## AD0-E725 Reliable Test Materials, AD0-E725 Trustworthy Exam Torrent

As we all know, it is a must for all of the candidates to pass the AD0-E725 exam if they want to get the related AD0-E725 certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you. We will bring you integrated AD0-E725 Exam Materials to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times. Before your purchase, you can free download the demo of our AD0-E725 exam questions to check the outstanding quality.

### Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I</li> <li>O events and webhooks to create automated and connected business processes.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.</li> </ul>

## Adobe Commerce Developer Expert Sample Questions (Q29-Q34):

### NEW QUESTION # 29

A new critical security vulnerability is found on Adobe Commerce Cloud. The successful exploitation may lead to arbitrary code execution, so the Developer must apply a security patch file given by Adobe as soon as possible to ensure system security. How should the Developer apply the security patch on Adobe Commerce hosted on cloud infrastructure according to best practices?

- A. Upgrade Adobe Commerce to the latest security patch release
- B. Copy a security patch to m2-hotfixes directory
- C. Apply a security patch using composer.json

**Answer: B**

### NEW QUESTION # 30

An Adobe Commerce Cloud Developer is tasked with investigating slow page loads and intermittent errors reported by a client after a recent deployment to their Pro Production environment.

Which action should the Developer use to quickly access and analyze the necessary data?

- A. Go to New Relic Log Management to access aggregated log data, allowing the analysis of application, infrastructure, CDN, and WAF errors.
- B. Access Cloud Console to review environment messages and deployment logs that took place during the previous deployment to production.
- C. Connect via SSH into each production node to review system and application logs independently for a more accurate representation of issues being logged.

**Answer: A**

Explanation:

In Adobe Commerce Cloud Pro Production, logs are spread across multiple nodes, so manually checking each node (A) is inefficient. The correct approach is to use New Relic Log Management, which aggregates logs from all services and nodes. This allows developers to quickly analyze application logs, infrastructure logs, CDN, and WAF errors in one place.

A is inefficient and not recommended.

C only shows deployment logs, not ongoing runtime errors.

B is correct: New Relic Log Management is the single source of truth for performance and error analysis.

Reference:

Adobe Commerce Cloud DevDocs - Log management with New Relic

### NEW QUESTION # 31

An Adobe Commerce Expert is tasked with implementing a custom condition on salable quantity with reservations. The condition needs to be applicable only when added to cart. Which option should the Developer implement?

- A. `<virtualType name="IsProductSalableForRequestedQtyConditionChainOnAddToCart">`  
    `<arguments>`  
    `<argument name="conditions" xsi:type="array">`  
    `<item name="is_salable_with_reservations" xsi:type="array">`  
    `<item name="object" xsi:type="object"`  
    `>Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC`  
    `/item>`  
    `</item>`  
    `</argument>`  
    `</arguments>`  
    `</virtualType>`
- B. `<type name="Magento\InventoryApi\Model\Stock\ValidatorChain">`  
    `<arguments>`  
    `<argument name="validators" xsi:type="array">`  
    `<item name="is_salable_with_reservations" xsi:type="object"`  
    `>Vendor\InventorySales\Model\Stock\Validator\IsSalableWithReservationsValidator</item>`  
    `</argument>`  
    `</arguments>`  
    `</type>`
- C. `<preference for="`  
    `Magento\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC type="`  
    `Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsCo`  
    `>`

**Answer: A**

Explanation:

To add a custom salable quantity condition for use only during the add-to-cart flow, developers must extend the `IsProductSalableForRequestedQtyConditionChainOnAddToCart` virtual type. This chain is designed specifically for cart validation, ensuring the new condition runs only at that stage.

A would override the core class completely, not scoped to add-to-cart.

B relates to stock validator chains, not salable quantity conditions.

C is correct: defining a virtual type extension ensures proper conditional logic for reservations during cart validation.

Adobe Commerce DevDocs - MSI salable quantity conditions

### NEW QUESTION # 32

A Developer is writing an integration test. The functionality being tested has many admin area configurations that need to be tested. Which DocBlock annotation should be used to allow configuration settings to be manipulated for testing purposes?

- A. `@testAdminArea`
- B. `@testAdminConfigFixture`
- C. `@testConfigFixture`

**Answer: C**

Explanation:

The correct annotation is `@testConfigFixture`. It allows developers to set or override configuration values during tests.

A does not exist.

B does not exist.

C is correct: `@testConfigFixture` provides a way to programmatically adjust admin configurations for the scope of the test.

### NEW QUESTION # 33

A Developer needs to replicate a recent issue that occurred in the staging environment so it can be tested locally. The Developer decides to dump the staging database and import it into the local setup. Which command should the Developer use to do this?

- A. magento-cloud snapshot:db-dump
- B. vendor/bin/ece-tools db-dump
- C. vendor/bin/ece-tools db-snapshot

**Answer: B**

Explanation:

The correct way to dump a database from an Adobe Commerce Cloud environment is with the vendor/bin/ece- tools db-dump command.

A (db-snapshot) is not a valid ece-tools command.

B is incorrect: magento-cloud snapshot commands are for managing whole environment snapshots, not direct DB dumps.

C is correct: ece-tools db-dump provides the database export for staging/local replication.
