C_CPI_2506 New Braindumps Book | C_CPI_2506 Latest Study Guide

A free demo of the Desktop SAP C_CPI_2506 Practice Test Software is available for users to test features of this version before buying it. Desktop SAP C_CPI_2506 Practice Test Software practice test software is Windows-based and can be used without the internet. A 24/7 customer service is available for your assistance for SAP C_CPI_2506 Exam. This practice exam is customizable therefore you can adjust the duration and questions numbers as per your needs for SAP C_CPI_2506 Exam.

SAP Certified Associate - Integration Developer Sample Questions (Q56-Q61):

NEW QUESTION # 56

You use an outbound HTTP adapter with basic authentication .In SAP Integration Suite, Monitor Integrations Manage Security, where must you set up and store a user and password?

- A. PGP Keys
- **B. Security Material**
- C. Keystore
- D. Access policies

Answer: B

Explanation:

To use basic authentication for outbound HTTP connections, you must store the user and password as credentials in the security material of SAP Integration Suite. Credentials are a type of security artifact that can be used to authenticate against external systems. You can create and manage credentials in the Monitor Integrations Manage Security Security Material section of SAP Integration Suite. Reference: Setting Up Outbound HTTP Connections with Basic Authentication | SAP Help Portal, Security Artifact Renewal for HTTPS-Based Communication | SAP Help Portal

NEW QUESTION # 57

Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Use a Java connector
- B. Use an external REST API
- C. Employ a Mule Expression component
- **D. Run a Groovy script**

Answer: D

Explanation:

For executing custom logic inside an integration flow:

Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.

External REST APIs can enrich data but are not for embedded custom logic execution.

Mule components are not part of SAP CPI.

Java connectors are not directly supported in SAP CPI runtime.

Thus, the best suited for executing custom logic is Groovy script.

NEW QUESTION # 58

Which SAP offering provides a highly scalable, distributed event streaming platform that supports MQTT, AMQP, and JMS protocols for efficient and secure event transmission in hybrid IT landscapes?

- **A. SAP Integration Suite, Advanced Event Mesh**
- B. SAP Business Technology Platform (SAP BTP)
- C. SAP Cloud Platform, Integration
- D. SAP Process Orchestration

Answer: A

Explanation:

SAP Integration Suite, Advanced Event Mesh (AEM) is the SAP offering that provides a highly scalable, distributed event streaming platform. It is specifically designed for large-scale, hybrid, and multi-cloud landscapes where event-driven communication is required across diverse applications and systems.

Key points from SAP documentation:

* Protocol Support: Advanced Event Mesh supports MQTT, AMQP, JMS, REST, and WebSocket protocols, ensuring secure and efficient event transmission across heterogeneous IT landscapes.

* Scalability and Distribution: Unlike standard SAP Event Mesh, which is intended for simpler messaging scenarios, AEM provides global-scale event streaming with distributed brokers that can span multiple geographies and cloud regions.

* Hybrid Integration: AEM enables real-time, event-driven integration across on-premise systems, SAP cloud applications, and third-party solutions, making it suitable for hybrid IT environments.

* Enterprise Features: It includes advanced capabilities such as high availability, disaster recovery, dynamic scaling, and fine-grained security for enterprise-grade messaging.

Why the other options are incorrect:

* A. SAP Business Technology Platform (SAP BTP) # This is the overall platform-as-a-service offering from SAP. It provides the foundation but not specifically the event streaming capability.

* B. SAP Cloud Platform, Integration # This was the older name for what is now SAP Integration Suite (Cloud Integration capability). It does not directly provide advanced distributed event streaming.
* C. SAP Process Orchestration # This is the on-premise middleware suite (PI/PO + BPM), but it is not designed for distributed event streaming or modern event protocols like MQTT.
Therefore, the correct answer is D. SAP Integration Suite, Advanced Event Mesh, as it is the only SAP solution purpose-built to deliver distributed, scalable event streaming with support for MQTT, AMQP, and JMS protocols.

NEW QUESTION # 59

What can you do in the Cloud Integration capability within SAP Integration Suite? Note: There are 2 correct answers to this question

- A. Develop complex integration scenarios in Python.
- B. Connect to different cloud runtime environments.
- C. Develop custom adapters.
- D. Connect to multiple endpoints.

Answer: C,D

Explanation:

In the Cloud Integration capability within SAP Integration Suite, you can do the following things:

Connect to multiple endpoints. You can use various adapters and protocols to connect to different systems and applications, such as SAP S/4HANA, Salesforce, SuccessFactors, and more.

Develop custom adapters. You can use the Adapter Development Kit (ADK) to create your own adapters for specific integration scenarios and requirements. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 60

You are using a Data store Operation of the type Write. Which parameter must you select to avoid duplicate entries?

- A. Encrypted stored Message
- B. Retention Threshold for Alerting
- C. Overwrite Existing Message
- D. Include Message Headers

Answer: C

Explanation:

In a Data Store Write operation:

If multiple messages are written with the same Entry ID, enabling Overwrite Existing Message ensures that the previous entry is replaced, avoiding duplicate records.

Other options:

Encrypted Stored Message # Secures data, not related to duplicates.

Include Message Headers # Controls storage of headers, not duplication.

Retention Threshold for Alerting # Configures alerts, not duplication.

Thus, the parameter required to avoid duplicates is Overwrite Existing Message.

NEW QUESTION # 61

.....

why you need the C_CPI_2506 exam questions to help you pass the exam more smoothly and easily? There are a lot of the benefits of the C_CPI_2506 study guide. Firstly, a little practice can perfect you to answer all C_CPI_2506 new questions in the real exam scenario. Secondly, another amazing benefit of doing the C_CPI_2506 Practice Tests is that you can easily come to know the real exam format and develop your skills to answer all questions without any confusion. Hence, you can develop your pass percentage.
