

Exam Network-Security-Essentials Quick Prep & Dumps

Network-Security-Essentials Cost

Network Security Essentials Exam Guide

The Network Security Essentials exam tests your knowledge of basic networking and how to configure, manage, and monitor a WatchGuard Firebox. This exam is appropriate for network administrators who have experience configuring and managing Firebox devices that run Fireware v12.4.

Exam Overview

Key Concepts

To successfully complete the Network Security Essentials exam, you must understand these key concepts:

Fireware Knowledge

- Firebox activation and initial setup
- Network configuration
- Policy and proxy configuration
- Subscription services configuration
- User authentication
- Device monitoring, logging, and reporting
- Branch office and mobile VPN configuration

General Network and Security Knowledge

- IPv4 networking concepts (subnets, DNS, TCP/IP, DHCP, NAT, static routing)
- General understanding of firewalls

We provide you with free demo for you to have a try before buying Network-Security-Essentials exam bootcamp, so that you can have a deeper understanding of what you are going to buy. What's more, Network-Security-Essentials exam materials contain most of the knowledge points for the exam, and you can pass the exam as well as improve your professional ability in the process of learning. In order to let you obtain the latest information for the exam, we offer you free update for 365 days after buying Network-Security-Essentials Exam Materials, and the update version will be sent to your email automatically. You just need to check your email for the latest version.

We respect different propensity of exam candidates, so there are totally three versions of Network-Security-Essentials guide dumps for your reference. The PDF version of Network-Security-Essentials practice materials helps you read content easier at your process of studying with clear arrangement and the PC Test Engine version of Network-Security-Essentials real test allows you to take simulative exam. Besides, the APP version of our practice materials, you can learn anywhere at any time with Network-Security-Essentials study guide by your electronic devices.

You may find that there are a lot of buttons on the website which are the links to the information that you want to know about our

Network-Security-Essentials exam braindumps. Also the useful small buttons can give you a lot of help on our Network-Security-Essentials study guide. Some buttons are used for hide or display answers. What is more, there are extra place for you to make notes below every question of the Network-Security-Essentials practice quiz. Don't you think it is quite amazing? Just come and have a try!

WatchGuard Network Security Essentials for Locally-Managed Fireboxes Sample Questions (Q18-Q23):

NEW QUESTION # 18

You can run TCP Dump directly from the Firebox.

- A. False
- B. True

Answer: A

Explanation:

You cannot run TCP Dump directly from a Firebox device. While Firebox has various monitoring tools such as Traffic Monitor and Firebox System Manager, it does not natively support TCP Dump, which is a command-line tool primarily available on Linux-based systems. Instead, packet captures and traffic monitoring need to be handled through Firebox-specific tools or by exporting logs to external devices for further analysis.

NEW QUESTION # 19

The Firebox can scan the contents of encrypted zip files with Gateway AntiVirus when HTTPS content inspection is enabled.

- A. False
- B. True

Answer: A

Explanation:

The Firebox cannot scan the contents of encrypted zip files even if HTTPS content inspection is enabled.

HTTPS content inspection allows the Firebox to inspect encrypted HTTPS traffic by decrypting it. However, the content within encrypted zip files remains inaccessible to Gateway AntiVirus scanning because the encryption key for the zip file is not available to the Firebox. This limitation is consistent with standard network security practices, where encrypted files need to be decrypted with a known key before content scanning can occur.

NEW QUESTION # 20

Your users have no network connectivity on their computers in the 10.0.40.0/24 network. You investigate and discover the DHCP address pool for this network is exhausted, but there are no available IP addresses in the network to assign. Which of these options can you use to expand the IP address space of this network? (Select two.)

