

值得信賴的NCP-EUC最新考題和資格考試領導者和準確的NCP-EUC: Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam

此外，這些VCESoft NCP-EUC考試題庫的部分內容現在是免費的：https://drive.google.com/open?id=1j11LnE2_Gdjfpctfd3OyW5IzvaNwP20f

如果你選擇了VCESoft的幫助，我們一定不遺餘力地幫助你通過考試。而且我們還會為你提供一年的免費的更新考試練習題和答案的售後服務。不用再猶豫了！請選擇VCESoft，它將會是你通過NCP-EUC認證考試的最好保證。快將VCESoft加入你的購物車吧！

Nutanix是雲軟件和超融合基礎架構解決方案的領先提供商，旨在簡化IT操作和基礎架構管理。隨著組織繼續接受數字化轉型，最終用戶計算（EUC）已成為提供無縫用戶體驗的重要方面。Nutanix認證的專業 - 最終用戶計算（NCP-EUC）認證考試旨在測試與Nutanix EUC解決方案合作的IT專業人員的技能和知識。

Nutanix NCP-EUC 考試是專為與 Nutanix 解決方案相關的 IT 專業人員而設計的一項寶貴的證書考試。它涵蓋與終端用戶計算相關的廣泛主題，驗證考生在部署和管理 VDI 解決方案方面的專業知識。此證書在 IT 行業中具有很高的價值，可以幫助 IT 專業人員在事業中不斷進步。

Nutanix NCP-EUC（Nutanix認證專業 - 用戶端計算）考試是一項認證計劃，旨在驗證與Nutanix解決方案在用戶端計算環境中工作的IT專業人士的技能和知識。Nutanix是一家領先的云計算軟件和超融合基礎設施解決方案提供商。NCP-EUC認證計劃旨在幫助IT專業人士深入了解Nutanix技術，並展示他們在為最終用戶部署、管理和支持Nutanix解決方案方面的能力。

授權的NCP-EUC最新考題擁有模擬真實考試環境與場境的軟件VCE版本 & 精心準備的NCP-EUC: Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam

要想一次性通過Nutanix NCP-EUC 認證考試您必須得有一個好的準備和一個完整的知識結構。VCESoft為你提供的資源正好可以完全滿足你的需求。

最新的 Nutanix Certified Professional (NCP) NCP-EUC 免費考試真題 (Q170-Q175):

問題 #170

An administrator is investigating a complaint about poor performance and slow response times for a virtual desktop environment. The administrator has obtained the following statistics from the environment:

- * vCPU to pCPU ratio is 4:1
- * VM Guest OS is Windows 10
- * VMs are configured with 4 vCPUs each
- * VM Guests are configured with 16GB of RAM
- * The SSD cache tier is 85% full, and the capacity tier is 45% full
- * Host CPU utilization is < 40%

What is the most likely cause of the poor performance?

- A. Capacity tier is over-provisioned.
- **B. SSD Cache tier is over-committed.**
- C. vCPU to pCPU ratio is too high.
- D. VM RAM is over-provisioned.

答案： B

解題說明：

The performance statistics indicate that the SSD Cache tier is 85% full, which is the primary bottleneck. In a Nutanix cluster, the SSD tier serves as the high-performance "Hot Tier" (Extent Store and Oplog) for active data. When the SSD tier utilization exceeds recommended thresholds (typically above 75-80%), the system must aggressively destage data to the slower HDD Capacity tier to free up space for incoming writes.

This destaging process and the lack of available SSD space for the active working set (WS) force read and write operations to be served from the slower Capacity tier (HDD), resulting in significantly higher latency and "sluggish" desktop performance. The vCPU ratio (4:1) and Host CPU (< 40%) are well within healthy limits, ruling out CPU contention.

問題 #171

A multisite App Volumes deployment uses a stretched database over multiple Horizon View sites. Non- Attachable volumes will be used to support replication of AppStacks between blocks and pods.

What should the administrator do to be able to replicate AppStacks between the Nutanix clusters?

- **A. Utilize the native async disaster recovery technology to replicate the AppStacks between the Nutanix clusters.**
- B. Replicate the .vmdk files and AppStacks permissions using a script between the Nutanix clusters,
- C. Leverage an external storage system such as NFS NAS to support the non-attachable
- D. storage container on the primary cluster to at least one host in other Nutanix clusters,

答案： A

解題說明：

regarding replicating AppStacks between Nutanix clusters, it is likely that the correct answer would involve configuring some form of replication or disaster recovery technology on the Nutanix clusters themselves.

問題 #172

A company has deployed Horizon on a Nutanix cluster running the ESXi hypervisor. They are starting the configuration for the deployment of 1000 virtual desktops running Windows 10 in a Linked Clone Desktop Pool.

The company has these requirements:

- * Reduced time for initial virtual desktop deployment
- * Fast recompose time when updating the pool with patches and new application installs
- * Provide a high level of availability to the pool

What should the company enable, that will allow this Nutanix VDI implementation to meet the stated requirements?

- A. Separate datastores for replicas and clones
- B. View Storage Accelerator
- C. VM disk space reclamation
- **D. View Composer API for Array Integration**

答案： D

解題說明：

View Composer API for Array Integration (VCAI) is a feature of VMware Horizon that leverages the native cloning abilities in the storage array to offload storage operations within a VMware View environment¹². This feature allows customers to offload the creation of linked clones to the storage array³.

問題 #173

An administrator wants to utilize bidirectional replication to ensure that the user profile is present in both sites. This will allow the user to move between physical sites and access data locally.

What feature should the administrator configure to provide this functionality?

- A. Data Consolidation
- B. Smart DR
- C. VDI Sync
- D. Files DR

答案： C

解題說明：

To achieve the requirement of bidirectional replication where a user can access their profile data locally at either site (Active-Active profile availability), the administrator should configure VDI Sync.

VDI Sync is a specialized configuration within the Nutanix Files ecosystem designed to synchronize User Profile directories across distributed file server instances. Unlike standard one-way Disaster Recovery (Smart DR) which is designed for failover, VDI Sync ensures that changes made to a profile at Site A are replicated to Site B, and vice-versa, allowing users to roam between physical locations while maintaining a consistent, local copy of their profile data.

問題 #174

Which management console provides different wizard-based deployment or configuration scenarios to publish resources using desktops applications?

- A. Prism Element
- B. Citrix Studio
- C. Prism Central
- D. MMC

答案： B

解題說明：

Citrix Studio is the primary management console for the Citrix Virtual Apps and Desktops (or Citrix DaaS) site.⁷ It is explicitly designed with wizards to guide administrators through deployment scenarios, such as creating Machine Catalogs (provisioning VMs) and Delivery Groups.

It is specifically within the Delivery Groups wizard in Citrix Studio that an administrator configures the publishing of resources (such as applications and desktops) and assigns them to users.⁸ While Prism Central manages the underlying Nutanix infrastructure (VMs, networking), it does not handle the session brokering or the specific definition of "published resources" for the VDI users.

問題 #175

.....

如果你覺得你購買VCESoft Nutanix的NCP-EUC考試培訓資料利用它來準備考試是一場冒險，那麼整個生命就是一場冒險，走得最遠的人常常就是願意去做願意去冒險的人。更何況VCESoft Nutanix的NCP-EUC考試培訓資料是由眾多考生用實踐證明了，它帶給每位考生的成功也是真實有效的，成功有夢想和希望固然重要，但更重要的是去實踐和證明，VCESoft Nutanix的NCP-EUC考試培訓資料是被證明一定會成功的，選擇了它，你還有什麼理由不成功呢！
