What's more, part of that ValidDumps NCP-US-6.5 dumps now are free: [https://drive.google.com/open?id=1N5wMQMNGimOxEKAm\\_z9qjQvJWy4aj7Ng](https://drive.google.com/open?id=1N5wMQMNGimOxEKAm_z9qjQvJWy4aj7Ng)

For everyone, time is money and life. Are you still hesitant about selecting what kind of NCP-US-6.5 exam materials? We have a high reputation on the career to help our customers pass their exams and get their desired certifications. There is no exaggeration to say that you can pass the NCP-US-6.5 Exam with ease after studying with our NCP-US-6.5 practice guide for 20 to 30 hours. Numerous of the candidates have been benefited from our exam torrent and they obtained the achievements just as they wanted.

If you find you are extra taxed please tell us in time before purchasing our NCP-US-6.5 reliable Study Guide materials. Sometimes the key point is the information tax. Some countries may require buyers to pay extra information tax. How to avoid this tax while purchasing Nutanix NCP-US-6.5 Reliable Study Guide materials? You can choose to pay by PayPal with credit card. PayPal doesn't have extra costs. Here you don't need have a PayPal account; a credit card is the necessity for buying NCP-US-6.5 reliable Study Guide.

## NCP-US-6.5 Frequent Updates | Exam NCP-US-6.5 Duration

Our NCP-US-6.5 exam questions are compiled by experts and approved by the professionals with years of experiences. They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood which makes any learners have no obstacles and our NCP-US-6.5 Guide Torrent is suitable for

anyone. The content is easy to be mastered and has simplified the important information. Our NCP-US-6.5 test torrents convey more important information with less questions and answers and thus make the learning relaxing and efficient.

## Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Identify the steps to deploy Nutanix Files</li> <li>Given a scenario, determine product and sizing parameters</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Configure Nutanix Files with advanced features</li> <li>Determine the appropriate method to ensure data availability</li> <li>recoverability</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Given a scenario, configure shares, buckets, and</li> <li>or Volume Groups</li> <li>Troubleshoot a failed upgrade for Files</li> <li>Objects</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Configure Nutanix Objects</li> <li>Describe how to monitor performance and usage</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Deploy and Upgrade Nutanix Unified Storage</li> <li>Perform upgrades</li> <li>maintenance for Files</li> <li>Objects implementations</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Analyze and Monitor Nutanix Unified Storage</li> <li>Describe the use of Data Lens for data security</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Troubleshoot issues related to Nutanix Objects</li> <li>Troubleshoot issues related to Nutanix Volumes</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Configure and Utilize Nutanix Unified Storage</li> <li>Identify the steps to deploy Nutanix Objects</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Utilize File Analytics for data security</li> <li>Troubleshoot Nutanix Unified Storage</li> <li>Configure Nutanix Volumes</li> </ul>

## Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q105-Q110):

### NEW QUESTION # 105

Which protocols are supported by Files?

- A. SMBv2 SMBv3, NFSv2, NFSv3
- B. SMBv2 SMBv3, NFSv3, NFSv4**
- C. SMBv1. SMBv2, NFSv3, NFSv4
- D. SMBv1. SMBv2, NFSv2, NFSv3

**Answer: B**

Explanation:

The protocols that are supported by Files are SMBv2, SMBv3, NFSv3, and NFSv4. SMB (Server Message Block) is a protocol that allows clients to access files, printers, and other resources on a network. NFS (Network File System) is a protocol that allows clients to access files on a remote server as if they were local. Files supports both SMB and NFS protocols for creating shares and exports that can be accessed by different types of clients. Reference: Nutanix Files Administration Guide, page 31; Nutanix Files Solution Guide, page 6

### NEW QUESTION # 106

A company uses Linux and Windows workstations. The administrator is evaluating solution for their file storage needs.

