Analytics-Engineering practice exam from PrepAwayPDF can help you realize your goal of passing the dbt Labs dbt-Analytics-Engineering Certification Exam on your very first attempt. Most people find it difficult to find excellent dbt Labs dbt-Analytics-Engineering exam dumps that can help them prepare for the actual dbt Labs dbt-Analytics-Engineering exam.

dbt Labs dbt Analytics Engineering Certification Exam Sample Questions (Q232-Q237):

NEW QUESTION # 232

When merging code on a remote repository hosting platform (like GitHub), you notice options like "squash and merge" and "rebase and merge." Which factors would influence your choice between these options?

- A. All of the above.
- B. Whether you want to preserve the feature branch commit history in detail.
- C. Your team's established conventions and preferences for maintaining the project history.
- D. The size and complexity of the changes within the pull request.

Answer: A

Explanation:

A: Squash and merge simplifies history; rebase and merge preserve details. B: Large pull requests might benefit from squashing for a cleaner main branch view. C: Teams should have consistent ways to manage history for ease of collaboration.

NEW QUESTION # 233

dbt Model Snippet:SQL

- A. Your `dbt_project.yml` file has a model-level schema override.
- B. There's a custom macro in use that dynamically changes schemas.
- C. Your `sources.yml` file is not configured correctly-
- D. The `stg_orders` model uses a schema config in its own model SQL

Answer: A

Explanation:

Model-level schema configurations override other settings. Check your project file for this model. The others are possible but less common patterns

NEW QUESTION # 234

While refactoring models, you accidentally drop a table in your development environment that mirrors production. Which inherent characteristic of development environments likely contributed to this issue?

- A. Developers working in development environments might expect the ability to make and revert changes with fewer consequences.
- B. Both A and C-
- C. Development environments often have less stringent permissions to facilitate experimentation.
- D. Development datasets might be incomplete or outdated compared to production

Answer: B

Explanation:

A Relaxed permissions enable rapid prototyping but can lead to accidents. C: Developers generally take a more 'free-to-change' approach in development environments-

NEW QUESTION # 235

dbt Model Snippet:SQL

- A. Checking that the `date_part()` function is compatible with your database-
- B. Validating that the column names generated by the Jinja loop would be valid SQL identifiers.

- C. Ensuring the grains variable is defined in dbt_project.yml or a macro.
- D. Making sure the source table fct_orders contains the expected columns.

Answer: C

Explanation:

Compilation errors often mean undefined variables or incorrect Jinja syntax. The rest are potential issues but less likely to break at the compilation stage.

NEW QUESTION # 236

You must exclude a specific model from being included in the generated documentation entirely. How would you achieve this?

- A. Use the enabled flag in your dbt_project.yml file to control model inclusion.
- B. Add a dæs: {enabled: false} entry to the model's YAML configuration.
- C. Remove all descriptions and tags associated with the model.
- D. Its not possible to exclude individual models; you can only exclude entire folders.

Answer: A

Explanation:

The enabled flag in dbt_project.yml provides control over whether a model (or other resources) are included in dbt operations, including doc generation. Check your dbt version documentation for the latest syntax

NEW QUESTION # 237

.....

If you feel that you always suffer from procrastination and cannot make full use of your spare time, maybe our dbt-Analytics-Engineering study materials can help you solve your problem.
