According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our JN0-460 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for Juniper exams, thus inspiring them obtain the targeted JN0-460 certificate successfully. There are many advantages of our JN0-460 question torrent that we are happy to introduce you and you can pass the exam for sure.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTDPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 2	<ul style="list-style-type: none"> • Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 3	<ul style="list-style-type: none"> • Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 4	<ul style="list-style-type: none"> • Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.

Topic 5	<ul style="list-style-type: none"> • Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.

JN0-460 Reliable Test Tips, Training JN0-460 Pdf

You can increase your competitive force in the job market if you have the certificate. JN0-460 exam torrent of us will offer an opportunity like this. If you choose us, we will help you pass the exam just one time. JN0-460 exam torrent of us is high quality and accuracy, and you can use them at ease. Besides, we offer you free demo to have a try before buying, and we have free update for 365 days after purchasing. The update version for JN0-460 Exam Dumps will be sent to your email automatically.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q80-Q85):

NEW QUESTION # 80

Which of the following accurately describes VXLAN gateways?

- A. They only operate at Layer 3 of the OSI model
- **B. Facilitate communication between VXLAN and non-VXLAN environments**
- C. Convert between different encryption protocols
- D. Are used to decrease network throughput

Answer: B

NEW QUESTION # 81

You are experiencing issues with your video streams. In this scenario, which SLE and classifier should you inspect to see if BUM traffic is a problem?

- A. Throughput Congestion
- B. Successful Connect --> Authentication
- C. Throughput -> Interface Anomalies
- **D. Throughput Storm Control**

Answer: D

Explanation:

According to Juniper Mist documentation, the Throughput Service Level Expectation (SLE) is the primary metric used to measure the ability of wired clients to pass traffic across the physical network without impedance. This SLE is critical for diagnosing issues with real-time, high-bandwidth applications such as video streams, which are highly sensitive to packet loss and latency. Within the Throughput SLE, the Storm Control classifier is specifically designed to identify "bad user minutes" caused by the suppression of Broadcast, Unknown Unicast, and Multicast (BUM) traffic.

Storm control is a mechanism that enables the switch to monitor traffic levels and drop BUM packets when a specified traffic level-known as the storm control level-is exceeded. This prevents a "traffic storm" from proliferating and degrading the overall performance of the LAN. While this is a vital security feature to prevent network meltdowns, it can inadvertently impact legitimate traffic. For instance, if multicast-based video streams or other heavy BUM traffic exceed the configured bandwidth percentage on a port, the switch will drop those packets to protect the rest of the network.

When troubleshooting video stream issues, network administrators should inspect the Storm Control classifier to see if it is triggering "bad user minutes". If the Mist dashboard indicates failures under this classifier, it signifies that the switch hardware is actively dropping packets because the BUM traffic limit has been reached. This provides immediate root-cause evidence, allowing the administrator to determine if they need to adjust the storm control thresholds within the Port Profile or investigate the source of the excessive broadcast traffic. By correlating these hardware-level events with the end-user experience, Mist AI simplifies the

resolution of complex performance problems that traditional "up/down" monitoring would miss.

NEW QUESTION # 82

Which three parameters should be provided through DHCP when using ZTP during a Mist AI greenfield deployment? (Choose three.)

- A. IP address
- B. NTP server
- C. name server
- D. NETCONF

Answer: A,B,C

NEW QUESTION # 83

EVPN multihoming in Campus Fabric Architecture is utilized to:

- A. Decrease network redundancy
- B. Simplify network design complexities
- C. Increase single points of failure
- D. Provide link redundancy and load balancing

Answer: D

NEW QUESTION # 84

Which provisioning option is typically used for scaling network configurations across multiple sites?

- A. Manual configuration at each site
- B. Direct configuration through physical console ports
- C. Centralized cloud-based management
- D. Peer-to-peer network setup

Answer: C

NEW QUESTION # 85

.....

Are you staying up for the JN0-460 exam day and night? Do you have no free time to contact with your friends and families because of preparing for the exam? Are you tired of preparing for different kinds of exams? If your answer is yes, please buy our JN0-460 exam questions, which is equipped with a high quality. We can make sure that our JN0-460 Exam Questions have the ability to help you solve your problem, and you will not be troubled by these questions above. More importantly, if you purchase our JN0-460 practice materials, we believe that your life will get better and better.