The solution should support these requirements:

- \* Distributed File System
- \* Active Directory integrated
- \* Scale out architecture

- A. Files
- B. Volumes
- C. Objects
- D. Mine

#### Answer: A

Explanation:

The solution that meets the company's requirements for their file storage needs is Files. Files is a feature that allows users to create and manage file server instances (FSIs) on a Nutanix cluster. FSIs can provide SMB and NFS access to file shares and exports for different types of clients. Files supports these requirements:

- \* Distributed File System: Files uses a distributed file system that spans across multiple FSVMs (File Server VMs), which improves scalability, performance, and availability.
- \* Active Directory integrated: Files can integrate with Active Directory for authentication and authorization of SMB clients and multiprotocol NFS clients.
- \* Scale out architecture: Files can scale out by adding more FSVMs to an existing FSI or creating new FSIs on the same or different clusters. References: Nutanix Files Administration Guide, page 27; Nutanix Files Solution Guide, page 6

### NEW QUESTION # 107

Which two steps are required for enabling Data Lens? (Choose two.)

- A. Add File Services VM admin credentials to a MyNutanix account.
- B. Configure a MyNutanix account to access the Data Lens console.
- C. In Prism, enable Pulse health monitoring.
- D. **Configure the Data Services IP in Prism Central.**

#### Answer: D

Explanation:

The two steps that are required for enabling Data Lens are:

In Prism, enable Pulse health monitoring: Pulse is a feature that collects diagnostic and usage information from Nutanix clusters and services and sends it to Nutanix for analysis and support purposes. Pulse health monitoring is a feature that monitors the health status of Nutanix clusters and services and sends alerts to Nutanix if any issues are detected. To enable Data Lens, Pulse health monitoring must be enabled in Prism Element or Prism Central.

Configure the Data Services IP in Prism Central: Data Services IP is an IP address that is used for communication between Prism Central and Data Lens. Data Services IP must be configured in Prism Central before enabling Data Lens for any file server. Data Services IP must be routable from both Prism Central and Data Lens. Reference: Nutanix Files Administration Guide, page 93; Nutanix Data Lens Deployment Guide

### NEW QUESTION # 108

An administrator is attempting to create a share that will provide user access via SMB and NFS. However, the Enable multiprotocol accounts for NFS clients settings is not available.

What would cause this issue?

- A. The file server instance was only configured with SMB.
- **B. The connection to Active Directory has not been configured.**
- C. NFS configured to use unmanaged authentication.
- D. The incorrect Files license has been applied.

#### Answer: B

#### Explanation:

The cause of this issue is that the connection to Active Directory has not been configured. Active Directory is a service that provides centralized authentication and authorization for Windows-based clients and servers. To create a share that will provide user access via SMB and NFS, the administrator must first configure the connection to Active Directory in the Files Console. This will allow the administrator to enable multiprotocol accounts for NFS clients, which are accounts that map NFS users to SMB users and groups for consistent access control across both protocols. Reference: Nutanix Files Administration Guide, page 32; Nutanix Files Solution Guide, page 6

#### NEW QUESTION # 109

Deploying Files instances require which two minimum resources? (Choose two)

- A. 8 GiB of memory per host
- B. 4 vCPUs per host
- C. 8 vCPUs per host
- D. 12 GiB of memory per host

#### Answer: A,B

#### Explanation:

The two minimum resources that are required for deploying Files instances are 8 GiB of memory per host and 4 vCPUs per host. Memory and vCPUs are resources that are allocated to VMs (Virtual Machines) to run applications and processes. Files instances are file server instances (FSIs) that run on FSVMs (File Server VMs) on a Nutanix cluster. FSVMs require at least 8 GiB of memory and 4 vCPUs per host to function properly and provide SMB and NFS access to file shares and exports. The administrator should ensure that there are enough memory and vCPUs available on each host before deploying Files instances. Reference: Nutanix Files Administration Guide, page 27; Nutanix Files Solution Guide, page 6

#### NEW QUESTION # 110

.....

Do you long to get the NCP-US-6.5 certification to improve your life? Are you worried about how to choose the learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. Our NCP-US-6.5 exam torrent is compiled by professional experts that keep pace with contemporary talent development and makes every learner fit in the needs of the society. If you choose our study materials, you will pass exam successful in a short time. There is no doubt that our NCP-US-6.5 Exam Question can be your first choice for your relevant knowledge accumulation and ability enhancement.
