100% Pass Huawei - H31-341_V2.5 - HCIP-Transmission V2.5 Perfect Dumps Reviews

We are pleased to inform you that we have engaged in this business for over ten years with our H31-341_V2.5 exam questions. Because of our past years' experience, we are well qualified to take care of your worried about the H31-341_V2.5 Preparation exam and smooth your process with successful passing results. Our pass rate of the H31-341_V2.5 study materials is high as 98%

to 100% which is unique in the market.

Huawei H31-341_V2.5 (HCIP-Transmission V2.5) Exam is an advanced level certification exam that is designed to test the knowledge and skills of professionals who are involved in the planning, designing, and maintenance of transmission networks. H31-341_V2.5 exam is targeted towards individuals who have already completed the HCNA-Transmission certification and are looking to further enhance their expertise in the field of transmission technology.

Huawei H31-341_V2.5 (HCIP-Transmission V2.5) Certification Exam is an important certification for professionals who want to specialize in the field of transmission technology. HCIP-Transmission V2.5 certification is recognized globally and is highly valued by employers in the industry. H31-341_V2.5 Exam covers various topics related to the design, installation, and maintenance of transmission networks and is a challenging exam that requires a lot of preparation and hard work.

Huawei HCIP-Transmission V2.5 Sample Questions (Q79-Q84):

NEW QUESTION # 79

The functions of MPLS-TP OAM are divided into active OAM and on-demand OAM. Which of the following options belong to active OAM? (Multiple choice)

- A. RDI
- B. CC
- C. AIS
- D. FDI

Answer: A,B,C

NEW QUESTION # 80

Which of the following descriptions about alarms is correct? (Multiple choice)

- A. OTUK-TIM: The OTUK trail identifier (TTI (Trail Trace Identifier)) does not match. During the control process, if the trace identifiers of the remote end and the local end do not match and TIM detection is enabled, this alarm is generated. Compare the API (Access Point identifiers) in the input signal with the expected API.
- B. OTUKAIS: OTUK alarm indication signal, the AIS signal is transmitted downstream, indicating that the signal detected upstream is invalid.
- C. OTUK-LOM: Multiframe alignment signal abnormality alarm, multiframe alignment processing continues in the multiframe out-of-sync (oOM) state for 3ms, and an OTUELOM alarm is generated.
- D. OTUKBD: OTUK backward defect indication alarm. When the signal detected by the SM segment fails, the value of the BDI byte is 1, and this alarm is reported.

Answer: A,B,C,D

NEW QUESTION # 81

For a point-to-point network, set the TIM mode on the network management system to path terminal sink "only compare DAPI".

- A. False
- B. True

Answer: A

NEW QUESTION # 82

The fixed cross-connect in this board does not need to be manually configured, and the U2000 automatically completes the configuration, such as the OTU board LSX.

- A. False
- B. True

Answer: B

Which of the following is the OPUk payload structure identification overhead?

- Answer: A**
