Reliable Google Apigee-API-Engineer Braindumps Pdf & Reliable Apigee-API-Engineer Test Questions

People are very busy nowadays, so they want to make good use of their lunch time for preparing for their Apigee-API-Engineer exam. If you choose our Apigee-API-Engineer exam question as your study tool, you will not meet the problem. Because the app of our Apigee-API-Engineer exam prep supports practice offline in anytime. If you buy our products, you can also continue your study when you are in an offline state. You will not be affected by the unable state of the whole network. You can choose to use our Apigee-API-Engineer Exam Prep in anytime and anywhere

Google Apigee-API-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">API Design Best Practices: This section of the exam measures skills of an API Designer and focuses on principles and patterns for effective API design. It includes best practices, facade patterns, and anti-patterns. Candidates learn to define APIs using the OpenAPI Specification and improve the quality and usability of their API documentation

Topic 2	<ul style="list-style-type: none"> • Edge Policies: This section of the exam measures skills of an API Developer and covers Apigee Edge policies that control behavior at runtime. It includes understanding policy references, JavaScript object models, quota and rate limiting, security policies like OAuthV2 and JWT, and customizations using Java callouts. Error handling within policies is also addressed.
Topic 3	<ul style="list-style-type: none"> • API Lifecycle Topics and Best Practices: This section of the exam measures skills of an API Program Manager and discusses end-to-end API lifecycle strategies. It includes testing, digital transformation guidance, checklists for API quality, and continuous integration • deployment (CI • CD) practices using Google Cloud tools.
Topic 4	<ul style="list-style-type: none"> • Edge Deployment and Environment Promotion: This section of the exam measures skills of a DevOps Engineer and includes topics on deploying API proxies, managing environments, and using tools like apigeetool. It emphasizes promoting APIs across environments and maintaining control over the deployment lifecycle.
Topic 5	<ul style="list-style-type: none"> • API Products, Developers, and Apps: This section of the exam measures skills of an API Product Manager and focuses on configuring and managing API products, developers, and applications. It covers the process of registering apps, generating API keys, and managing access and usage through API product definitions.
