300-215 Latest Exam Price & 100% 300-215 Exam Coverage

Cisco 300-215 learning materials help you to easily acquire the Conducting Forensic Analysis & Incident Response Using Cisco Technologies for CyberOps 300-215 certification even if you have never touched the relative knowledge before. With our 300-215 Exam Questions, you will easily get the favor of executives and successfully enter the gates of famous companies.

Cisco Conducting Forensic Analysis & Incident Response Using Cisco Technologies for CyberOps Sample Questions (Q126-Q131):

NEW QUESTION # 126

Refer to the exhibit.

According to the Wireshark output, what are two indicators of compromise for detecting an Emotet malware download? (Choose two.)

- A. Domain name:iraniansk.com
- B. Content-Type: application/octet-stream
- C. Hash value: 5f31ab113af08=1597090577
- D. filename= "Fy.exe"

- E. Server: nginx

Answer: B,C

NEW QUESTION # 127

Which technique exemplifies an antiforensic technique?

- A. steganalysis
- **B. steganography**
- C. data replication
- D. stepheorology

Answer: B

NEW QUESTION # 128

Drag and drop the capabilities on the left onto the Cisco security solutions on the right.

Answer:

Explanation:

NEW QUESTION # 129

Refer to the exhibit.

A web hosting company analyst is analyzing the latest traffic because there was a 20% spike in server CPU usage recently. After correlating the logs, the problem seems to be related to the bad actor activities. Which attack vector is used and what mitigation can the analyst suggest?

- **A. Brute-force attack; implement account lockout policies and roll out MFA.**
- B. SQL Injection; implement input validation and use parameterized queries.
- C. Phishing attack; conduct regular user training and use email filtering solutions.
- D. Distributed denial of service; use rate limiting and DDoS protection services.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

The log entries show repeated SSH login attempts for various invalid usernames (e.g., admin, phoenix, rainbow, test, user, etc.) from different source ports. These are clear signs of a brute-force attack-an automated process trying multiple usernames and passwords in hopes of gaining access.

Mitigating such attacks includes:

* Implementing account lockout policies (e.g., locking an account after several failed login attempts).

* Enabling Multi-Factor Authentication (MFA) to ensure that password guessing alone is insufficient for account access.

Therefore, the correct answer is:

D). Brute-force attack; implement account lockout policies and roll out MFA.

NEW QUESTION # 130

An engineer received a report of a suspicious email from an employee. The employee had already opened the attachment, which was an empty Word document. The engineer cannot identify any clear signs of compromise but while reviewing running processes, observes that PowerShell.exe was spawned by cmd.exe with a grandparent winword.exe process. What is the recommended action the engineer should take?

- **A. Upload the file signature to threat intelligence tools to determine if the file is malicious.**
- B. Contain the threat for further analysis as this is an indication of suspicious activity.
- C. Monitor processes as this a standard behavior of Word macro embedded documents.
- D. Investigate the sender of the email and communicate with the employee to determine the motives.

Answer: A

NEW QUESTION # 131

.....

If you study with our 300-215 exam questions, then you are better than others, and of course you will get more opportunities. You will never be picked by others. You will become the target of business competition! This will be a happy event! You must understand what it means in this social opportunity. You can get your favorite project and get a higher salary! Our 300-215 simulating exam can give you more than just the success of an exam, but also the various benefits that come along with successful 300-215 exams.
