Certification 212-82 Sample Questions - 212-82 Reliable Study Plan

Our 212-82 study quiz boosts many advantages and it is your best choice to prepare for the test. Our 212-82 learning prep is compiled by our first-rate expert team and linked closely with the real exam. And our 212-82 training materials provide three versions and multiple functions to make the learners have no learning obstacles. The passing rate of our 212-82 Guide materials is high and you don't need to worry that you have spent money but can't pass the test.

ECCouncil Certified Cybersecurity Technician Sample Questions (Q31-Q36):

NEW QUESTION # 31
Thomas, an employee of an organization, is restricted to access specific websites from his office system. He is trying to obtain admin credentials to remove the restrictions. While waiting for an opportunity, he sniffed communication between the administrator and an

application server to retrieve the admin credentials. Identify the type of attack performed by Thomas in the above scenario.

- A. Phishing
- B. Eavesdropping
- C. Dumpster diving
- D. Vishing

Answer: B

NEW QUESTION # 32

As the senior network analyst for a leading fintech organization, you have been tasked with ensuring seamless communication between the firm's global offices. Your network has been built with redundancy in mind, leveraging multiple service providers and a mixture of MPLS and public internet connections. One week after deploying a state-of-the-art Network Performance Monitoring & Diagnostics (NPMD) tool, you notice unusual traffic patterns originating from your European data center and targeting the corporate headquarters in New York. The traffic spikes periodically, heavily utilizing the MPLS link and sometimes saturating the public internet connection, resulting in significant data packet losses and application failures. Your task is to identify the root cause of these traffic anomalies and ensure optimal network performance for all critical business operations. Given this scenario, what could be the primary cause for these traffic spikes, and what should your Immediate course of action be?

- A. Faulty Network Hardware - The network hardware in the European data center, such as routers or switches, might be malfunctioning, causing inconsistent traffic bursts. Diagnosing the hardware, checking for faults, and replacing the faulty equipment should be the immediate action.
- B. Data Backup and Replication - The European data center might be running data backup or replication processes during peak business hours. You should liaise with the data center team to reschedule backup operations to non-peak hours and ensure that backup processes are bandwidth-aware.
- C. Unauthorized Application Usage - The European data center staff might be using unauthorized applications or services that are consuming massive bandwidth. You should enforce strict Application and Network Access Control policies, and scrutinize the application traffic to restrict non business- critical applications.
- D. MPLS Link Flapping - The MPLS link might be experiencing flapping, leading to inconsistent traffic flow. It is crucial to liaise with the MPLS service provider to inspect the link stability and consider a backup link or an alternate route to reroute the traffic.

Answer: A

NEW QUESTION # 33

In an organization, all the servers and database systems are guarded in a sealed room with a single entry point. The entrance is protected with a physical lock system that requires typing a sequence of numbers and letters by using a rotating dial that intermingles with several other rotating discs.
Which of the following types of physical locks is used by the organization in the above scenario?

- A. Digital locks
- B. Combination locks
- C. Electromagnetic locks
- D. Mechanical locks

Answer: B

NEW QUESTION # 34

Kayden successfully cracked the final round of interviews at an organization. After a few days, he received his offer letter through an official company email address. The email stated that the selected candidate should respond within a specified time. Kayden accepted the opportunity and provided an e-signature on the offer letter, then replied to the same email address. The company validated the e-signature and added his details to their database. Here, Kayden could not deny the company's message, and the company could not deny Kayden's signature.
Which of the following information security elements was described in the above scenario?

- A. Availability
- B. Integrity

- C. Non-repudiation
- D. Confidentiality

Answer: C

Explanation:
The correct answer is B, as it describes the information security element that was described in the above scenario. Non-repudiation is an information security element that ensures that a party cannot deny sending or receiving a message or performing an action. In the above scenario, non-repudiation was described, as Kayden could not deny company's message, and company could not deny Kayden's signature. Option A is incorrect, as it does not describe the information security element that was described in the above scenario. Availability is an information security element that ensures that authorized users can access and use information and resources when needed. In the above scenario, availability was not described, as there was no mention of access or use of information and resources. Option C is incorrect, as it does not describe the information security element that was described in the above scenario. Integrity is an information security element that ensures that information and resources are accurate and complete and have not been modified by unauthorized parties. In the above scenario, integrity was not described, as there was no mention of accuracy or completeness of information and resources. Option D is incorrect, as it does not describe the information security element that was described in the above scenario. Confidentiality is an information security element that ensures that information and resources are protected from unauthorized access and disclosure. In the above scenario, confidentiality was not described, as there was no mention of protection or disclosure of information and resources.

NEW QUESTION # 35
A software company has implemented a wireless technology to track the employees' attendance by recording their in and out timings. Each employee in the company will have an entry card that is embedded with a tag. Whenever an employee enters the office premises, he/she is required to swipe the card at the entrance. The wireless technology uses radio-frequency electromagnetic waves to transfer data for automatic identification and for tracking tags attached to objects.
Which of the following technologies has the software company implemented in the above scenario?

- A. Bluetooth
- B. Wi-Fi
- C. WiMAX
- D. RFID

Answer: D

NEW QUESTION # 36
......

Contending for the success fruit of 212-82 exam questions, many customers have been figuring out the effective ways to pass it. And that is why we have more and more costomers and everyday the hot hit and high pass rate as well. It is all due to the advantage of our useful 212-82 practice materials, and we have these versions of our 212-82 study materials for our customers to choose according to their different study habbits:the PDF, the Software and the APP online.