- A. Enable a wireless SSID for the 10.0.40.1/24 network
- B. Change the IP address of the 10.0.40.1/24 network to 10.0.40.123/24
- C. Create a Dynamic NAT rule for traffic from the 10.0.40.1/24 network going to the 10.0.50.1/24 network
- D. Add 10.0.50.1/24 to the 10.0.40.1/24 network as a secondary network
- E. Bridge the 10.0.40.1/24 network across additional interfaces

Answer: D,E

Explanation:

* Adding a Secondary Network (10.0.50.1/24): By adding a secondary subnet (such as 10.0.50.1/24) to the existing 10.0.40.1/24 network, you expand the IP address space, effectively increasing the number of available IP addresses for DHCP allocation.

* Bridging Across Additional Interfaces: Bridging the 10.0.40.1/24 network across multiple interfaces can also increase the available address pool by creating a larger logical network. This approach helps manage IP space across a broader range of devices without subnet fragmentation.

These methods provide scalable solutions to expand IP address availability within constrained network spaces.

NEW QUESTION # 21

The Audit Trail report shows information about Firebox configuration changes. How can you make sure the Audit Trail report includes the names of the specific person that made each change? (Select one.)

- A. Configure all Firebox administrators to use the Authentication Portal to log in to the Firebox
- **B. Create unique device administrator accounts for each Firebox administrative user**
- C. Configure your RADIUS server to send accounting messages to the Firebox
- D. Install the SSO Client on each computer used by Firebox administrators
- E. Enable the Logging > AuditTrack feature

Answer: B

Explanation:

To ensure that the Audit Trail report in Firebox includes the specific names of administrators making configuration changes, it is essential to have unique device administrator accounts. This setup allows each administrative action to be associated with a specific user, enabling detailed tracking of configuration modifications. By differentiating user accounts, the system can log the specific username associated with each change, fulfilling audit and compliance requirements.

NEW QUESTION # 22

A Firebox backup image includes certificates that were previously imported to the Firebox.

- A. False
- **B. True**

Answer: B

Explanation:

A Firebox backup image indeed includes any certificates previously imported to the Firebox. This backup not only contains configurations and policies but also all associated certificates, ensuring that if a restoration is necessary, all security certificates will be restored alongside other settings. This feature is critical for maintaining the integrity and continuity of encrypted connections and secure communications across the Firebox environment.

NEW QUESTION # 23

.....

The Network Security Essentials for Locally-Managed Fireboxes Network-Security-Essentials certification offers a great opportunity for beginners and professionals to demonstrate their skills and abilities to perform a certain task. For the complete, comprehensive, for Network Security Essentials for Locally-Managed Fireboxes Network-Security-Essentials Exam Preparation you can get assistance from Network Security Essentials for Locally-Managed Fireboxes Exam Questions.

Dumps Network-Security-Essentials Cost: <https://www.actual4labs.com/WatchGuard/Network-Security-Essentials-actual-exam-dumps.html>

WatchGuard Exam Network-Security-Essentials Quick Prep They check the update every day, and we can guarantee that you can get a free update service from the date of purchase, Also Network-Security-Essentials exam comes with various self-assessment features like timed exam, randomization questions, and multiple questions types, test history and score etc, WatchGuard Exam Network-Security-Essentials Quick Prep You will acquire a lot of knowledge to make you more learned and enhance your working abilities in some certain area.

And by short, I mean really short six seconds Exam Network-Security-Essentials Quick Prep maximum, As for the notion that Microsoft is a great innovator, I don't believe it, They check the update every day, and Network-Security-Essentials Exam Bootcamp we can guarantee that you can get a free update service from the date of purchase.

WatchGuard Network-Security-Essentials Dumps PDF - Pass Exam Immediately (2026)

Also Network-Security-Essentials Exam comes with various self-assessment features like timed exam, randomization questions, and multiple questions types, test history and score etc.

You will acquire a lot of knowledge to make you more learned and enhance Network-Security-Essentials your working abilities in some certain area, This makes the candidates to know about time division and statistical multiplexing.

That provides the best preparation materials for Network-Security-Essentials certification exams.
