Generally speaking, reviewing what you have learned is important, since it will help you have a good command of the knowledge points. PEGACPRSA22V1 Online test engine has testing history and performance review, so that you can have a general review of what you have learned before next learning. In addition, PEGACPRSA22V1 exam dumps is convenient and easy to study, it supports all web browsers and Android and iOS etc. You can also practice offline if you like. We provide you with free update for 365 days for PEGACPRSA22V1 Exam Materials, so that you can get the latest information for the exam timely. And the latest information for PEGACPRSA22V1 exam dumps will be auto sent to you.

In order to meet a wide range of tastes, our company has developed the three versions of the PEGACPRSA22V1 preparation questions, which includes PDF version, online test engine and windows software. According to your own budget and choice, you can choose the most suitable one for you. And if you don't know which one to buy, you can free download the demos of the PEGACPRSA22V1 Study Materials to check it out. The demos of the PEGACPRSA22V1 exam questions are a small part of the real exam questions.

Pegasystems - PEGACPRSA22V1 - Useful Certified Pega Robotics System Architect 22 Reliable Braindumps Free

You may have been learning and trying to get the PEGACPRSA22V1 certification hard, and good result is naturally become our evaluation to one of the important indices for one level. When looking for a job, of course, a lot of companies what the personnel managers will ask applicants that have you get the PEGACPRSA22V1 certification to prove their abilities, therefore, we need to use other ways to testify our knowledge we get when we study at college, such as get the PEGACPRSA22V1 Test Prep to obtained the qualification certificate to show their own all aspects of the comprehensive abilities, and the PEGACPRSA22V1 exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.

The PEGACPRSA22V1 Certification Exam is designed for professionals who have experience in the Pega Robotic Automation System and want to enhance their skills and knowledge. PEGACPRSA22V1 exam covers a wide range of topics, including Pega Robotics Studio, Deployment, Runtime, and Troubleshooting. PEGACPRSA22V1 exam also evaluates the candidate's understanding of the Pega Platform, including its architecture, components, and features. Certified Pega Robotics System Architect 22 certification exam is a comprehensive and challenging assessment that requires candidates to demonstrate their expertise in the Pega Robotic Automation System.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q20-Q25):

NEW QUESTION # 20

You are developing a project for a financial company that implements a branding strategy for every application and webpage used by its customers. How do you ensure consistent formatting for all toast notifications in your project?

- A. Create an automation setting up the toast notification properties that runs automatically before proceeding to execute the project.
- B. In the project explorer, click the Information icon next to the project name, and adjust the toast notification settings in the project's property grid.
- C. In the Globals tab, expand the Utilities section of the Toolbox, select the Messages section and adjust the display settings in its property grid.
- **D. Add a toast notification to the Globals tab and adjust the display settings in its property grid. To add a formatted toast notification to an automation, use a Show method from the Globals section of the Palette.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, toast notifications are used to display short, non-blocking messages to users during runtime. These notifications are highly customizable and can be globally managed to maintain consistent branding across an enterprise automation project.

According to the Pega Robotics System Design and Implementation Guide (UI Messaging and Toast Notifications section):

"Toast notifications can be added to the Globals tab of a project to maintain consistent visual and behavioral configuration throughout the solution.

The notification element placed in Globals allows setting properties such as title, duration, color, font, and position that are shared by all automations calling the Show() method.

Automations reference the global toast notification by invoking its Show method from the Globals section of the Palette." This means that:

* The best practice for ensuring uniform design and branding (consistent colors, layout, font, and position) for toast messages is to define one global toast notification in the Globals tab.

* Once the global toast notification is configured, all automations that require displaying toast messages will simply call its Show() method, inheriting the standardized display settings.

Option Analysis:

* A. Incorrect - Adjusting the Utilities section does not define reusable toast notifications.

* B. Incorrect - The project properties do not include toast formatting controls.

* C. Incorrect - Creating an automation to set these dynamically would not enforce consistent styling across all notifications and is not recommended.

* D. Correct - Placing a toast notification in the Globals tab allows defining display parameters once and reusing them via the Show() method in automations, ensuring global consistency in branding and formatting.

Therefore, the correct and Pega-recommended approach is Option D.

References: Extracted and verified from Pega Robotics System Design and Implementation Guide, UI Messaging and Toast Notifications section (Pega Robotics 19.1 and later).

NEW QUESTION # 21

Pega Robot Studio provides five rules on how to differentiate between cloneable application objects when using key assignments in automations. The first rule states that an event creates the instance to set the context of a cloneable object. The remaining four rules state the requirements for a key assignment.

In the Answer Area, determine if each rule description requires a key assignment.

Answer Area	
<u>Rule Description</u>	<u>Key Assignment Required?</u>
An event from Child Context to Parent Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from Parent Context to Child Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
Logic within the same context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment
An event from No Context to a Context	<input type="checkbox"/> Requires a key assignment <input type="checkbox"/> Does not require a key assignment

Answer:

NEW QUESTION # 22

A solution design document outlines several projects for the solution. You are assigned to the Loan Servicing project (LoanSvcPrj).

The project uses the Interaction Framework function to communicate with the other projects.
Which three toolbox project items do you add to LoanSvcPrj? (Choose three.)

- A. String Variable
- B. Message Manifest
- C. Interaction.xml
- D. Activity
- E. Interaction Manager

Answer: A,C,D

NEW QUESTION # 23

Which two of the following Tool Windows are used in Pega Robot Studio? (Choose two.)

- A. Object Explorer
- B. Designer windows
- C. Menu toolbar
- D. Solution Explorer

Answer: B,C

NEW QUESTION # 24

Which two statements about the Excel Connector are true? (Choose Two)

- A. You can modify and read from Excel workbooks using Pega Robot Studio without an Excel application being installed in the environment.
- B. Use the Excel Connector in scenarios where the user needs to interact with the workbook in Excel.
- C. Excel Connector requires installation of Microsoft Office 2010 or later.
- D. Excel Connector allows you to work with data ranges.
- E. You need to interrogate a workbook before using it with Excel Connector.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

The Excel Connector in Pega Robot Studio is a lightweight component that provides direct interaction with Excel files without relying on the Microsoft Excel application. It is ideal for background processing, where users are not required to interact with Excel directly. According to the Pega Robotics System Design and Implementation Guide (Excel Integration and Connectors section):
"The Excel Connector allows automations to open, read, and modify Excel workbooks without requiring Microsoft Excel to be installed.

It operates directly on the file system level, supporting operations such as reading or writing to specific cells, entire worksheets, or data ranges.

The connector does not use Excel Interop; therefore, no interrogation or Excel application process is necessary." Explanation of Options:

- * A. Correct - The Excel Connector supports data range operations such as defining, reading, or writing to specific sets of cells within a worksheet.
- * B. Incorrect - The connector does not depend on any installed version of Microsoft Office; it functions independently.
- * C. Incorrect - Interrogation applies to UI applications, not file-based connectors like Excel Connector.
- * D. Correct - The connector works without Excel being installed; it manipulates workbook data directly through file handling APIs.
- * E. Incorrect - When user interaction with Excel is required, Excel Interop (Excel Application Connector) should be used instead of the file-based Excel Connector.

Therefore, the correct statements are A and D.

Reference:Extracted from Pega Robotics System Design and Implementation Guide, Excel Connector and Interop Comparison section (Pega Robotics 19.1 and later).

NEW QUESTION # 25
