SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Financial Accounting Sample Questions (Q77-Q82):

NEW QUESTION # 77

You are recording actions for custom process steps in a test automate. When do you press the "Read" button on the recording panel?

Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later
- B. To capture a value in a text field that should be stored as a variable
- C. To capture a static label on the screen that should be checked during test execution
- D. To capture text in a message screen that can be used for data binding later

Answer: B,C

Explanation:

Comprehensive and Detailed in Depth Explanation:

In SAP S/4HANA Cloud's Test Automation Tool (available via SAP Cloud ALM), the "Read" button is used during test script recording to capture screen elements for validation or variable assignment during automated test execution.

* Option A (To capture a static label on the screen that should be checked during test execution):

Correct. Static labels (e.g., field names or titles) are often captured to verify UI consistency or screen navigation during test runs. This ensures the test validates expected screen content.

* Option B (To capture a value in a text field that should be stored as a variable): Correct. The

"Read" function can extract dynamic values (e.g., an invoice number) from text fields, storing them as variables for use in subsequent steps, such as validations or inputs.

* Option C (To capture an error message on the screen that can be used later): Incorrect. While error messages can be validated, the "Read" button is not typically used for this; instead, assertions or specific error-handling steps are recorded separately.

* Option D (To capture text in a message screen that can be used for data binding later): Incorrect.

Message screens (e.g., pop-ups) are handled differently, often via specific actions like "Confirm" or "Check Message," not the generic "Read" function.

NEW QUESTION # 78

A fixed asset you ordered is delivered but is not activated. What could be the reason?

- A. The asset is only activated upon payment. It is a valuated goods receipt.
- B. The asset accountant did not enter the activation date in the asset master record
- **C. The asset is only activated with the invoice. It is a non-valuated goods receipt**
- D. The asset is only activated with the invoice. It is a valuated goods receipt.

Answer: C

NEW QUESTION # 79

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition?

Note: There are 2 correct answers to this question.

- A. Communication interface
- B. Communication API
- **C. Communication arrangement**
- **D. Communication system**

Answer: C,D

Explanation:

Comprehensive and Detailed in Depth Explanation:

Integration in SAP S/4HANA Cloud requires communication setup.

* A: Correct. Defines the external system.

* B: Correct. Links the system to a scenario.

NEW QUESTION # 80

What have SAP S/4HANA Cloud Business Workflows been designed for?

Note: There are 3 correct answers to this question.

- **A. To create cross-product workflow procedures**
- **B. To create business processes with a high number of people involved in a predefined sequence**
- **C. To create very simple release or approval procedures**
- D. To create standard procedures from SAP Signavio Process Navigator
- E. To create complex, repeated work processes with interactive cycles

Answer: A,B,C

Explanation:

Comprehensive and Detailed in Depth Explanation:

SAP workflows in S/4HANA Cloud support diverse scenarios.

A: Correct. Handles multi-user processes.

B: Correct. Simplifies approvals.

C: Correct. Enables cross-product integration.

D, E: Incorrect. Complex cycles and Signavio are not primary focuses.

NEW QUESTION # 81

On which level do you define maximum amounts for low-value assets?

Note: There are 2 correct answers to this question.

- A. Accounting principle
- **B. Valuation area**
- C. Ledger group
- **D. Company code**

Answer: B,D

Explanation:

Comprehensive and Detailed in Depth Explanation:

Low-value asset (LVA) thresholds in SAP S/4HANA Cloud are set at levels affecting depreciation and valuation.

A: Correct. Valuation area defines LVA limits for depreciation rules.

D: Correct. Company code sets organizational LVA thresholds.

B, C: Incorrect. Ledger group and accounting principle do not directly define LVA amounts.

NEW QUESTION # 82

.....
