

# UiPath - Latest UiPath-ADAv1 New Dumps Sheet

P.S. Free 2026 UiPath UiPath-ADAv1 dumps are available on Google Drive shared by SureTorrent:  
<https://drive.google.com/open?id=1NSdw8EiNl-keXFGpvV-GRU9brPTdx00C>

Our company sells three kinds of UiPath-ADAv1 guide torrent online whose contents are definitely same as each other, including questions and answers. The only distinct thing is that they have different ways to use. The PDF format of UiPath-ADAv1 exam torrent is easy to download, prints, and browse learning, which can be printed on paper and can make notes anytime. You can learn anywhere, repeated practice, and use in unlimited number of times. SOFT/PC test engine of UiPath-ADAv1 exam applies to Windows system computers. It can simulate the real operation test environment. The number of Download and install are unlimited. The number of computers of using UiPath-ADAv1 Questions torrent is unlimited too. App/online test engine of the UiPath-ADAv1 guide torrent is designed based on a Web browser, as long as a browser device is available. It has the functions of simulating examination, limited-timed examination and online error correcting.

The pass rate is 98.65% for UiPath-ADAv1 learning materials, and we have gained popularity in the international market due to the high pass rate. We also pass guarantee and money back guarantee if you buy UiPath-ADAv1 exam dumps. We will give the refund to your payment account. What's more, we use international recognition third party for the payment of UiPath-ADAv1 Learning Materials, therefore your money and account safety can be guaranteed, and you can just buying the UiPath-ADAv1 exam dumps with ease.

## Latest Upload UiPath-ADAv1 New Dumps Sheet - UiPath Latest UiPath Automation Developer Associate v1 Exam Exam Format

If you don't professional fundamentals, you should choose our UiPath UiPath-ADAv1 new exam simulator online rather than study difficultly and inefficiently. Learning method is more important than learning progress when your goal is obtaining certification. For IT busy workers, to buy UiPath-ADAv1 new exam simulator online not only will be a high efficient and time-saving method for most candidates but also the highest passing-rate method.

### UiPath UiPath-ADAv1 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> <li>• Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Data Manipulation: This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through Data Tables.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Studio Interface: Here, the topic guides users through installing Studio Community Edition and connecting to Orchestrator. It covers profile differences, backstage view options, compatibility modes, and package management. Additionally, it offers an in-depth exploration of the Studio interface and its various elements.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Email Automation: This topic covers retrieving emails via IMAP</li> <li>• POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• UI Automation: Here, the topic explains how UI Automation works and offer guidance on using the Modern Recorder and associated activities. It also covers UI synchronization and the configuration of static and dynamic descriptors.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Variables and Arguments: This topic introduces data types and delves into creating, managing, and utilizing variables, arguments, and global constants</li> <li>• variables. It also clarifies the distinctions between these concepts, ensuring a comprehensive understanding of data handling in automation projects.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Business Knowledge: This topic covers the fundamental concepts of business process automation, highlighting its value proposition. It also explores key ideas related to business processes, offering a comprehensive understanding of this domain.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Debugging: Here, we explore various debugging techniques, including debug modes, actions, and ribbon options. It also guides users through setting breakpoints, utilizing debugging panels, and optimizing performance with profile execution.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• Workflow Analyzer: Here, the topic introduces the Workflow Analyzer tool, explaining its use for project analysis and validation, and providing guidance on configuring its settings.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• PDF Automation: The section focuses on data extraction from native and scanned PDFs, including single and multiple document scenarios.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• Excel Automation: The section delves into Excel Automation, showcasing the use of modern Excel activities and workbook-level operations.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• Logging: The section provides insights into interpreting robot execution logs and adhering to logging best practices, ensuring effective issue identification and resolution.</li> </ul>

## UiPath Automation Developer Associate v1 Exam Sample Questions (Q216-Q221):

### NEW QUESTION # 216

A developer designed an automation to use an Asset value from Orchestrator using the Get Asset activity. The value represents email addresses of the process owners which may change.

Which Asset Type should be used?

- A. Text
- B. Integer
- C. Credential
- D. Bool

**Answer: A**

Explanation:  
Explanation

The Asset Type that should be used for storing email addresses of the process owners is Text. Text assets are used to store only string values, such as names, addresses, URLs, etc. Text assets can be easily retrieved and updated using the Get Asset and Set Asset activities in UiPath Studio. Text assets are suitable for storing email addresses, as they can contain alphanumeric characters, symbols, and special characters. Text assets can also be used in various activities that require string input or output, such as Send Email, Write Line, Assign, etc.

### NEW QUESTION # 217

What is the main purpose of using the App/Web Recorder during automation development?

- A. To test and optimize the execution speed of automation workflows across various environments.
- B. To automatically generate workflow elements for UI interactions by recording actions in an application or web page.
- C. To design and debug complex workflows using dynamic components.
- D. To create custom reusable components within UiPath Studio for future use in different projects.

**Answer: B**

Explanation:

The App/Web Recorder in UiPath is a powerful automation tool used to record user interactions with applications or web pages. It simplifies the automation development process by automatically generating UI- based activities.

Why is C Correct?

# App/Web Recorder is primarily used to:

\* Capture user interactions with applications and web pages.

