Add the latest topics into the Sustainable-Investing Dumps, and remove the useless questions, so that your time will be saved and study efficiency will be improved.

CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sample Questions (Q742-Q747):

NEW QUESTION # 742

Which of the following ESG integration techniques is an example of policy engagement? An investor:

- A. Voting on resolutions at an investee company's annual general meeting
- **B. Responding to a regulator's public consultation on ESG issues**
- C. Embedding ESG into their strategic asset allocation program

Answer: B

Explanation:

Policy engagement refers to efforts by investors to influence regulatory frameworks. An example of this would be responding to a

regulator's public consultation on ESG issues, thereby contributing to the development of ESG policies that can drive broader change across markets and industries. ESG Reference: Chapter 6, Page 280 - Engagement and Stewardship in the ESG textbook.

NEW QUESTION # 743

Which of the following statements about materiality is most accurate?

- A. Financial materiality is an extension of the accounting concept of double materiality
- **B. Dynamic materiality means that investors must constantly review what is financially material for a company**
- C. Double materiality excludes impacts of a company on ESG factors

Answer: B

Explanation:

Dynamic materiality refers to the concept that what is considered financially material for a company can change over time, necessitating continuous review by investors. Here's a detailed explanation:

Materiality in ESG: Materiality in ESG context refers to the relevance and importance of certain environmental, social, and governance factors in affecting a company's financial performance.

Dynamic Materiality: This concept recognizes that the significance of specific ESG factors can evolve due to changes in regulations, market conditions, societal expectations, and other external influences. Therefore, what might not be material today could become material in the future.

Continuous Review: Investors must constantly monitor and reassess ESG factors to ensure that their understanding of what is financially material remains current. This ongoing process helps investors to make informed decisions that reflect the latest material risks and opportunities.

Contrast with Static Materiality: Unlike static materiality, where material factors are considered fixed and unchanging, dynamic materiality acknowledges the fluid nature of ESG factors. This requires a more proactive and adaptive approach to ESG analysis and integration.

CFA ESG Investing References:

The CFA Institute explains that "dynamic materiality acknowledges the evolving nature of ESG issues and the need for investors to continually reassess what is material" (CFA Institute, 2020).

Dynamic materiality is highlighted as a key concept in modern ESG investing, emphasizing the importance of ongoing review and adjustment in investment strategies to account for changing material factors.

By understanding and applying the concept of dynamic materiality, investors can better navigate the complexities of ESG investing and align their portfolios with the most relevant and impactful factors over time.

NEW QUESTION # 744

Which of the following is an example of collaborative engagement?

- **A. Active public engagement**
- B. Housekeeping engagement
- C. Follow-on dialogue

Answer: A

Explanation:

Collaborative engagement in ESG investing involves multiple stakeholders, including investors, companies, and sometimes the public, working together to address ESG issues. This approach amplifies the impact of engagement efforts by pooling resources and influence.

Definition of Collaborative Engagement: Collaborative engagement typically involves investors coming together to engage with companies on specific ESG issues. This collective effort can be more effective in driving change compared to individual engagements.

Active Public Engagement: Active public engagement is a form of collaborative engagement where stakeholders publicly support ESG initiatives, campaign for policy changes, or collectively pressure companies to improve their ESG practices. This can include public statements, campaigns, or coordinated voting at shareholder meetings.

NEW QUESTION # 745

Which of the following statements regarding corporate governance is most accurate?

- A. A board should be independent of the decisions of the previous boards.
- B. Gender is the most important type of diversity needed for a board to be successful.
- C. Board appraisals are most effective when led by an internal facilitator.

Answer: A

Explanation:

Independence from previous boards is critical to ensuring that new boards can bring fresh perspectives and avoid entrenchment of outdated or ineffective policies, thus improving governance practices. (ESGTextBook[PallasCatFin], Chapter 5, Page 236)

NEW QUESTION # 746

Which of the following statements about manager reporting on ESG integration is most accurate?

- A. The more fully integrated ESG becomes into the investment process, the easier it becomes to disaggregate a particular ESG driver from the broader investment decision
- B. Disclosing voting activity alone is not sufficient to satisfy the International Corporate Governance Network (ICGN) requirement for engagement reporting
- C. Investment firms that are signatories to the Principles for Responsible Investment (PRI) voluntarily submit an annual report on their activities

Answer: B

Explanation:

The International Corporate Governance Network (ICGN) requires comprehensive engagement reporting, which goes beyond just voting activity. Investors must disclose engagement outcomes, stewardship efforts, and ESG considerations in investment decisions.

* PRI signatories (A) must submit mandatory ESG reports, not voluntary ones.

* Disaggregating ESG drivers (C) is actually more difficult, as ESG factors are deeply interconnected.
