Der Traum von IT ist immer gering in Wirklichkeit. Aber der Traum, die Cyber AB CMMC-CCA Zertifizierungsprüfung zu bestehen, ist absolut in reichweite, wenn Sie PrüfungFrage benutzen. Wir PrüfungFrage bietet Ihnen hochwertigen Service, und die Genauigkeit der Fragenkataloge zur Cyber AB CMMC-CCA Zertifizierungsprüfung ist so hoch, dass die Bestehensrate der Cyber AB CMMC-CCA Zertifizierungsprüfung 100% beträgt. Solange Sie PrüfungFrage wählen, können wir Ihnen versprechen, dass Sie die Cyber AB CMMC-CCA Zertifizierungsprüfung bestimmt bestehen!

Die IT-Expertengruppe von PrüfungFrage nutzt ihre Erfahrungen und Wissen aus, um weiterhin die Qualität der Prüfungsunterlagen zur CMMC-CCA Zertifizierung zu verbessern und die Bedürfnisse der Prüflinge abzudecken. Wir versprechen, dass Sie beim ersten Versuch die Cyber AB CMMC-CCA Zertifizierungsprüfung bestehen können. Durch den Kauf von PrüfungFrage Produkten können Sie immer schnell Updates und genauere Informationen über die Cyber AB CMMC-CCA Prüfung bekommen. Und die Produkte vom PrüfungFrage bieten umfassende Wissensgebiete und Bequemlichkeit für die Kandidaten. Außerdem beträgt die Hit-Rate 100%. Es kann Ihnen 100% Selbstbewusstsein geben, so dass Sie sich unbesorgt an der Prüfung beteiligen.

Cyber AB CMMC-CCA: Certified CMMC Assessor (CCA) Exam braindumps PDF & Testking echter Test

In der heutigen wettbewerbsorientierten IT-Branche hat man viele Vorteile, wenn man die Cyber AB CMMC-CCA Zertifizierungsprüfung besteht. Mit einem Cyber AB CMMC-CCA Zertifikat kann man ein hohes Gehalt erhalten. Menschen, die Cyber AB CMMC-CCA Zertifikat erhalten, haben oft viel höheres Gehalt als Kollegen ohne Cyber AB CMMC-CCA Zertifikat

Jedoch ist es nicht sehr einfach, die Cyber AB CMMC-CCA Zertifizierungsprüfung zu bestehen. So hilft PrüfungFrage Ihnen, Ihr Gehalt zu erhöhen.

Cyber AB CMMC-CCA Prüfungsplan:

Thema	Einzelheiten
Thema 1	Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Thema 2	Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.
Thema 3	CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.
Thema 4	CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.

Cyber AB Certified CMMC Assessor (CCA) Exam CMMC-CCA Prüfungsfragen mit Lösungen (Q50-Q55):

50. Frage

During your assessment of CA.L2-3.12.3 - Security Control Monitoring, the contractor's CISO informs you that they have established a continuous monitoring program to assess the effectiveness of their implemented security controls. When examining their security planning policy, you determine they have a list of automated tools they use to track and report weekly changes in the security controls. The contractor has also established a feedback mechanism that helps them identify areas of improvement in their security controls. Chatting with employees, you understand the contractor regularly invites resource persons to train them on the secure handling of information and identifying gaps in security controls implemented. Can the contractor place practice CA.L2-3.12.3 - Security Control Monitoring under a POA&M if unimplemented or not fully met?

- A. More information is required to make determination
- B. Yes, for all aspects
- C. Yes, for some aspects
- D. No, the practice cannot be placed on a POA&M**

Antwort: D

Begründung:

Comprehensive and Detailed In-Depth Explanation:

CA.L2-3.12.3 (1-point practice) requires "continuous monitoring of security controls." Per CAP, 1-point practices can use a POA&M, but CA.L2-3.12.3's foundational nature (ongoing monitoring) means it must be fully implemented-no partial deferral is allowed (A). B and D contradict this, and C isn't needed given the practice's clarity.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), CA.L2-3.12.3: "Continuous monitoring must be fully implemented."

* CAP v5.6.1: "Core practices like CA.L2-3.12.3 not deferrable."

Resources:

* https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.

51. Frage

The Lead Assessor is reviewing the Assessment Plan to identify people for interviews regarding a specific Level 2 practice. Some OSC personnel previously interviewed provided only brief answers without meaningful verification. What can the Lead Assessor do to improve this situation going forward?

- A. Ensure the respondents sign a non-disclosure agreement for the OSC
- **B. Ensure and verify confidentiality and non-attribution of responses**
- C. Ensure the people from the training matrix are made available
- D. Ensure and verify the responses map to the documented artifacts

Antwort: B

Begründung:

The CMMC Assessment Process emphasizes the importance of confidentiality and non-attribution in interviews to ensure OSC personnel provide candid, accurate information. Interviewees may give shallow or evasive answers if they fear attribution. Assuring confidentiality and non-attribution improves the quality and reliability of responses.

