NSE6_FSR-7.3 certifications establish your professional worth beyond your estimation. Procuring NSE6_FSR-7.3 certification is to make sure an extensive range of opportunities in the industry and doubling your present earning prospects. Free4Dump' NSE6_FSR-7.3 Practice Test dumps provide you the best practical pathway to obtain the most career-enhancing, NSE6_FSR-7.3 certification.

Fortinet NSE6_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.
Topic 2	Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.
Topic 3	System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.
Topic 4	System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.
Topic 5	System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.

We all know that Fortinet NSE 6 - FortiSOAR 7.3 Administrator (NSE6_FSR-7.3) exam dumps are an important section of the Fortinet NSE 6 - FortiSOAR 7.3 Administrator (NSE6_FSR-7.3) exam that is purely based on your skills, expertise, and knowledge. So, we must find quality NSE6_FSR-7.3 Questions drafted by industry experts who have complete knowledge

regarding the Fortinet NSE 6 - FortiSOAR 7.3 Administrator (NSE6_FSR-7.3) certification exam and can share the same with those who want to clear the NSE6_FSR-7.3 exam. The best approach to finding Fortinet NSE 6 - FortiSOAR 7.3 Administrator (NSE6_FSR-7.3) exam dumps is to check the Free4Dump that is offering the Fortinet NSE 6 - FortiSOAR 7.3 Administrator (NSE6_FSR-7.3) practice questions.

Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which two statements about Elasticsearch are true? (Choose two.)

- A. Elasticsearch allows you to store, search, and analyze huge volumes of data quickly. In near real time, and return answers in milliseconds.
- B. The global search mechanism in FortiSOAR leverages an Elasticsearch database to achieve rapid, efficient searches across the entire record system.
- C. To change the location of your Elasticsearch instance from the local instance to a remote location, you must update the falcon.conf file.
- D. The minimum version of the Elasticsearch cluster must be 6.0.2, if you want to externalize the Elasticsearch data.

Answer: A,B

Explanation:

Elasticsearch in FortiSOAR is used for its robust data handling capabilities, allowing rapid storage, searching, and analysis of vast amounts of data in near real-time. Its integration with FortiSOAR's global search enables efficient querying across all records, providing quick response times and a seamless user experience. The Elasticsearch database is crucial for handling extensive datasets and delivering swift search results, making it integral to FortiSOAR's performance and data management capabilities.

NEW QUESTION # 38

Which two roles are default roles configured on FortiSOAR? (Choose two answers)

- A. T3 Analyst
- B. T1 Analyst
- C. Connector Administrator
- D. FortiSOAR Agent

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

FortiSOAR comes with several pre-defined (out-of-the-box) roles designed to align with common Security Operations Center (SOC) functions. According to the FortiSOAR 7.3 Administration Guide under the "Security Management" section:

* T1 Analyst (Tier 1): This role is a default configuration intended for front-line analysts who perform initial triaging of alerts and basic incident response tasks.

* Connector Administrator: This is a specialized default role that grants permissions specifically for configuring, updating, and managing the lifecycle of connectors within the environment.

While FortiSOAR is highly customizable and allows for the creation of T2 or T3 roles, they are not always present as specific "default" named roles in the same way the T1 Analyst is across all base installations.

Furthermore, "FortiSOAR Agent" refers to a technical component or a deployment architecture rather than a standard user RBAC (Role-Based Access Control) role. Other common default roles include Security Administrator, Application Administrator, and Full Access.

NEW QUESTION # 39

When configuring the system proxy on FortiSOAR, which two URLs should be accessible from the proxy server? (Choose two.)

- A. <https://licensing.fortinet.net>
- B. <https://globalupdate.fortinet.net>
- C. <https://fortiguard.com>
- D. <https://iepo.fortisoar.fortinet.com>

Answer: B,D

Explanation:

When configuring the system proxy for FortiSOAR, it is essential to ensure connectivity to certain URLs to maintain system updates and licensing. For FortiSOAR, access to <https://epo.fortisoar.fortinet.com> is required for incident enrichment and analysis, while <https://globalupdate.fortinet.net> is necessary for global updates to keep the system up-to-date with the latest threat information. These connections allow FortiSOAR to communicate with Fortinet's servers to fetch updated threat intelligence and system updates, which are critical for the operational effectiveness of FortiSOAR.

NEW QUESTION # 40

Which log file contains license synchronization logs on FortiSOAR?

- **A. fdn.log**
- B. celery.log
- C. falcon.log
- D. beat.log

Answer: A

Explanation:

The fdn.log file in FortiSOAR contains logs related to license synchronization activities. This log file records events and errors associated with license checks and synchronization with Fortinet's licensing servers, ensuring that the FortiSOAR instance remains compliant with licensing requirements. Monitoring fdn.log can help administrators troubleshoot issues related to license synchronization and ensure the system operates within the licensed limits.

NEW QUESTION # 41

What are two different services that you can configure for monitoring system and cluster health statuses on FortiSOAR? (Choose two.)

- **A. SMTP**
- B. IMAP
- **C. Exchange**
- D. POP

Answer: A,C

NEW QUESTION # 42
