CLO-002 Exam Resources & CLO-002 Actual Questions & CLO-002 Exam Guide

Our CLO-002 exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some unless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our CLO-002 Guide Torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our study materials no worries. The CLO-002 exam prep we provide can help you realize your dream to pass exam and then own a CLO-002 exam torrent.

CompTIA CLO-002 (CompTIA Cloud Essentials+ Certification) exam is an entry-level certification that is designed to validate an individual's understanding of the fundamental concepts of cloud computing. It covers various topics related to cloud computing, including cloud computing concepts, architecture, design principles, security, and compliance. By passing the exam, individuals can demonstrate their knowledge of cloud computing and gain a basic understanding of the benefits it can offer.

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q614-Q619):

NEW QUESTION # 614
A company is using an Internet-based cloud service provided by a third party. Which of the following can the third party NOT guarantee when providing cloud resources?

- A. Network path
- B. Cost
- C. Capacity
- D. Scalability

Answer: B

NEW QUESTION # 615
Which of the following early examples of cloud computing was used for software engineering purposes in the form of web-based applications and required interoperability between different systems?

- A. Service-Oriented Architecture (SOA)
- B. Distributed Computing
- C. Desktop Virtualization
- D. Virtual Private Networks (VPNs)

Answer: A

NEW QUESTION # 616
Which of the following are the main advantages of using ML/AI for data analytics in the cloud as opposed to on premises? (Choose two.)

- A. A pay-as-you-go approach allows the company to save money.
- B. ML enables DevOps to build applications easier and faster.
- C. AI enables DevOps to build applications easier and faster.
- D. The shared responsibility model offers greater security.
- E. Elasticity allows access to a large pool of compute resources.
- F. Cloud providers offer enhanced technical support.

Answer: A,E

NEW QUESTION # 617
Which of the following would BEST provide access to a Windows VDI?

- A. SSH
- B. RDP
- C. VPN
- D. HTTPS

Answer: B

NEW QUESTION # 618
Which of the following risks can an organization transfer by adopting the cloud?

- A. Data loss due to incomplete backup sets
- B. Data sovereignty due to geo-redundancy
- C. Data breach due to a break-in at the facility
- D. Data misclassification due to human error

Answer: C

Explanation:
One of the risks that an organization can transfer by adopting the cloud is data breach due to a break-in at the facility. This is because the cloud service provider (CSP) is responsible for the physical security of the data center where the data is stored and processed. The CSP should have adequate measures to prevent unauthorized access, theft, or damage to the hardware and infrastructure. By outsourcing the data storage and processing to the CSP, the organization transfers the risk of physical breach to the CSP. However, the organization still retains the risk of data breach due to other factors, such as network attacks, misconfiguration, or human error. Therefore, the organization should also implement appropriate controls to protect the data in transit and at rest, such as encryption, authentication, and monitoring.
