New Sharing-and-Visibility-Architect Exam Simulator | Test Sharing-and-Visibility-Architect Lab Questions

Our services before, during and after the clients use our Sharing-and-Visibility-Architect study materials are considerate. Before the purchase, the clients can download and try out our Sharing-and-Visibility-Architect study materials freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our Sharing-and-Visibility-Architect Study Materials if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

To become a Salesforce Certified Sharing and Visibility Architect, candidates must pass a rigorous exam that tests their knowledge and skills in designing and implementing sharing and visibility solutions in Salesforce. Sharing-and-Visibility-Architect Exam is designed to assess a candidate's ability to design and implement complex sharing rules, sharing sets, manual sharing, and other sharing and visibility features. Additionally, candidates must demonstrate their ability to design and implement custom security solutions, including field-level security, record-level security, and role hierarchy. Salesforce Certified Sharing and Visibility Architect certification is ideal for professionals who work as Salesforce architects, developers, or consultants, as well as those who are responsible for designing and implementing Salesforce solutions for their organizations.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q25-Q30):

NEW QUESTION # 25

Universal Containers has implemented a strict software architecture for their custom Apex code. One of the requirements is that all SOQL queries are contained within reusable classes. Depending on the context of the Apex transaction, the queries should be able to run either "With Sharing" or "Without Sharing". Which two ways allow the Architect to meet these requirements?

Choose 2 answers.

- A. Create a SystemSOQLQueries class and a UserSOQLQueries class; set the "With Sharing" keyword on the User SOQLQueries class and "Without Sharing" on the SystemSOQLQueries class.
- B. Create a reusable SOQLQueries class; do not specify "With" or "Without Sharing" on the SOQLQueries class and use the runAs() method to dynamically set the context.
- C. Create a reusable SOQLQueries class; specify "With Sharing" on the methods that require user context and "Without Sharing" on the methods requiring system context.
- D. Create a reusable SOQLQueries class; do not specify "With" or "Without Sharing" on the SOQLQueries class.

Answer: C,D

Explanation:

Explanation

Creating a reusable SOQLQueries class without specifying "With" or "Without Sharing" on the class or specifying "With Sharing" or "Without Sharing" on the methods are two ways to meet the requirements. The sharing mode of the class or method will depend on the context of the calling code, which can be either "With Sharing" or "Without Sharing". Option B is incorrect because the runAs() method is only available in test methods and does not change the sharing mode. Option D is incorrect because it requires creating two separate classes for different sharing modes, which is not reusable.

NEW QUESTION # 26

Universal Containers (UC) operates worldwide with offices in more than 100 regions in 10 different countries role hierarchy to control data visibility. In the new fiscal year, UC is planned to reorganize the roles and reassign accounts owners. Which two points should an architect consider in this situation?

Which two point should an Architect consider in this situation?

Choose 2 answers

- A. Replacing Account records ownerships massively can cause data skew.
- B. Using a temporary parking lot account to improve performance.
- C. Restricting the organization-sharing configurations to private.
- D. Changing complex role hierarchy can cause a high level of sharing recalculation.

Answer: A,D

NEW QUESTION # 27

In order to allow community users to collaborate on Opportunities, which license type must the users be given?

- A. Customer Community Plus
- B. Customer Community
- C. Partner Community

Answer: C

Explanation:

To enable community users to collaborate on Opportunities, they must have access to the Opportunity object, which is included in the Partner Community license. This license type is specifically designed for partners and provides access to features like Opportunities, Campaigns, Leads, and other standard objects required for collaborative sales processes.

* Option A: Customer Community Plus licenses do not grant access to Opportunities, as they are primarily focused on external customer engagement without sales collaboration.

* Option B: Customer Community licenses are limited to basic interactions like viewing and updating cases or accessing content, and they exclude access to Opportunities.

* Option C (Correct): Partner Community licenses include access to Opportunities, making them the appropriate choice for this use case.

NEW QUESTION # 28

Universal Containers (UC) works with a dealer network to sell their products. There are approximately 5,000 dealers that do business with UC and UC has purchased a Partner Community to interact with each of their dealers on Opportunities. Each dealer is

structured so that there are a group of managers who will oversee a larger team of agents. UC would like to set the Organization-Wide Defaults to Private for the Opportunity object, both internally and externally. Within each dealer, there are a few agents called Lead Agents who should be able to see the Opportunities for all of the other Agents at the dealer. What is the optimal solution for an Architect to recommend?

- **A. Grant Super User access to the Lead Agents as part of the Community user setup.**
- B. Create a Sharing Rule to share opportunities to the owner's manager's role and below.
- C. Add a Sharing Set that shares Opportunities to the Lead Agent based on the Lead Agents Account.
- D. Build an Apex Managed Sharing rule that will assign specific Opportunities to Lead Agents.

Answer: A

Explanation:

Explanation

The optimal solution for an architect to recommend is to grant super user access to the lead agents as part of the community user setup. Super user access allows community users to access records that they do not own within their account or role hierarchy. This way, the lead agents can see the opportunities for all of the other agents at the dealer without changing the organization-wide defaults or creating any sharing rules

NEW QUESTION # 29

A support representative at Universal Containers created a report to view all her open cases that have been created in the past 7 days and saved the report in the "Private Reports" folder.

Who can view and run the report?

- **A. The report owner**
- B. The report owner and any users who have been given access to the "My Private Reports" folder
- C. The report owner and users with the View All Data permission

Answer: A
