

# UiPath UiPath-ABAv1 Latest Braindumps Questions & UiPath-ABAv1 Valid Test Objectives

P.S. Free & New UiPath-ABAv1 dumps are available on Google Drive shared by PDFBraindumps: <https://drive.google.com/open?id=1xaTRDLY5oLD9dJoOsKBmZc7Y6x94Jakh>

We have installed the most advanced operation system in our company which can assure you the fastest delivery speed, to be specific, you can get immediately our UiPath-ABAv1 training materials only within five to ten minutes after purchase after payment. At the same time, your personal information on our UiPath-ABAv1 Exam Questions will be encrypted automatically by our operation system as soon as you pressed the payment button, that is to say, there is really no need for you to worry about your personal information if you choose to buy the UiPath-ABAv1 exam practice from our company.

## UiPath UiPath-ABAv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Exception Handling: This topic covers using Try Catch, Throw, Rethrow, and Retry Scope activities.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Workflow Analyzer: This topic covers the use of Workflow Analysis, along with configuring Workflow Analyzer settings.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Logging: This topic addresses interpreting robot execution logs and implementing logging best practices during development for effective debugging and analysis.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>PDF Automation: It discusses extracting data from native and scanned PDFs. Moreover, the topic focuses on different techniques for working with PDF documents.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Control Flow: Control Flow activities, workflow types, and Flowchart layouts are discussed here, along with the usage of IF, Flow Decision, Switch activities, While, Do While, and For Each.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Platform Knowledge: It delves into UiPath products and their uses, including Studio types, Robot types, Orchestrator, and Integration Service. Additionally, it discusses the value of components within the UiPath Ecosystem.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Business Knowledge: This topic focuses on understanding business process automation (BPA) and its value proposition, as well as exploring key concepts related to business processes.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Studio Interface: Here, the topic covers installing Studio Community Edition, connecting to Orchestrator, and navigating the Studio interface. It also includes explanations of different Studio profiles, management of packages, use of activity project settings, and the use of options in the Studio Backstage view.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Orchestrator: Understanding Orchestrator entities, tenant entities, provisioning robots, defining roles, and utilizing logging features are covered in this topic.</li> </ul>

Topic 10	<ul style="list-style-type: none"> <li>• Data Manipulation: String manipulation, array operations, list initialization, dictionary usage, and DataTable operations are discussed in this topic.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• Working with Files and Folders: Creating, managing, and iterating through local files and folders are covered here.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• UI Automation: UI Automation principles, including modern and classic design experiences, are discussed alongside utilizing modern recorder and input</li> <li>• output activities.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• Version Control Integration: It focuses on utilizing Git integration in Studio to add a project, clone a repository is explained, including common Git operations.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• Debugging: Debugging modes, actions, breakpoints, and debugging panels are explained in this topic, along with using Profile Execution features to improve project execution performance.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• Integration Service: This topic explains Integration Service, use of integration service connectors, triggers, and the Integration Service Connector Builder.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• Object Repository: Creation, publication, and consumption of UI libraries with static and dynamic descriptors are covered in this section.</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>• Implementation Methodology: Understanding project implementation stages, interpreting PDDs and SDDs, and conducting peer reviews are discussed here.</li> </ul>
Topic 18	<ul style="list-style-type: none"> <li>• Email Automation: Handling emails via IMAP, POP3, SMTP, and integrating with Microsoft and Gmail are covered in this section. It also discusses the usage of Microsoft 365 and Gsuite packages.</li> </ul>
Topic 19	<ul style="list-style-type: none"> <li>• Libraries and Templates: Creating, publishing, and consuming process libraries, as well as working with templates, are discussed here.</li> </ul>
Topic 20	<ul style="list-style-type: none"> <li>• Excel Automation: It explains Excel Automation principles and modern Excel integration including reading, writing, and manipulating Excel files. Additionally, the topic focuses on the usage of the Excel Workbook activities.</li> </ul>

## Free PDF Quiz 2026 UiPath UiPath-ABAv1 Accurate Latest Braindumps Questions

There are many users that are using UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) exam questions and rated it as one of the best in the market. The customers are pleased with UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) exam questions and all of them have passed the UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) certification exam on the very first try.

### UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q65-Q70):

#### NEW QUESTION # 65

What is a Document Understanding taxonomy?

- A. Defines the document types and the fields targeted for data extraction.
- B. Defines the metadata information for each document type.
- C. Defines the pieces of information that were extracted.
- D. Defines how classification is done.

**Answer: A**

Explanation:

Understanding Document Understanding Taxonomy:

A taxonomy in UiPath Document Understanding is a framework that specifies the types of documents and the data fields to be extracted. It ensures that the automation solution knows what information to target from each document type.

Why Option C is Correct:

It includes document categories, document types, and their associated fields for extraction, acting as a blueprint for data extraction workflows.

Why Other Options Are Incorrect:

Option A: Metadata pertains to descriptive information but is not the main focus of taxonomy.

Option B: Classification is a process within Document Understanding but is not defined by the taxonomy.

Option D: Pieces of extracted information are outputs, not part of the taxonomy definition.

### NEW QUESTION # 66

Who should be involved in the UAT phase?

- A. RPA Developer, Solution Architect, and Client Business Team
- B. Process Owner, RPA Developer, Business Analyst and Support Team
- **C. Business Analyst, Process Owner, and Subject Matter Expert**
- D. Support Team, Solution Architect, Business Analyst and Process Owner

**Answer: C**

Explanation:

During the User Acceptance Testing (UAT) phase, the individuals who should be involved include the Business Analyst, Process Owner, and Subject Matter Expert. This group ensures that the automation meets business requirements, is technically accurate, and adheres to operational needs, which are critical for validating the solution before full deployment.

UiPath Documentation on UAT at <https://docs.uipath.com/>.

### NEW QUESTION # 67

Which is the module that allows checking the status of the ideas or automations shared within the UiPath Automation Hub?

- **A. Dashboard**
- B. Explore
- C. Workspace
- D. Admin Console

**Answer: A**

Explanation:

Dashboard in Automation Hub:

The Dashboard module displays the status and progress of automation ideas and implementations.

It provides visibility into metrics like ROI, process readiness, and stage completion.

Option Analysis:

Admin Console (A): Used for administrative tasks like user and permissions management, not tracking ideas.

Workspace (C): This is a collaboration area, not a status-checking module.

Explore (D): In Communications Mining, not Automation Hub.

Correct Option (B): The Dashboard is the module designed for monitoring the status of automation ideas.

### NEW QUESTION # 68

For text assets, is there any character limit for the Global Value Field?

- A. No, there is no such limit
- B. Yes, this field allows for up to 100000 characters
- **C. Yes, this field allows for up to 4000 characters**
- D. Yes, this field allows for up to 1000000 characters

**Answer: C**

Explanation:

For text assets in UiPath, there is a character limit for the Global Value Field, which allows for up to 4000 characters. This limit is important for managing data sizes and ensuring performance and stability within the UiPath Orchestrator environment. UiPath Documentation on Assets Management at <https://docs.uipath.com/>.

### NEW QUESTION # 69

What is the difference between attended robots and unattended robots?

- A. Attended robots are designed to manage multiple tasks simultaneously, whereas unattended robots can only handle one task at a time.
- **B. Attended robots require a human operator to be present to start and supervise the tasks, while unattended robots can operate autonomously without human supervision.**
- C. Attended robots can operate autonomously without human supervision, while unattended robots require a human operator to be present to start and supervise the tasks.
- D. Unattended robots in UiPath are limited to structured processes but attended robots can only handle unstructured tasks.

**Answer: B**

Explanation:

UiPath clearly distinguishes these two types:

"Attended robots work under the direct supervision of a human, typically executing tasks that require frequent user interaction. Unattended robots are capable of running automation processes independently, without human intervention." This distinction is fundamental to designing the correct automation architecture for a given use case.