Exact extracts:

- * "The assessment team must ensure confidentiality and non-attribution during interviews."
- * "Responses should be validated against evidence, but the quality of input depends on establishing a safe environment for candor."
- * "Non-attribution is critical to elicit detailed and honest responses." Why the other options are incorrect:
- * A: Training matrices identify who is trained, not who should be interviewed.
- * C: NDAs are not a CCA responsibility - they are contractual, not assessment requirements.
- * D: Mapping to artifacts is part of correlation after interviews, but does not solve the problem of poor interview responses.

References:

CMMC Assessment Process (CAP), interview methodology.

CCA Exam Study Guide, section on interviews.

52. Frage

A CCA is offered a significant discount on cybersecurity software from a vendor whose product they will be evaluating during a CMMC assessment. How should the CCA handle this situation according to the CoPC's conflict of interest principle?

- A. Inform the vendor that they can accept such offers only after the CMMC assessment is done.
- **B. Decline the discount to avoid any appearance of a conflict.**
- C. Accept the discount and disclose it to the C3PAO for transparency.
- D. Recommend the software to the OSC during the assessment, highlighting its value proposition.

Antwort: B

Begründung:

Comprehensive and Detailed in Depth Explanation:

The CoPC requires avoiding even the appearance of a conflict (Option C). Options A, B, and D risk compromising objectivity.

Extract from Official Document (CoPC):

- * Paragraph 2.2 - Objectivity (pg. 5): "Decline offers that could create an appearance of a conflict of interest." References:

CMMC Code of Professional Conduct, Paragraph 2.2.

53. Frage

You have been hired to assess an OSC's implementation of secure password storage and transmission mechanisms. The OSC uses a popular identity and access management (IAM) solution from a reputable vendor to manage user authentication across their systems. During the assessment, you examine the IAM solution's configuration and documentation, which indicate that passwords are hashed using industry-standard algorithms like SHA-256 or bcrypt before being stored in the system's database. Additionally, the IAM solution leverages TLS encryption for all communications, ensuring that passwords are transmitted securely over the network. Based on the information provided, how would you assess the OSC's compliance with CMMC practice IA.L2-3.5.10 - Cryptographically-Protected Passwords, which requires organizations to store and transmit only cryptographically protected passwords?

- A. Not Met (-1 point)
- B. Met (+1 point)
- C. Not Met (-5 points)
- **D. Met (+5 points)**

Antwort: D

Begründung:

Comprehensive and Detailed In-Depth Explanation:

IA.L2-3.5.10 mandates that passwords be "cryptographically protected in storage and transit." Hashing with SHA-256 or bcrypt (one-way functions) secures storage, and TLS encryption protects transmission-both meeting the practice's objectives. Per the DoD Scoring Methodology, IA.L2-3.5.10 is a 5-point practice, scoring +5 when fully met. The OSC's implementation aligns with industry standards and CMMC requirements, warranting a "Met (+5 points)" score. Partial compliance isn't an option here, as both storage and transit are addressed.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), IA.L2-3.5.10: "Passwords must be hashed (e.g., bcrypt) for storage and encrypted (e.g., TLS) in transit."

* DoD Scoring Methodology: "5-point practice: Met = +5, Not Met = -5."

* https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

54. Frage

You are the Lead Assessor of the Assessment Team conducting a CMMC Level 2 assessment for an OSC.

You have completed the first phase of the assessment process, which included the assessment kickoff meeting. Now, you are moving into the second phase, which involves collecting and examining evidence to determine the OSC's compliance with the CMMC practices. Which of the following is not one of the recommended methods for collecting evidence during a CMMC assessment?

- A. Test
- **B. Self-Assessment by the OSC**
- C. Interview
- D. Examine

Antwort: B

Begründung:

Comprehensive and Detailed in Depth Explanation:

The CAP, aligned with NIST SP 800-171A, specifies three evidence collection methods: Examine, Interview, and Test. These methods ensure objective evaluation by the Assessment Team. Option B (Self-Assessment by the OSC) is not a recommended method, as it lacks the objectivity required for a certified assessment and is instead a preparatory step the OSC may perform independently. Options A, C, and D are explicitly listed in the CAP as valid methods.

Extract from Official Document (CAP v1.0):

* Section 2.2 - Conduct Assessment (pg. 25): "The three recommended methods for collecting evidence are examination, interview, and test, as specified in NIST SP 800-171A." References:

CMMC Assessment Process (CAP) v1.0, Section 2.2; NIST SP 800-171A.
