If you are interested in Soft test engine of AZ-500 practice questions, you should know below information better. Soft test engine should be downloaded in personal computer first time online, and then install. After installment you can use AZ-500 practice questions offline. You can also copy to other electronic products such as Phone, Ipad. On the hand, our exam questions can be used on more than 200 personal computers. If you purchase Soft test engine of AZ-500 Practice Questions for your companies, it will be very useful.

Microsoft AZ-500 (Microsoft Azure Security Technologies) Exam is a certification exam for individuals who want to demonstrate their expertise in securing and managing Microsoft Azure resources and services. AZ-500 exam is designed for professionals who are responsible for implementing security controls, managing identity and access, and protecting data, applications, and networks in Microsoft Azure. AZ-500 Exam measures the candidate's knowledge and skills in various security domains, including network security, identity and access management, platform protection, data and application protection, and security operations.

Valid AZ-500 Dumps Demo | Exam AZ-500 Reviews

When candidates decide to pass the AZ-500 exam, the first thing that comes to mind is to look for a study material to prepare for their exam. The most people will consider that choose AZ-500 question torrent, because it has now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the AZ-500 Exam, and got their own dream industry certificates. AZ-500 exam prep has an extensive coverage of test subjects, a large volume of test questions, and an online update program.

To pass the AZ-500 Exam, you need to have a good understanding of Azure security concepts and be familiar with the Azure portal, PowerShell, and Azure CLI. You should also be able to implement security controls and solutions using Azure Security Center, Azure Active Directory, and Azure Information Protection.

Microsoft Azure Security Technologies Sample Questions (Q351-Q356):

NEW QUESTION # 351

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1	Global administrator
Admin2	Group administrator
Admin3	User administrator

Contoso.com contains a group naming policy. The policy has a custom blocked word list rule that includes the word Contoso. Which users can create a group named Contoso Sales in contoso.com? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can create a security group named Contoso Sales:

Users who can create an Office 365 group named Contoso Sales:

Microsoft

Answer:

Explanation:

Users who can create a security group named Contoso Sales:

Users who can create an Office 365 group named Contoso Sales:

Microsoft

NEW QUESTION # 352

You have an Azure subscription named Sub1 that contains the Azure key vaults shown in the following table.

Name	Region	Resource group
Vault1	West Europe	RG1
Vault2	East US	RG1
Vault3	West Europe	RG2
Vault4	East US	RG2

In Sub1, you create a virtual machine that has the following configurations:

- * Name: VM1
- * Size: DS2v2
- * Resource group: RG1
- * Region: West Europe
- * Operating system: Windows Server 2016

You plan to enable Azure Disk Encryption on VM1.

In which key vaults can you store the encryption key for VM1?

- A. Vault1 only
- B. Vault1 or Vault3 only

- C. Vault1 or Vault2 only
- D. Vault1, Vault2, Vault3, or Vault4

Answer: C

NEW QUESTION # 353

You have an Azure subscription that contains an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Subscription role	Azure AD user role
User1	Owner	None
User2	Contributor	None
User3	Security Admin	None
User4	None	Service administrator

You create a resource group named RG1.

Which users can modify the permissions for RG1 and which users can create virtual networks in RG1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can modify the permissions for RG1:

User1 only
User1 and User2 only
User1 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Users who can create virtual networks in RG1:

User1 only
User1 and User2 only
User1 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Answer:

Explanation:

Users who can modify the permissions for RG1:

- User1 only
- User1 and User2 only
- User1 and User3 only
- User1, User2 and User3 only
- User1, User2, User3, and User4

Users who can create virtual networks in RG1:

- User1 only
- User1 and User2 only
- User1 and User3 only
- User1, User2 and User3 only
- User1, User2, User3, and User4

Explanation

Users who can modify the permissions for RG1:

- User1 only
- User1 and User2 only
- User1 and User3 only
- User1, User2 and User3 only
- User1, User2, User3, and User4

Users who can create virtual networks in RG1:

- User1 only
- User1 and User2 only
- User1 and User3 only
- User1, User2 and User3 only
- User1, User2, User3, and User4

Box 1: Only an owner can change permissions on resources.

Box 2: A Contributor can create/modify/delete anything in the subscription but cannot change permissions.

NEW QUESTION # 354

You have an Azure Active Directory (Azure AD) tenant that contains two users named User1 and User2 and a registered app named App1.

You create an app-specific role named Role1.

You need to assign Role1 to User1 and enable User2 to request access to App1.

Which two settings should you modify? To answer select the appropriate settings in the answer area NOTE: Each correct selection is worth one part.

Answer:

Explanation:

NEW QUESTION # 355

You have an Azure subscription that is linked to an Azure AD tenant and contains the resources shown in the following table.

Name	Location	Description
Group1	Not applicable	Dynamic device security group in Azure AD
Managed1	East US	Managed identity
VM1	West US	Virtual machine that has a system-assigned managed identity
VM2	Central US	Virtual machine
App1	Not applicable	Enterprise application in Azure AD

Which resources can be assigned the Contributor role for VM1?

- A. Managed1 and App1 only
- B. Group1 and Managed1 only
- C. Group1, Managed1, VM1. and App1 only
- D. Group1, Managed1, and VM2only

Answer: A