\* Automatically generate UI automation activities (e.g, Click, Type Into, Select Item).

\* Speed up development by eliminating manual workflow design.

# UiPath Official Documentation - App/Web Recorder# UiPath Best Practices - Using Recorders

### NEW QUESTION # 218

A developer indicated a UI element for a Get Text activity. The automatically-generated selector is shown below.

```
<html app=, chrome.exe, title='temperature now1' />
```

```
<webctrl tag='table' class=, ui_side_menu' innertext='19°C 66°F' />
```

Based on best practices, which selector attribute is unreliable?

- A. innertext
- B. tag
- C. title
- D. class

**Answer: A**

Explanation:

Based on best practices, the selector attribute that is unreliable is innertext. The innertext attribute is the text content of a UI element, such as a table, a button, or a label. The innertext attribute is unreliable because it can change dynamically depending on the data or the state of the UI element. For example, the innertext attribute of a table can change when the table is updated with new values, or the innertext attribute of a button can change when the button is clicked or disabled. Using the innertext attribute in a selector can cause the selector to fail or to identify the wrong UI element if the text content is different from the expected value<sup>1</sup>. Therefore, the innertext attribute should be avoided or replaced with a more reliable attribute, such as tag, class, or title.

The tag attribute is the name of the HTML element, such as table, button, or input. The tag attribute is reliable because it does not change unless the UI element is replaced with a different element. The class attribute is the name of the CSS class that defines the style or the behavior of the UI element, such as ui\_side\_menu, btn-primary, or form-control. The class attribute is reliable because it does not change unless the UI element is styled or modified differently. The title attribute is the text that appears when the mouse pointer is hovered over the UI element, such as temperature now, submit, or username. The title attribute is reliable because it does not change unless the UI element is renamed or removed<sup>2</sup>.

### NEW QUESTION # 219

Upon extracting data from a website, a developer saves it in three variables: "FirstName", "LastName", and "City". The developer intends to store these three String variables in a fixed-size data structure called "UserData", to be utilized later within another workflow in the process.

Considering best practices, which data structure and assignment should be used?

- A. UserData is of type List<String>  
UserData = New List(Of String) ( { FirstName, LastName, City } )
- B. UserData is of type Object[]  
UserData = {FirstName, LastName, City}
- C. UserData is of type List<Object>  
UserData = New List(Of Object) ( { FirstName, LastName, City } )
- **D. UserData is of type String[]**  
UserData = {FirstName, LastName, City}

**Answer: D**

Explanation:

Explanation

This is the best option because it meets the requirements of storing three String variables in a fixed-size data structure. A String[] is an array of String values, which can be initialized with a fixed size and assigned with a set of values using curly braces. An array is a simple and efficient data structure that can store multiple values of the same type and access them by index. A List is another data structure that can store multiple values, but it is not fixed-size and it requires creating a new instance using the New keyword. An Object is a generic type that can store any kind of value, but it is not recommended to use it for specific types like String, as it may cause type conversion errors or performance issues. Therefore, option D is the best choice for storing the three String variables in a fixed-size data structure called UserData. References: Variables, Arguments, and Control Flow in Studio, Data Types in UiPath, Arrays in UiPath

### NEW QUESTION # 220

A developer needs to create an array of folder names from the String variable. FilePath = "C:

\\Users\\UiPathRobot\\Documents\\Technologies". Based on best practice, which method will return an array of only the folder names?

- A. SplitV, FilePath, StringSplitOptions.RemoveEmptyEntries)
- **B. Spht(FilePath, "\": StngSplitOptions.RemoveEmptyEntries)**
- C. Split(FilePath/V)
- D. SplitV', FilePath)

**Answer: B**

Explanation:

To create an array of folder names from the String variable FilePath, the method that will return an array of only the folder names is:

Split(filePath, "").StringSplitOptions.RemoveEmptyEntries

This method uses the String.Split method, which returns an array of strings that are separated by a specified delimiter. The delimiter in this case is the backslash character ("\") which is used to separate the folder names in the file path. The StringSplitOptions.RemoveEmptyEntries option is used to remove any empty entries from the resulting array, such as the one before the first backslash or after the last backslash. For example, if the filePath variable has the value:

```
filePath = "C:\Users\UiPathRobot\Documents\Technologies"
```

Then the method Split(filePath, "").StringSplitOptions.RemoveEmptyEntries will return an array of four strings:

```
{"C", "Users", "UiPathRobot", "Documents", "Technologies"}
```

These are the folder names in the file path, without any empty entries.

## NEW QUESTION # 221

.....

We abandon all obsolete questions in this latest UiPath-ADAv1 exam torrent and compile only what matters toward actual real exam. Without voluminous content to remember, our UiPath-ADAv1 quiz torrent contains what you need to know and what the exam will test. So the content of our UiPath-ADAv1 quiz torrent is imbued with useful exam questions easily appear in the real condition. We are still moderately developing our latest UiPath-ADAv1 Exam Torrent all the time to help you cope with difficulties. All exam candidates make overt progress after using our UiPath-ADAv1 quiz torrent. By devoting ourselves to providing high-quality practice materials to our customers all these years, we can guarantee all content are the essential part to practice and remember. Stop dithering and make up your mind at once, UiPath-ADAv1 test prep will not let you down.
