ISTQB Certified Tester Usability Tester Sample Questions (Q20-Q25):

NEW QUESTION # 20

What does the Equality Act address?

- A. It states that websites have to adhere to the WCAG conformity level AA
- **B. It protects people from discrimination in the workplace and in wider society**
- C. It states that websites have to adhere to the WCAG conformity level A
- D. It obligates organizations to make sites accessible at all costs

Answer: B

Explanation:

The Equality Act 2010 (UK) is legislation designed to protect individuals from discrimination in various areas, including employment and access to goods and services-this includes digital products like websites.

While it does not directly mandate WCAG compliance levels (A or AA), it implies that digital services must be accessible to users with disabilities. Organizations are required to make "reasonable adjustments" to avoid discrimination. Therefore, the most accurate and comprehensive answer is B.

NEW QUESTION # 21

In the last project, the usability tests substantially exceeded the budget of the test plan. Which quality control task could have been used to avoid this?

- A. Check that findings are communicated to the stakeholders
- **B. Check consumed resources regularly and compare with the estimates**
- C. Check that the usability test plan has been properly reviewed
- D. Check whether the usability test report conforms to the best practices

Answer: B

Explanation:

To prevent usability testing from exceeding budget, active monitoring and control of project resources are critical. The best practice is to regularly check consumed time, costs, and effort against the original estimates, allowing timely adjustments to scope or resources. This is a classic quality control practice aligned with ISO 9001 principles and standard project management methodologies. Option A relates to test preparation, option C concerns reporting and communication, and option D applies after test execution. Only option B deals directly with budget control during the test.

NEW QUESTION # 22

Which of the following are common mistakes made in usability testing?

- i. The user is too active
- ii. Critical results are ignored
- iii. No observers involved
- iv. Scheduling too late
- v. Incorrect focus

- A. ii & iv are true, i, iii & v are false
- B. i & iii are true, ii, iv & v are false
- C. i, ii & iii are true, iv & v are false
- **D. ii, iv & v are true, i & iii are false**

Answer: D

Explanation:

Common mistakes in usability testing include:

Ignoring critical results (ii): A significant issue if findings are not acted upon.

Scheduling the test too late (iv): This can lead to usability problems being discovered too late to be addressed effectively.

Having the wrong focus (v): For instance, focusing on aesthetics instead of usability goals.

Option i ("user is too active") is not a problem-active participation is necessary. Option iii ("no observers involved") is not a typical mistake, since tests can still be valid even with recorded sessions and later review.

Hence, the correct answer is A: ii, iv & v are true.

#####

NEW QUESTION # 23

Which of the following statements about usability test scripts is wrong?

- A. It is a checklist used by the moderator of a usability test.
- B. It contains pre-session interview questions.
- **C. It contains answers to the test questions.**
- D. It contains post-session interview questions.

Answer: C

Explanation:

A usability test script is a structured document used by the moderator to ensure consistency across test sessions. It typically includes pre-session briefing text, pre- and post-session interview questions, and the specific usability tasks to be performed. However, it does not include answers to the test questions, as usability tests focus on observing user behavior and performance-not testing users' knowledge. Providing answers would bias results and invalidate findings. Thus, option D is incorrect and the best choice.

#####

NEW QUESTION # 24

Which of the following statements about usability test plans is true?

- A. It should be very elaborate and at least 10 pages
- B. It contains the results of the test sessions
- **C. It contains a schedule**
- D. It should contain the briefing instructions

Answer: C

Explanation:

A usability test plan is a foundational document created before conducting usability testing. It outlines the objectives, scope, methodology, participants, tasks, and schedule for the testing activities. One of its essential components is the schedule, which details when and how test sessions will occur to ensure proper resource allocation and time management. Including a schedule helps coordinate between test moderators, participants, observers, and stakeholders, making the testing process organized and efficient. While briefing instructions (Option B) may be related to the usability test, they are typically documented separately or included in participant materials rather than the formal test plan itself. The test plan should be concise and focused; it need not be overly

elaborate or lengthy (Option C), as clarity and usability of the plan are more important than length. The results of the test sessions (Option D) are not included in the test plan but rather compiled afterward in a test report or analysis document. Therefore, the correct statement is that the usability test plan contains a schedule, ensuring a structured timeline for the usability testing activities.
