UiPath UiPath-ABAv1 Pdf Version - UiPath-ABAv1 Valid Examcollection

Our UiPath UiPath-ABAv1 exam questions are designed to provide you with the most realistic UiPath-ABAv1 Exam experience possible. Each question is accompanied by an accurate answer, prepared by our team of experts. We also offer free UiPath UiPath-ABAv1 Exam Questions updates for 1 year after purchase, as well as a free UiPath-ABAv1 practice exam questions demo before purchase.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q107-Q112):

NEW QUESTION # 107
According to UiPath's best practices, when should the test scenarios and test cases be created?

- A. During the Prepare RPA phase
- B. When preparing the test data
- C. During the Test RPA phase
- D. During the Solution Design phase

Answer: D

Explanation:
According to UiPath's best practices, test scenarios and test cases should be created during the Solution Design phase. This is crucial because it allows the design team to plan and prepare for various testing scenarios that can validate the automation's functionality and efficiency before moving into development and deployment.
Reference: UiPath Documentation on Solution Design at https://docs.uipath.com/.

NEW QUESTION # 108

Can we configure non-working days in UiPath Orchestrator?

- A. Yes, they can be set up in the Triggers page.
- B. Yes, they can be configured in the Settings page.
- C. No, they are automatically determined by the system.
- D. No, they are determined based on the individual Robot's schedules.

Answer: A

Explanation:
Configuring Non-Working Days in UiPath Orchestrator:
UiPath Orchestrator allows you to define non-working days on the Triggers page. This ensures that triggers for automations are not executed on days marked as non-working, maintaining compliance with scheduling requirements.
Why Option A is Correct:
The Triggers page provides the functionality to set up schedules, including defining specific days when automations should not run.
Why Other Options Are Incorrect:
Option B: Non-working days are not determined automatically.
Option C: Individual robot schedules do not dictate global non-working days.
Option D: Non-working days cannot be configured in the Settings page.

NEW QUESTION # 109
What is same-screen detection for actions recorded in an UiPath Task Capture diagram?

- A. Prior to starting the capture process, Task Capture analyzes the applications used and groups them by similarity of appearance, so that during the recording the screenshots will be automatically grouped
- B. During the capture process Task Capture automatically detects actions that contain similar screenshots and also merges them
- C. After finishing the capture process. Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The merge is automatic, thus making the process fast and efficient
- D. After finishing the capture process. Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The actions can also be manually reviewed prior to merging

Answer: D

Explanation:
In an UiPath Task Capture diagram, same-screen detection for actions recorded is described by the feature where after finishing the capture process, Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The actions can also be manually reviewed prior to merging. This feature ensures that similar actions are grouped, enhancing the clarity and efficiency of the process documentation.
UiPath Documentation on Task Capture at https://docs.uipath.com/.

NEW QUESTION # 110
Which of the following principles applies during the Process Documentation stage?

- A. Including more scenarios and business rules should be done after the first review
- B. High-level process map should be created only after the To-Be process map is done
- C. Sign-Off is not mandatory if the feedback was implemented after review.
- D. A minimum of one review is required

Answer: D

Explanation:
During the Process Documentation stage, it is a best practice and often a requirement to have at least one review of the documentation created, such as the Process Design Document (PDD). This ensures that all stakeholders agree on the process as documented and that it accurately represents the business needs and technical requirements.
UiPath Documentation on Process Documentation at https://docs.uipath.com/.

NEW QUESTION # 111

For what kind of documents is the ML approach recommended'?

- A. Structured or semi-structured documents in which layouts of different documents are exactly the same
- B. Unstructured or fixed-form documents in which layouts of different documents vary greatly
- C. Unstructured or semi-structured documents in which layouts of different documents vary greatly
- D. Unstructured or fixed-form documents in which layouts of different documents are exactly the same

Answer: C

Explanation:
The Machine Learning (ML) approach in UiPath Document Understanding is particularly recommended for dealing with unstructured or semi-structured documents where the layouts vary significantly between different document providers. The ML models are designed to learn and infer values for targeted fields, even from documents with layouts they have not encountered before. This makes the ML approach suitable for scenarios where documents do not follow a consistent text or layout pattern1.

NEW QUESTION # 112
.....

By our three versions of UiPath-ABAv1 study engine: the PDF, Software and APP online, we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of UiPath-ABAv1 Practice Questions allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of UiPath-ABAv1 study engine, you can learn anywhere at any time.
