XK0-006 Exam Format, XK0-006 Certified Questions

It is a universally accepted fact that the XK0-006 exam is a tough nut to crack for the majority of candidates, but there are still a lot of people in this field who long to gain the related certification so that a lot of people want to try their best to meet the challenge of the XK0-006 Exam. A growing number of people know that if they have the chance to pass the exam, they will change their present situation and get a more decent job in the near future.

CompTIA Linux+ Certification Exam Sample Questions (Q13-Q18):

NEW QUESTION # 13

A systems administrator manages multiple Linux servers and needs to set up a reliable and secure way to handle the complexity of managing event records on the OS and application levels.

Which of the following should the administrator do?

- **A. Implement a centralized log aggregation solution.**
- B. Configure daily automatic backups of logs to remote storage.
- C. Deploy log rotation procedures to manage the records.
- D. Create an automated process to retrieve logs from the server by demand.

Answer: A

Explanation:

A centralized log aggregation solution (such as Elasticsearch, Graylog, or Splunk) provides reliable and secure management of logs across multiple servers. It consolidates OS and application logs, simplifies analysis, and improves monitoring and security compared to on-demand retrieval, backups, or simple log rotation.

NEW QUESTION # 14

A user on a Linux VM is running /work/test.sh Bash script and receives the following error:

bash: /work/test.sh: Permission denied

After further investigation, the user receives the following outputs:

```
# ls -l /work/test.sh
-rwxr--r--. 1 testuser test          512 Jul 12 2023 /work/test.sh

# mount
/dev/mapper/work on /work type xfs (rw, nosuid, nodev, noexec, reltime, seclabel, attr2, noquota)
```

Which of the following commands should a systems administrator run to fix the issue?

- A. mount -o remount,suid /work
- **B. mount -o remount,exec /work**
- C. chmod o+x /work/test.sh
- D. chmod g+x /work/test.sh

Answer: B

Explanation:

The script /work/test.sh already has execute permissions (-rwxr--r--), but the filesystem is mounted with the noexec option, which prevents execution of binaries and scripts. Remounting the filesystem with the exec option allows execution of the script.

NEW QUESTION # 15

An administrator thinks that the user Joe may be running an unauthorized process on a Linux server. Which of the following commands should the administrator run to confirm this idea?

- A. lsof -p 'Joe'
- B. jobs -n 'Joe'
- **C. top -u 'Joe'**
- D. ps -ax 'Joe'

Answer: C

Explanation:

top -u Joe filters the process display to only show processes owned by user Joe, allowing the administrator to see if Joe is running any unauthorized processes.

NEW QUESTION # 16

An administrator receives the following output while attempting to unmount a filesystem:

umount /data1: target is busy.

Which of the following commands should the administrator run next to determine why the filesystem is busy?

- A. `top -d /data1`
- **B. `lsdf | grep /data1`**
- C. `du -sh /data1`
- D. `ps -f /data1`

Answer: B

Explanation:

The `lsdf` command lists open files and the processes using them. Running `lsdf | grep /data1` will show which processes are keeping the `/data1` filesystem busy, preventing it from being unmounted.

NEW QUESTION # 17

A systems administrator needs to check the statuses of all the services on a Linux server. Which of the following commands accomplishes this task?

- **A. `systemctl list-units --type=services`**
- B. `systemctl list-sockets --type=services`
- C. `systemctl is-enabled --services`
- D. `systemctl is-active --services`

Answer: A

Explanation:

The `systemctl list-units --type=service` command displays all loaded service units and their statuses (running, exited, failed, etc.), allowing the administrator to check the state of all services on the server.

NEW QUESTION # 18

.....

One of the top features of CompTIA XK0-006 exam dumps is the XK0-006 exam passing a money-back guarantee. In other words, your investments with Pass4suresVCE Links to an external site. CompTIA CompTIA Linux+ Certification Exam exam questions are secured with the 100 CompTIA Linux+ Certification Exam XK0-006 Exam passing a money-back guarantee. Due to any reason, if you did not succeed in the final XK0-006 exam despite using Pass4suresVCE XK0-006 pdf questions and practice tests, we will return your whole payment without any deduction.

XK0-006 Exam Format: <https://www.pass4suresvce.com/XK0-006-pass4sure-vce-dumps.html>

The most important feature of the online version of our XK0-006 learning materials are practicality, Our calculation system of the XK0-006 study materials is designed subtly, CompTIA Best XK0-006 Study Material Meanwhile, you will enjoy the study experience for there are three different versions to choose from, High quality XK0-006 free pdf training gives you unforgettable experience certainly.

If we know the facts, we, as a team and organization, XK0-006 can confront and deal with the reality, As you get more advanced and your sales and marketing teams grow, then you may want to look at Marketing Real XK0-006 Question Cloud which is built for delivery of content and what is known as traditional marketing.

CompTIA Best XK0-006 Study Material Exam Latest Release | Updated XK0-006 Exam Format

The most important feature of the online version of our XK0-006 Learning Materials are practicality, Our calculation system of the XK0-006 study materials is designed subtly.

Meanwhile, you will enjoy the study experience for there are three different versions to choose from, High quality XK0-006 free pdf training gives you unforgettable experience certainly.
