Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q100-Q105):

NEW QUESTION # 100

Which two passwords follow strong password policy guidelines? (Choose 2.)

- A. Fluffy#
- B. Wh@tareyouDo1ngtoday4
- C. Feb121978
- D. 1mPressm3!

Answer: B,D

Explanation:

The CCST Cybersecurity course defines a strong password as one that:

Is at least 8-12 characters long

Uses a mix of uppercase, lowercase, numbers, and symbols

Avoids dictionary words, personal information, and predictable patterns

"Strong passwords combine length, complexity, and unpredictability, making them resistant to brute force and dictionary attacks."

(CCST Cybersecurity, Essential Security Principles, Authentication and Access Control section, Cisco Networking Academy) A is correct: It's long, mixed case, includes numbers and symbols, and is not easily guessable.

B is incorrect: It's based on a date, which is predictable.

C is incorrect: Short and based on a dictionary word.

D is correct: Uses complexity and length with leetspeak for added unpredictability.

NEW QUESTION # 101

Which of the following is a best practice for proactively managing and securing communication before, during, and after an event?

- A. Limiting access to essential personnel only
- B. Conducting regular security audits
- C. Regularly updating antivirus software
- D. Encrypting sensitive data at rest and in transit

Answer: D

Explanation:

Encrypting sensitive data at rest and in transit is a best practice for securing communication before, during, and after an event.

Encryption ensures that data is encoded in a way that only authorized parties can access and understand it. By encrypting sensitive data, even if it is intercepted by unauthorized individuals, they would not be able to make sense of the information without the encryption key, thus maintaining its confidentiality and integrity during transmission and storage.

NEW QUESTION # 102

What is the purpose of a Virtual Private Network (VPN)?

- A. To secure wireless networks from unauthorized access.
- B. To protect against viruses and malware.
- C. To monitor and analyze network traffic for potential security threats.
- D. To provide secure and encrypted remote access to a private network over a public network, such as the internet.

Answer: D

Explanation:

A Virtual Private Network (VPN) is a network technology that allows users to securely connect to a private network from a remote location over a public network, such as the internet. It establishes a secure tunnel between the user's device and the private network,

encrypting the data and ensuring confidentiality and integrity.

NEW QUESTION # 103

Which of the following features help to secure a wireless SoHo network from unauthorized access?

- A. Default admin credentials
- B. SSID broadcast
- C. MAC filtering
- D. Weak encryption

Answer: C

NEW QUESTION # 104

Which compliance framework is specifically related to protecting the personal data and privacy of European Union (EU) citizens?

- A. PCI-DSS
- B. GDPR
- C. FERPA
- D. HIPAA

Answer: B

Explanation:

The General Data Protection Regulation (GDPR) is a compliance framework implemented by the European Union to protect the personal data and privacy of EU citizens. It focuses on the collection, processing, and storage of personal data, and it applies to any organization that handles EU citizens' data, regardless of its location.

NEW QUESTION # 105
