Understanding functional and technical aspects of ACP-100 Jira Administration for Data Center and Server Install and Set Up Qlik Sense Enterprise

The following will be discussed in **ATLASSIAN ACP-100 exam dumps**:

- Identify and troubleshoot the appropriate configuration of an outgoing email server
- Given a workflow, describe which attributes will and will not be imported/exported
- Modify Jira configuration settings to match the organization's requirements (look and feel, logo, website links in the application navigator, default language)
- Given a scenario, recommend whether or not to upgrade and determine the effects of roll-back
- Evaluate the need for re-indexing following a set of modifications, and explain the effects of re-indexing
- Judge the appropriate content for the system dashboard, user/team dashboards, and filter columns for an organization
- Determine which global settings to modify to meet provided business requirements (attachment options, issue links, time tracking, subtasks, white list, general configurations)
- Troubleshoot application-level problems with Jira (logging and profiling) and escalate when appropriate
- Recognize the benefits of having production and non-production instances

Taking the ATLASSIAN ACP-100 (Jira Administrator) Exam is essential for professionals who want to prove their knowledge of Jira and advance their careers. Upon passing the exam, you can demonstrate your expertise in administering Jira, and your

certification will provide evidence to potential employers of your skills and experience. By becoming a certified Jira Administrator, you will join a community of professionals who share a similar skill set and have proven their commitment to the software.

Pass Guaranteed Quiz 2026 Fantastic ATLASSIAN Frenquent ACP-100 Update

There are three versions of ACP-100 training materials for the candidate of you, and different versions have different advantages, you can use it in accordance with your own habit. Free update for each version for one year, namely, you don't need to buy the same version for many times, and the update version will send to you automatically. The ACP-100 Exam is a performance-based exam that consists of a set of tasks that need to be completed within a given time frame. Individuals who pass the exam demonstrate their ability to configure and manage Jira Software environments, including user management, project management, issue tracking, and workflow customization. Jira Administration for Data Center certification is recognized as a mark of excellence in Jira administration and is highly valued by organizations that use Jira Software.

ATLASSIAN Jira Administration for Data Center Sample Questions (Q35-Q40):

NEW QUESTION # 35
A manager complains that Issues occasionally appear in a project with a strange new issue type that was not available when the project was originally configured last year.
Which is the root cause?

- A. The project uses the Default Issue Type Screen Scheme.
- B. A workflow post function is creating issues in the project.
- C. The project uses the Default Issue type Scheme.
- D. An automation rule is creating issues in the project

Answer: C

NEW QUESTION # 36
Currently, users enter information using two custom fields. Company and Product of type Select List (single choice). Several values are shown below.
* Company: Atlassian. Apple
* Product: Jira Software, Confluence. iPhone, iPad, W
Currently, users can select an invalid combination such as "Atlassian iPhone".
You need to replace the two fields with a single field so that users can only select a single valid combination such as "Atlassian Jira Software".
Which field should you use?

- A. system field Labels
- B. system field Fix Version/s
- C. custom field of type Checkboxes
- D. custom field of type Select List (cascading)
- E. custom field of type Select List (multiple choices]

Answer: D

NEW QUESTION # 37
Jan asked you to create a new Select List custom field called Department for his project MCAS.
You created the field in the morning. In the afternoon, Jan notes that his Jira dashboard is not showing the field correctly. He asks to help him troubleshoot.
View the Exhibit to see Jan's entire dashboard.

* The first gadget shows 26 issues in the project by Status.
* The second gadget shows that there are three issues that have the new Department field set.
* The last gadget shows "No Data Available". The filter query for that gadget is "project=MCAS and Department is empty."
□
Why does Jan's gadget say "No Data Available"?

- A. The field context on the Department field was not set to allow empty values.
- B. There is issue security on the issues.
- C. Jan does not have the proper Browse permissions.
- D. The field is marked Optional in the Field Configuration.
- E. The JQL query for the filter is not valid.
- F. You created the field Department but did not re-index the MCAS project.

Answer: A

NEW QUESTION # 38
You have a project with several issue types, associated unique workflows, and a number of components.
The decision has been made to have all new issues assigned automatically.
To that end, you've set default assignee(s) for the project lead, component leads, and removed the Assignee field from the screens associated with the Create Issue operation.
One of the issue types is still being created without an Assignee.
What is the most likely cause of the problem?

- A. Users creating this issue type do not have the Assign Issue permission.
- B. The issue type's field configuration for Component/s is not set to Required.
- C. The assignee is being set to Unassigned in the first post-function of the create transition.
- D. The default assignee for the issues' component is still set to Unassigned.
- E. The post function Assign to Lead Developer is missing in the create transition.

Answer: C

NEW QUESTION # 39
In your organization, a cobbler leads a Jira project with two issue types:
* Shoe Order
* Repair
The cobbler has given you the following requirements:
1. All screens should use the Summary, Description, Due Date, and Components fields.
2. Both issue types need to use a new custom field called Shoe Type on all screens.
3. The Priority field should appear on all screens for Repair issues.
4. Users should not be able to set the Priority for Shoe Orders during creation, but the Priority field still needs to be editable and viewable after creation.
Identify the minimum number of screens and screen schemes that will meet the requirements.

- A. six screens and one screen scheme
- B. two screens and one screen scheme
- C. one screen and one screen scheme
- D. three screens and one screen scheme
- E. two screens and two screen schemes
- F. six screens and two screen schemes

Answer: B
