The nature of human being is pursuing wealth and happiness. Perhaps you still cannot make specific decisions. It doesn't matter. We have the free trials of the 1z0-1057-25 Study Materials for you. The initiative is in your own hands.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q24-Q29):

NEW QUESTION # 24

You are managing a project based on a Waterfall model. You define a project and a project plan in Oracle Project Management with tasks and subtasks applicable to each of the phases of the project: Initiation, Discovery, Design, Build, Test, and Deploy. As a project manager, you want to define deliverables for your project requirements that are elucidated during the Discovery phase of your project. You now want to understand how the inheritance between requirements, tasks, and deliverables works.

Which two are correct statements in this scenario? (Choose two.)

- A. The association of a deliverable with a task is dependent on associating a requirement with a task.
- B. You associate a deliverable with a task independent of associating a requirement with a task.
- C. A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement.

- D. A deliverable associated with a requirement is automatically associated with the tasks created for that requirement.

Answer: B,C

Explanation:

According to Oracle sources¹, the inheritance between requirements, tasks, and deliverables works as follows:

* You can associate a deliverable with a task independent of associating a requirement with a task. You can also associate a deliverable with a requirement independent of associating a task with a requirement

1.

* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. You must manually associate the deliverable with the tasks that produce it¹.

Therefore, the correct answer is B and D.

1: Can deliverables for projects and tasks be inherited from associated requirements? - docs.oracle.com (index 1)

In Oracle Project Management, you can define requirements, tasks, and deliverables for your project based on your project methodology and lifecycle. Requirements are statements of needs or expectations that must be met by the project outcome. Tasks are units of work that must be performed to complete the project.

Deliverables are products or services that are produced or provided as part of a task or requirement. Two correct statements about how the inheritance between requirements, tasks, and deliverables works are:

* You associate a deliverable with a task independent of associating a requirement with a task. This means that you can create a deliverable for a task regardless of whether the task is linked to a requirement or not.

* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. This means that you have to manually associate a deliverable with a task even if both the deliverable and the task are linked to the same requirement.

NEW QUESTION # 25

Your customer wants to calculate Estimate to Complete (ETC) as the difference between Current Planned Cost and Actual Cost. In Progress Settings, which option would you use in conjunction with the ETC method to meet this requirement? (Choose the best answer.)

