONUS!!! Download part of Pass4sures HPE0-S59 dumps for free: https://drive.google.com/open?id=153j0z2xT4aATch4i9lFI0wRck_dYzD3Q

Nowadays passing the test HPE0-S59 certification is extremely significant for you and can bring a lot of benefits to you. Passing the test HPE0-S59 certification does not only prove that you are competent in some area but also can help you enter in the big company and double your wage. Buying our HPE0-S59 Study Materials can help you pass the test easily and successfully. We provide the study materials which are easy to be mastered, professional expert team and first-rate service to make you get an easy and efficient learning and preparation for the HPE0-S59 test.

HP HPE0-S59 (HPE Compute Solutions) certification exam is designed for IT professionals who are looking to validate their skills and knowledge in designing, deploying, and managing HPE compute solutions. HPE0-S59 exam is intended for individuals who have experience in working with HPE servers, storage, and networking technologies.

Passing the HPE0-S59 exam is a great achievement and can open up many new career opportunities. HPE is a leading provider of IT solutions, and having a certification in HPE Compute Solutions can help you stand out in the job market. It can also lead to higher salaries and greater job security. With the right preparation and dedication, you can Pass HPE0-S59 Exam and take your career to the next level.

High Hit Rate Practice HPE0-S59 Exam Online - Win Your HP Certificate with Top Score

Our company has a professional team of experts to write HPE0-S59 preparation materials and will constantly update it to ensure that it is synchronized with the exam content. In addition to the high quality, reasonable price and so on, we have many other reasons to make you choose our HPE0-S59 Actual Exam. There are three versions of our HPE0-S59 exam questions: PDF, Software and APP online which can provide you the varied study experiences.

HPE Compute Solutions Sample Questions (Q85-Q90):

NEW QUESTION # 85

You plan to configure a Link Aggregation Group (LAG) for two connections within a server profile for a compute node running an ESXi system.

What is required from the VMware side to enable LAG?

- A. Virtual Distributed Switch
- B. vSphere Standard license

- C. Load balancing cluster
- **D. Dedicated VMKernel port**

Answer: D

NEW QUESTION # 86

What is a limitation when creating a server profile?

- A. ILO management is limited to the integration with Active Directory or LDAP
- B. It is not possible to create shared volumes on demand through a server profile
- C. Administrator cannot define more than 8 connections within a server profile
- **D. BIOS settings can be changed only when UEFI optimized is selected as boot mode**

Answer: D

Explanation:

A limitation when creating a server profile in HPE OneView is that it is not possible to create shared volumes on demand directly through a server profile. Server profiles in HPE OneView are used to define and manage the configuration of compute nodes, including network connections, BIOS settings, and boot order, but they do not have the capability to dynamically create or manage shared storage volumes.

NEW QUESTION # 87

Your customer wants to add dedicated Fibre Channel connectivity to the HPE Synergy frame running HPE Synergy 480 Gen10 compute modules, each with one CPU socket populated. Currently they use two 12 Gb SAS switches and two HPE Virtual Connect SE 100Gb F32 Modules for HPE Synergy installed in third fabric.

What must be done to enable dedicated FC connectivity for this HPE Synergy frame?

- A. A second CPU must be installed for all HPE Synergy 480 Gen10 compute nodes.
- **B. SAS switches must be moved to second fabric and FC modules installed in the first one.**
- C. For VC-FC modules, all of server-facing ports must be properly licensed.
- D. For Brocade switches, a logical interconnect group must be created in HPE OneView.

Answer: B

NEW QUESTION # 88

Your customer added a new Ethernet network in HPE OneView that is used to manage their HPE Synergy platform.

When the customer tries to connect one of the compute nodes to this network through the server profile, this network is not available.

What must be done to fix this issue?

- **A. The newly created network must be added to the uplink set within the LIG, and Logical interconnect configuration must be updated from the LIG.**
- B. To make this network available to use in the server profile, the customer must enable the Smart Link feature within network definition.
- C. Check within the server profile which server hardware is used and perform the Refresh operation on this compute node to get the latest adapter information.
- D. Check the Logical Enclosure settings and verify if the maximum number of networks allowed for this LE is reached.

Answer: A

Explanation:

When a new Ethernet network is created in HPE OneView and is not available in the server profile, it is typically because the network has not been added to the uplink set within the Logical Interconnect Group (LIG). To resolve this issue, the network must be included in the uplink set configuration, and then the logical interconnect configuration must be updated from the LIG to propagate the changes.

NEW QUESTION # 89

Refer to the exhibit. Which statement about this logical JBOD is true?

Logical JBODs 1

Logical-JBOD Overview

+ Create Logical JBOD

Name	Number of physical drives
Logical -JBOD	1

General >

Description: none

State: Configured

Drive enclosure: CZ204400XB, bay 11

Used by: none

Number of physical drives: 1

Drive technology: SAS HDD

Minimum drive size: 600 GB

Maximum drive size: 600 GB

Erase on delete: Yes

Drives >

Bay	Drive Enclosure	Model	Type	Capaci.
19	CZ204400XB, bay 11	EG000600JWJNH	SAS HDD	600 Gi

- A. This logical JBOD can be presented to the compute nodes in a different frame.
- B. After deleting this logical JBOD drives will be blocked for 12h in case this JBOD must be re-created
- C. After deleting this logical JBOD, its drives will not be available until a clean-up procedure is done
- D. This logical JBOD can be connected to multiple systems to formulate a shared datastore.

Answer: A

Explanation:

In HPE Synergy, logical JBODs (Just a Bunch of Disks) can be configured to be accessible by compute nodes across different frames. This flexibility allows for the logical JBOD to be presented to compute nodes that are not in the same frame as the storage module, facilitating better resource utilization and workload management.

NEW QUESTION # 90

.....

The countless candidates have already passed their HPE0-S59 certification exam and they all used the real, valid, and updated Pass4sures HPE0-S59 exam questions. So, why not, take a decision right now and ace your HPE0-S59 Exam Preparation with top-notch HPE0-S59 exam questions?
