It is easy for you to pass the VMCE_v12 exam because you only need 20-30 hours to learn and prepare for the exam. You may worry there is little time for you to learn the VMCE_v12 study tool and prepare the exam because you have spent your main time and energy on your most important thing such as the job and the learning and can't spare too much time to learn. But if you buy our VMCE_v12 Test Torrent you only need 1-2 hours to learn and prepare the VMCE_v12 exam and focus your main attention on your most important thing.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.
Topic 2	<ul style="list-style-type: none">Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Topic 3	<ul style="list-style-type: none">Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.

Topic 4	<ul style="list-style-type: none"> Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 5	<ul style="list-style-type: none"> Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 6	<ul style="list-style-type: none"> Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Topic 7	<ul style="list-style-type: none"> Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 8	<ul style="list-style-type: none"> Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 9	<ul style="list-style-type: none"> Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 10	<ul style="list-style-type: none"> Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 11	<ul style="list-style-type: none"> Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 12	<ul style="list-style-type: none"> Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 13	<ul style="list-style-type: none"> Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 14	<ul style="list-style-type: none"> Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 15	<ul style="list-style-type: none"> Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 16	<ul style="list-style-type: none"> Data protection strategies: This section of the exam covers an overview of data protection strategies.

Veeam VMCE_v12 Practice Exams In Online Format

We can assure to all people that our study materials will have a higher quality and it can help all people to remain an optimistic mind when they are preparing for the VMCE_v12 exam, and then these people will not give up review for the exam. On the contrary, people who want to pass the exam will persist in studying all the time. We deeply believe that the VMCE_v12 Study Materials from our company will be most suitable and helpful for all people.

Veeam Certified Engineer v12 Sample Questions (Q44-Q49):

NEW QUESTION # 44

A number of VMs are running as interdependent applications. They need to fail over, one by one, as a group. What method should be used to do this?

- A. Failover plan
- B. Replication plan
- C. Replica failover
- D. Planned failover

Answer: A

Explanation:

To ensure VMs running interdependent applications fail over one by one, as a group, the method to use is D: Failover plan. In Veeam Backup & Replication, a failover plan allows for the orchestration of a group of replicas to fail over in a predefined sequence. This includes the capability to set up delays between starting each VM, which is crucial for interdependent applications that must be started in a specific order to function correctly. The failover plan ensures that dependencies among the group are respected and that the startup sequence follows the correct order, enabling a smooth and organized transition to the failover state.

NEW QUESTION # 45

Company security policy states that backups must be copied to a remote location within 8 hours.

What step can a backup administrator take to receive an alert automatically if the backup copy job violates the company's policy?

- A. Set up post-thaw scripts to send an email
- B. Set a Data Protection alert in Enterprise Manager
- C. Set a backup copy window alert on the repository
- **D. Enable the appropriate RPO monitor**

Answer: D

Explanation:

To receive an automatic alert if the backup copy job violates the company's 8-hour policy for copying backups to a remote location, the backup administrator should enable the appropriate Recovery Point Objective (RPO) monitor. This feature tracks the age of the latest backup and alerts when it exceeds the defined RPO. References: Veeam Backup & Replication Documentation, Veeam RPO Monitoring and Reporting Guide

NEW QUESTION # 46

Which of the following statements are true regarding backup copy jobs in Veeam Backup & Replication? (Choose two.)

- A. The backup copy job creates a single file with multiple restore points included within for archival purposes
- B. During the backup copy job process, a VM snapshot is created for consistency
- **C. Retention settings maintain the desired number of restore points as well as offer optional GFS for archival purposes**
- D. Backup copy jobs copy entire VBK, VIB, or VRB files from the source backup repository to the target backup repository
- **E. The backup copy job creates a forever forward incremental backup chain**

Answer: C,E

Explanation:

https://helpcenter.veeam.com/docs/backup/vsphere/about_backup_copy.html?ver=100

NEW QUESTION # 47

What is the main advantage of using the Backup from Storage Snapshots feature?

- A. It does not create VMware snapshot(s).
- **B. It decreases the amount of time the VM is running on a VMware snapshot.**
- C. It speeds up the backup process.
- D. It saves space in the repository.

Answer: B

Explanation:

Explanation

The backup process is going to take the same amount of time, but the commit operation of the vmware snapshot has shorter duration when working with storage snapshots

A healthcare company is running a critical clinical application on a Red Hat server that must run on bare-metal hardware. The server is backed up with Veeam Agent for Linux. The server has to be recovered completely due to a software error. Which of the following is the correct recovery method to restore the entire server?

- A. Perform a full recovery using the Veeam Backup & Replication interface.
- B. Boot from the Veeam Recovery Media and then restore the whole server.
- C. Export the backup files as a virtual disk and mount to an existing Linux virtual machine.
- D. Reinstall Red Hat and restore the volumes from the Linux Agent backups.