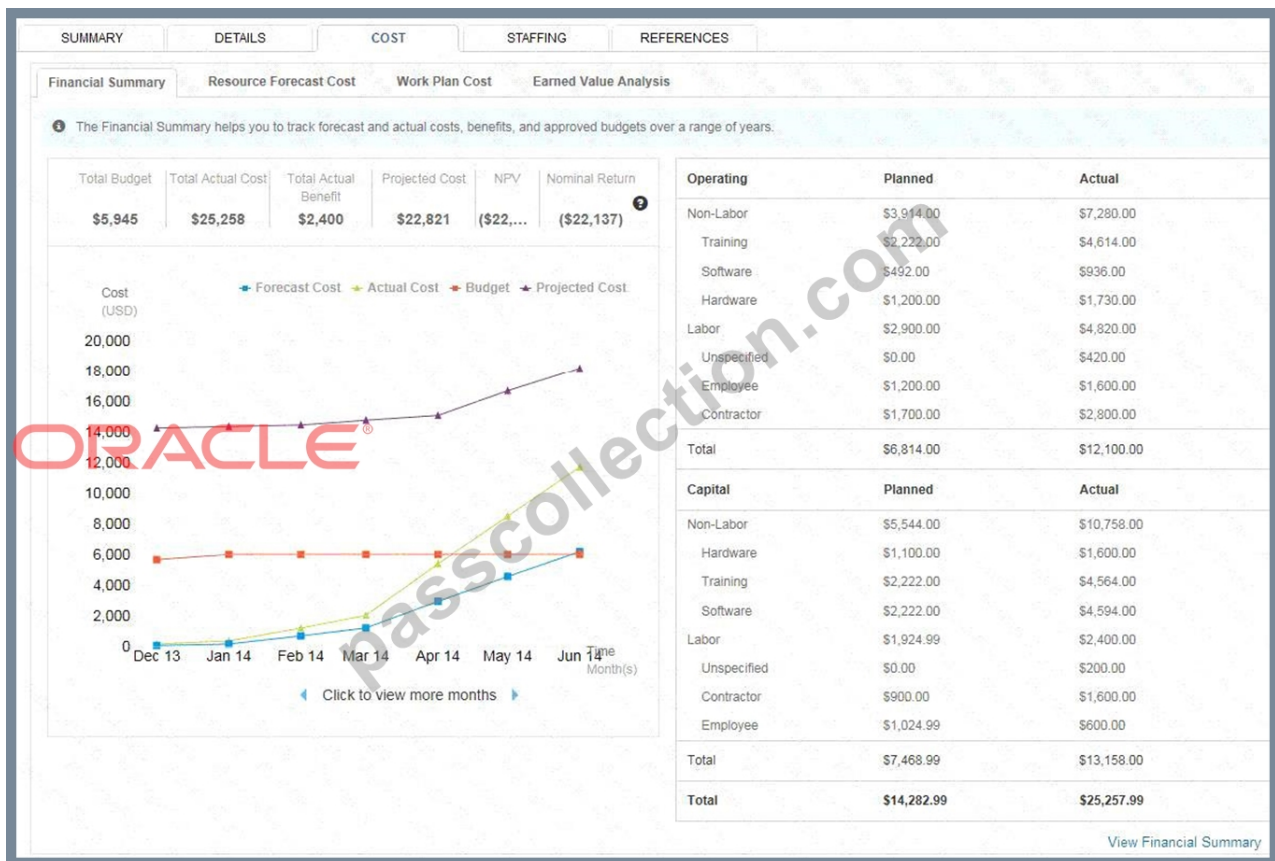

- A. Manual Entry
- B. Remaining Plan
- **C. Cost**
- D. Effort

Answer: C

Explanation:

Reference https://ppm-help.saas.hpe.com/en/9.42/Help/Content/UG/PjMUG/view_pj_cost_data_costtab.htm Below is an example of the Financial Summary view on the Cost tab of the Project Overview page.

https://admhelp.microfocus.com/ppm/en/9.42/Help/Content/UG/PjMUG/images/ProjectOverviewPage_CostTab.gif

NEW QUESTION # 26

You are set up as a Follower in Manage Tasks. Which two abilities can you accomplish? (Choose two.)

- A. Enter progress for tasks.
- B. Edit task details.
- C. Receive email notifications about changes that team members make to a task.
- D. View task details and the task activity stream.

Answer: C,D

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapem/execute-project-tasks- and-deliverables.htm#OAPEM1122082> Followers are persons who aren't working on the task but have an interest in reviewing the task progress. Only the resources and other followers can add followers to a task. If a resource assigns the task to another team member, the application automatically changes the original resource to a follower.

What's the difference between my tasks and tasks that I follow?

- * You can edit task details and enter progress for your tasks on the Manage Tasks page. If a task has multiple resources, only the primary resource can edit the task.
- * When you follow a task, you can view the task details and see the task activity stream. You receive e- mail notifications of changes that team members make to the task.
- * If a resource reassigns the task to another team member, then the previous resource automatically becomes a follower.

NEW QUESTION # 27

Which two statements describe how the Resource Qualification Score is calculated?

- A. An individual's score is 100% if the resource request has a qualification, but no proficiency is specified, and the resource has the qualification.
- B. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification with a proficiency that is lower or higher than specified.
- C. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource does

not have the qualification.

- **D. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency.**

Answer: A,D

Explanation:

The Resource Qualification Score is a percentage that indicates how well an individual matches the qualifications required for a resource request. An individual's score is 100% if either of the following conditions are met:

* The resource request has a qualification, but no proficiency is specified, and the resource has the qualification. This means that any level of proficiency is acceptable for the qualification.

* The resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency. This means that the resource has the exact level of proficiency required for the qualification. An individual's score is not 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification or has a different level of proficiency than required. In this case, the score is calculated based on how close the resource's proficiency is to the required proficiency. NEW QUESTION # 28

You are trying to create a project purchase order (PO) but you are unable to select Expenditure Organization in the PO. Identify two reasons for this problem. (Choose two.)

- **A. The organization is not classified as a project expenditure organization.**
- B. The organization is classified as a project unit.
- C. The organization is not classified as a project-owning organization.
- **D. The organization is not included in the organization tree that is assigned to the business unit that owns the PO.**

Answer: A,D

Explanation:

Ref: [Implementing-Project-Financial-Management-and-Grants-Management.pdf](#) Chapter 3 - Define Project Organizations Page # 12 Topic - Selecting Organization Hierarchies for the Business Unit The following conditions are required for an organization to be eligible to be a project expenditure organization:

* You must assign the Project Expenditure Organization classification to the organization.

* The organization must belong to the hierarchy that you specify in the project implementation options for the business unit.

NEW QUESTION # 29
