Currently we release the latest COH-285 reliable exam answers for the test which not only cover the accurate study guide but also include more than 80% questions and answers of the real test. If it is still difficult for you to pass exam, or if you are urgent to clear exam in a short at first attempt, our COH-285 Reliable Exam Answers will be your only valid choice. Don't hesitate again. Our buyers are companies and candidates from all over the world. It is the best methods for passing exam.

Cohesity COH-285 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshoot NetBackup: This section of the exam measures skills of NetBackup administrators and focuses on resolving issues that occur during backup and recovery operations. It covers the interpretation of status codes and job details to diagnose failed jobs. The section also explains how to troubleshoot devices and media and how to validate connectivity between primary servers, media servers, and client systems. Candidates learn to address common problems in disaster recovery situations, including tasks related to recovering the NetBackup catalog.
Topic 2	<ul style="list-style-type: none">• Configure NetBackup: This section of the exam measures the skills of system administrators and focuses on the configuration tasks required to set up and manage a NetBackup environment. It covers the setup of primary, media, and client settings along with essential host properties, including the use of security certificates. The section explains how to configure disk storage, cloud storage, and storage unit groups to support stable backup operations. It also includes the configuration of standard and advanced backup policies and protection plans. Candidates are expected to understand specialized backup solutions such as synthetic backups, True Image Restore, multiple data streams, checkpoint restart, and different duplication methods that involve storage lifecycle policies, disk staging, and replication features.

Topic 3	<ul style="list-style-type: none"> • Monitor and Maintain NetBackup: This section of the exam measures skills of operations personnel and focuses on the monitoring and maintenance tasks necessary to keep a NetBackup environment healthy. The topics include the core concepts of image management and the use of the NetBackup Administration Console to verify images, expire them, import backup data, and perform manual duplication. The section explains how to manage both disk and cloud storage within NetBackup and highlights the use of reports for verification and monitoring. It also covers administrative controls for running, cancelling, suspending, resuming, and prioritizing backup or duplication jobs. Candidates learn how to initiate and monitor restore operations and understand the security management features such as role based access control and host ID certificates.
Topic 4	<ul style="list-style-type: none"> • Tune NetBackup: This section of the exam measures skills of system engineers and focuses on analyzing performance related factors in a NetBackup environment. It introduces performance assessment and optimization practices to help candidates identify bottlenecks and improve overall efficiency. Tuning NetBackup includes making adjustments that lead to more stable and faster backup and recovery operations.

New COH-285 Test Book & Valid Test COH-285 Fee

Our COH-285 study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the COH-285 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our COH-285 study engine.

Cohesity Certified Protection Professional – NetBackup Appliances Sample Questions (Q166-Q171):

NEW QUESTION # 166

Which step should an administrator perform to be able to view intrusion detection security events for multiple NetBackup Appliances from a central location?

- **A. configure an SDCS Management Server**
- B. configure syslog forwarding
- C. configure AutoSupport
- D. register the appliances in OpsCenter

Answer: A

NEW QUESTION # 167

Upon arriving at work on a Monday, an administrator sees several replication jobs that have failed with the following error message: no images were successfully processed

Which two reasons may be the cause for the error code? (Choose two.)

- **A. There is insufficient storage space on the target storage server.**
- B. There are insufficient tapes in the replication volume pool.
- C. The checkpoint restart is disabled for the replication jobs.
- D. The NetBackup host ID-based certificate was revoked.
- **E. There are network connectivity issues between the source and target domains.**

Answer: A,E

NEW QUESTION # 168

What is the benefit of using the staging schedule option in the Change Storage Units dialog box in NetBackup?

- A. It lets you specify when to verify backup images on one storage unit before they are duplicated to another.
- B. It lets you specify when to delete backup images from one storage unit after they are duplicated to another.
- **C. It lets you specify when to move backup images from one storage unit to another.**
- D. It lets you specify when to encrypt backup images on one storage unit after they are duplicated to another.

Answer: C

NEW QUESTION # 169

Which of the following is NOT a task that can be performed using Appliance Web Console?

- A. Managing clients
- **B. Creating policies**
- C. Viewing reports
- D. Backing up data

Answer: B

NEW QUESTION # 170

What is the purpose of the Staging Schedule option in the Change Storage Units dialog?

- **A. To define a schedule for moving backup data from the staging area to secondary storage**
- B. To configure a backup schedule for storage unit groups
- C. To set the maximum size of the staging area for backup data
- D. To specify the duration for which backup data is retained in the staging area

Answer: A

Explanation:

(The Staging Schedule option in the Change Storage Units dialog allows you to define a schedule for moving backup data from the staging area to secondary storage, enabling you to optimize your backup storage utilization and reduce storage costs.)

NEW QUESTION # 171
