More importantly, we will promptly update our 156-315.81 exam materials based on the changes of the times and then send it to you timely. 99% of people who use our learning materials have passed the exam and successfully passed their certificates, which undoubtedly show that the passing rate of our 156-315.81 Test Torrent is 99%.

The Check Point Certified Security Expert R81 exam covers a wide range of topics related to network security, including advanced

firewall configurations, intrusion prevention, VPN solutions, and endpoint security. Candidates are expected to have a deep understanding of Check Point's security technologies and be able to design, implement, and manage complex security solutions.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q326-Q331):

NEW QUESTION # 326

What Is the difference between Updatable Objects and Dynamic Objects

- A. Dynamic Objects are maintained automatically by the Threat Cloud. For Dynamic Objects there is no need to install policy for the changes to take effect. Updatable Objects are created and maintained locally.
- **B. Updatable Objects is a Threat Cloud Service. The provided Objects are updated automatically. Dynamic Objects are created and maintained locally For Dynamic Objects there is no need to install policy for the changes to take effect.**
- C. Updatable Objects is a Threat Cloud Service. The provided Objects are updated automatically. Dynamic Objects are created and maintained locally In both cases there is no need to install policy for the changes to take effect.
- D. Dynamic Objects are maintained automatically by the Threat Cloud. Updatable Objects are created and maintained locally. In both cases there is no need to install policy for the changes to take effect.

Answer: B

NEW QUESTION # 327

You want to gather data and analyze threats to your mobile device. It has to be a lightweight app. Which application would you use?

- A. Check Point Capsule Cloud
- **B. Sandblast Mobile Protect**
- C. SecuRemote
- D. SmartEvent Client Info

Answer: B

Explanation:

SandBlast Mobile Protect is a lightweight app for iOS and Android™ that gathers data and helps analyze threats to devices in your environment.

NEW QUESTION # 328

How many interfaces can you configure to use the Multi-Queue feature?

- **A. 5 interfaces**
- B. 3 interfaces
- C. 10 interfaces
- D. 4 interfaces

Answer: A

Explanation:

How many interfaces can you configure to use the Multi-Queue feature? You can configure up to 5 interfaces to use the Multi-Queue feature. Multi-Queue is a performance enhancement feature that allows distributing the network traffic among multiple CPU cores, instead of using a single core for all traffic. Multi-Queue can be enabled on interfaces that have high traffic load and support multiple receive/transmit queues. Multi-Queue can be configured via SmartConsole or via CLI with the command `sim affinity -m`.

NEW QUESTION # 329

Which one of the following is true about Threat Emulation?

- A. Works on MS Office and PDF files only
- B. Always delivers a file

- C. Takes minutes to complete (less than 3 minutes)
- D. Takes less than a second to complete

Answer: C

Explanation:

Threat Emulation is a software blade that takes minutes to complete (less than 3 minutes). Threat Emulation analyzes files for malicious behavior by running them in a virtual sandbox. Threat Emulation works on MS Office, PDF, executables, and archive files. Threat Emulation does not always deliver a file, but only if no threats are found or if the user chooses to download the original file after seeing a warning message. NEW QUESTION # 330

In R81 spoofing is defined as a method of:

- A. Disguising an illegal IP address behind an authorized IP address through Port Address Translation.
- B. Detecting people using false or wrong authentication logins
- C. Making packets appear as if they come from an authorized IP address.
- D. Hiding your firewall from unauthorized users.

Answer: C

Explanation:

In R81, spoofing is defined as a method of making packets appear as if they come from an authorized IP address. Spoofing can be used by attackers to bypass security policies or hide their identity. Check Point firewalls use anti-spoofing mechanisms to prevent spoofed packets from entering or leaving the network. Reference: Security Gateway R81 Administration Guide:

NEW QUESTION # 331

.....
