As the old saying goes people change with the times. People must constantly update their stocks of knowledge and improve their practical ability. Passing the test MB-335 certification can help you achieve that and buying our MB-335 study materials can help you pass the test smoothly. Our system is strictly protect the clients' privacy and sets strict interception procedures to forestall the disclosure of the clients' private important information. Our system will automatically send the updates of the MB-335 Study Materials to the clients as soon as the updates are available. So our system is wonderful.

Microsoft MB-335 certification exam is an essential certification for professionals who want to advance their careers in the field of supply chain management. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification demonstrates to potential employers that the candidate has the knowledge and skills necessary to effectively manage supply chain operations using Dynamics 365. It also provides an opportunity for professionals to gain recognition for their expertise in the field and to stand out from their peers.

Microsoft MB-335 exam is designed to test the knowledge and skills of individuals who want to become Microsoft Dynamics 365 Supply Chain Management Functional Consultants. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification exam measures the candidate's ability to implement and configure the Dynamics 365 Supply Chain Management application to meet the needs of an organization. MB-335 Exam is intended for those who have experience with implementing and configuring Dynamics 365 Supply Chain Management, and those who have a strong understanding of supply chain management concepts and processes.

Microsoft MB-335 certification exam is for Dynamics 365 professionals who plan, implement, and manage supply chain management solutions for businesses. MB-335 exam is aimed at supply chain management professionals who have the expertise to implement Dynamics 365 Supply Chain Management solutions effectively. The MB-335 certification exam is part of the requirements needed to become a Dynamics 365 Supply Chain Management Functional Consultant Expert—a sought-after professional in the industry who helps organization optimize their supply chain management processes.

The Best Pass MB-335 Guarantee | Amazing Pass Rate For MB-335: Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert | Trustable MB-335 Training Kit

As indicator on your way to success, our MB-335 practice materials can navigate you through all difficulties in your journey. Every challenge cannot be dealt like walk-ins, but our MB-335 simulating practice can make your review effective. That is why our MB-335 study questions are professional model in the line. With high pass rate as more than 98%, our MB-335 exam questions have helped tens of millions of candidates passed their exam successfully.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q54-Q59):

NEW QUESTION # 54

A manufacturing company is implementing Dynamics 365 Supply Chain Management.

The company has three operations in the production of a finished good. The first operation assembles the product, the second operation sends the product to a subcontractor to do a custom welding job on the product, and the final operation is painting the finished good.

The controller requires that the semifinished item is physically and financially recorded in the general ledger while at the subcontractor location.

You need to configure the requirements.

What should you configure?

- A. Create a vendor warehouse for the subcontracted product
- B. Post an inventory adjustment journal.
- C. Set inventory status to Subcontractor.
- D. Set the batch disposition code.

Answer: A

NEW QUESTION # 55

You are a production manager at a company which produces large batches of coffee and creamers.

After a quality inspection, batch 120008 of your cold brew coffee (item number CB-0001) was found to be too acidic and must be reworked.

You need to add 20 grams of sugar and stir the product for an additional 0.5 hours.

What three actions are required on the rework order? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete all route operations except for a half an hour stirring operation.
- B. Delete all items from the production formula except for 20 grams of sugar.
- C. Add 20 grams of sugar to the production formula.
- D. Add a route operation for 0.5 run time hours of stirring.
- E. Manually reserve batch 120008 after estimating the batch order.

Answer: C,D,E

Explanation:

The correct answer is B, C, and E. Here is the explanation:

* To rework a batch order in Dynamics 365 Supply Chain Management, you need to create a new batch order and set the Rework batch toggle to Yes¹. You also need to select the Batch number of the original batch that needs to be reworked¹. The new batch order will have only one formula line that represents the original batch, and no route operations¹.

* To add 20 grams of sugar and stir the product for an additional 0.5 hours, you need to do the following actions on the rework order:

* Add 20 grams of sugar to the production formula. You can do this by clicking on the Formula option on the All production orders form and adding a new formula line for sugar with a quantity of 20 grams¹. You can also specify the ingredient type for sugar, such as Compensating or Filler².

* Add a route operation for 0.5 run time hours of stirring. You can do this by clicking on the Route option on the All production orders form and adding a new route operation for stirring with a run time of 0.5 hours¹. You can also specify the resource or resource group that will perform the stirring operation³.

* Delete all route operations except for a half an hour stirring operation. You can do this by clicking on the Route option on the All production orders form and deleting any existing route operations that are not related to stirring¹. This way, you can avoid unnecessary steps and costs for the rework order.

NEW QUESTION # 56

A manufacturing company is implementing production in Dynamics 365 Supply Chain Management.

The production scheduler requires that machines not be scheduled to run concurrently when planning production. The scheduler also must be able to see the scheduling in a graphical view.

You need to configure the system to meet the requirements.

Which three options should you configure? Each answer presents a partial solution.

NOTE: Each correct selection is worth one point.

- A. job scheduling

- B. operations scheduling
- C. Capable to Promise
- D. bottleneck resource
- E. finite capacity

Answer: A,B,E

NEW QUESTION # 57

You need to configure system attributes.

Which attribute types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 58

A manufacturer is implementing Dynamics 365 Supply Chain Management to create blends of oil and industrial lubricant.

The manufacturer requires detailed documentation for the production order process before manufacturing begins for the products.

The shop floor must review, approve, and anticipate all production runs. Before production starts, the manufacturer wants to ensure that the order can be completed by a certain timeframe based on capacity.

You need to define the production life cycle stages.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□

Explanation

To define the production life cycle stages, you should perform the following actions in sequence:

Create a production order. A production order is a document that authorizes the production of a specific product or product variant in a given quantity on a specific date¹. You can create a production order manually, from a sales order line, or from master planning execution².

Estimate the order. Estimating a production order calculates the material and capacity requirements for the order based on the bill of materials (BOM) and the route³. You can also estimate the cost and revenue of the order based on the planned consumption and output.

Schedule production jobs. Scheduling production jobs determines the start and end dates and times for each operation in the route based on the available capacity, efficiency, and calendar of the resources.

You can use either operations scheduling or job scheduling methods to schedule production jobs.

Release the order. Releasing a production order makes it available for picking, production, and reporting activities. You can release an order manually or automatically based on a release rule that specifies criteria such as site, warehouse, status, priority, or start date.

Generate a picking list. A picking list is a document that lists the materials that must be picked from inventory and consumed for production. You can generate a picking list for an entire production order or for selected jobs or operations within an order.

1: Production process overview 2: Production order lifecycle overview 3: Estimate a production order :

[Estimate cost and revenue for a production order] : [Schedule production jobs] : [Scheduling methods] :

[Release a production order] : [Release rules] : [Picking list overview] : [Generate picking lists]

NEW QUESTION # 59

.....

The pass rate for MB-335 training materials is 98.65%, and you can pass the exam just one time if you choose us. We have a professional team to collect and research the first-hand information for the exam, and therefore you can get the latest information if you choose us. In addition, MB-335 exam materials cover most of knowledge points for the exam, and you can pass the exam as well as improve your professional ability in the process of learning. We have online and offline service. If you have any questions for MB-335 Exam Braindumps, and you can contact with us, and we will give you reply as soon as possible.
