This can be obtained through formal education or training, workshops, or self-study. Overall, the ECBA Certification is an excellent way to validate one's knowledge and skills in business analysis and to advance one's career in this field.

IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q132-Q137):

NEW QUESTION # 132

Which criteria are necessary when the requirements express contractual obligations?

- A. Approval
- B. Evaluation
- C. Solution
- D. Acceptance

Answer: D

Explanation:

When requirements express contractual obligations, acceptance criteria are necessary. These criteria ensure that the requirements meet the agreed-upon standards and conditions set forth in the contract. They provide a clear and measurable way to determine

whether the requirements have been met satisfactorily. Acceptance criteria are used to evaluate whether the solution fulfills the contract's terms, and they form the basis for the formal acceptance of the project's deliverables. References: The BABOK Guide discusses the importance of acceptance criteria, especially when dealing with requirements that have contractual implications, ensuring that the deliverables meet the predefined standards and are accepted by the stakeholders1.

NEW QUESTION # 133

It is important for a business analyst to know the role of stakeholders in order to:

- A. gain project support.
- B. understand sign-off authority.
- C. process the feedback accurately.
- D. identify risk tolerance levels.

Answer: B

NEW QUESTION # 134

Which of the following is the integrated output that correctly reflects captured information agreed to by business analysts (BAs) and other stakeholders?

- A. Business analysis information
- B. Activity plan
- C. Confirmed elicitation results
- D. Concept model

Answer: C

Explanation:

Elicitation Results (confirmed): integrated output that the business analyst and other stakeholders agree correctly reflects captured information and confirms that it is relevant and useful as an input to further work.

NEW QUESTION # 135

What task is performed to ensure that all requirements align to the business need?

- A. Prioritize Requirements
- B. Model Requirements
- C. Define Requirements
- D. Validate Requirements

Answer: D

Explanation:

The task performed to ensure that all requirements align with the business need is 'Validate Requirements'. This process involves confirming that stakeholder, solution, and transition requirements are in line with the business requirements. It ensures that the designs satisfy the requirements and that both requirements and designs deliver business value and support the organization's goals and objectives. Validation is an ongoing activity that plays a crucial role in the business analysis process, as it helps to ensure that the project delivers the intended value and meets the needs it was designed to address.

NEW QUESTION # 136

In which requirements analysis and design definition task does a business analyst (BA) consider the opportunity costs?

- A. Validate requirements
- B. Define requirements architecture
- C. Analyze potential value and recommend solution
- D. Define design options

Answer: C

Explanation:

When a BA considers opportunity costs, they are performing a cost-benefit analysis to determine the best solution. This falls within the task of "Analyze Potential Value and Recommend Solution", where different design options or requirement implementations are evaluated for their expected value and opportunity costs (what must be forgone when choosing one option over another).

This involves:

Comparing expected benefits vs. associated costs

Evaluating risks and missed opportunities

Recommending the solution with optimal value delivery

BABOK Reference:

Found in the Requirements Analysis and Design Definition knowledge area, this task emphasizes assessing the relative value of each solution option.

NEW QUESTION # 137
