P.S. Free & New ACD201 dumps are available on Google Drive shared by BraindumpQuiz: https://drive.google.com/open?id=1ZNQAhOnaEN-_IL62oicrB2dQzRanj6j9

Firstly, our company always feedbacks our candidates with highly-qualified ACD201 study guide and technical excellence and continuously developing the most professional ACD201 exam materials. Secondly, our ACD201 training materials persist in creating a modern service oriented system and strive for providing more preferential activities for your convenience. Last but not least, we have free demos for your reference, as in the following, you can download which ACD201 Exam Braindumps demo you like and make a choice.

Appian ACD201 Exam Syllabus Topics:

Section	Weight	Objectives
Application Design and Development	28%	- Apply UX and design best practices - Manage object security and reusability - Build end-to-end applications - Translate requirements into technical design
Performance and Scalability	22%	- Design for scalability and high availability - Apply caching and data optimization strategies - Monitor and tune system performance - Optimize application performance
Data Management	20%	- Design and document data models - Optimize and secure record types - Implement complex data structures and integrations - Work with relational data and transformations

Platform and Application Management	28%	- Manage application deployment and versioning - Apply security and permission models - Configure Administration Console - Troubleshoot applications using logs, dashboards and tools
Advanced Appian Concepts	18%	- Design and implement integrations and APIs - Apply advanced expression and rule logic - Evaluate and use smart services and plug-ins - Configure authentication and SSO

Online ACD201 Training Materials & Exam ACD201 Outline

If you are going to buy ACD201 learning materials online, and concern the privacy protection, you can choose us. We respect private information of you. If you choose us, your private information will be protected well. Once the order finishes, your personal information such as your name and email address will be concealed. Moreover, ACD201 Exam Materials contain both questions and answers, and it's convenient for you to have a check after practicing. We offer you free update for one year for ACD201 training materials, and the update version will be sent to your email address automatically.

Appian Senior Developer Sample Questions (Q49-Q54):

NEW QUESTION # 49

You need to create a new database schema using a connected data source system.

What should you do?

Note: To answer, move all steps from the Options list to the Answer List area and arrange them in the correct order.

0	Copy the credentials and connection URL.	0	
0	Create separate schemas for each application or suite of applications that you want to secure using the <code>AppianProcess.createNewSchema()</code> stored procedure.	0	
0	Create a MariaDB Data Source connected system for each schema using the credentials.	0	
0	Put users in the Database Editors group to allow them to make changes in the new database schema through phpMyAdmin. Put users in the Database Viewers group to give them read-only permissions in phpMyAdmin.	0	

Answer:

Explanation:

0	Copy the credentials and connection URL.	0	Copy the credentials and connection URL.
0	Create separate schemas for each application or suite of applications that you want to secure using the <code>ApplanProcess.createNewSchema()</code> stored procedure.	0	Create separate schemas for each application or suite of applications that you want to secure using the <code>ApplanProcess.createNewSchema()</code> stored procedure.
0	Create a MariaDB Data Source connected system for each schema using the credentials.	0	Create a MariaDB Data Source connected system for each schema using the credentials.
0	Put users in the Database Editors group to allow them to make changes in the new database schema through phpMyAdmin. Put users in the Database Viewers group to give them read-only permissions in phpMyAdmin.	0	Put users in the Database Editors group to allow them to make changes in the new database schema through phpMyAdmin. Put users in the Database Viewers group to give them read-only permissions in phpMyAdmin.

NEW QUESTION # 50

A local variable is reevaluated every time a form loads and you notice subsequent slow performance of the form. Which two steps could you perform to optimize this? (Choose two.)

- A. Avoid executing queries every time a form reevaluates.
- B. Create a local variable inside with () for faster reevaluation.
- C. Ensure the local variable only updates when a referenced variable is modified or when it's being updated in the `saveInto` parameter of a component.
- D. Ensure the local variable is refreshed after a specified interval, and not refreshed when referenced variable are changed.

Answer: A,C

Explanation:

Avoiding queries on every form reevaluation prevents unnecessary data retrieval and improves form performance. Ensuring the local variable only updates when necessary (e.g., on relevant variable changes or via `saveInto`) reduces redundant recalculations and optimizes responsiveness.

NEW QUESTION # 51

In reviewing the process model metrics of your application, you notice a process model with a completion rate of only 10%. What are two possible reasons for this low completion rate? (Choose two.)

- A. The process contains at least one User Input Task with no exceptions or escalations, and users do not complete the task.
- B. There are a significant number of instances that are experiencing process errors, which are not being handled by the production support team.
- C. There are a high number of smart service nodes configured in the process model.
- D. The days configured for archival or deletion is significantly higher than the other process models in your application.

Answer: A,B

Explanation:

Process errors that remain unhandled will stall instances; those instances never reach an end event, driving the completion rate down. User-input tasks without deadlines, exceptions, or escalations can sit indefinitely when users do not act, leaving instances in an active state and lowering the overall completion percentage.

NEW QUESTION # 52

You need to implement a field-level audit functionality on the application data, and then display a log of the changes made over time to the users. What should you do?

- A. Create Audit table(s) and create triggers on each transaction table to record modifications into the Audit table.

- B. Create Audit table(s) and create stored procedures on each transaction table to compare and save the modified data.
- C. Create utility process model(s) to insert new version of the modified data for the same record into the transaction tables on modification.

Answer: A

Explanation:

Creating audit tables and using triggers on each transaction table ensures that all field-level changes are automatically recorded at the database level, providing a reliable and consistent audit log for display to users.

NEW QUESTION # 53

An insurance company's product details are currently distributed across numerous database tables, encompassing over 60 to 70 fields.

You need to implement a product comparison tool for business users to compare up to three insurance products simultaneously, with all the product details in a tabular format.

Refer to the following sample format:

Attribute	PRODUCT 1	PRODUCT 2	PRODUCT 3
Name			
Type			
Premium			
Average			
Claim time			

Which object should be used to transform the data into the required format?

- A. Stored procedure
- **B. VCCViews**
- C. Record type with relationships

Answer: B

Explanation:

Database views are ideal for transforming complex, distributed product data into a single, flattened structure tailored for reporting or comparison. In this case, a view can pivot the 60-70 fields and organize them by attribute (e.g., Name, Type, Premium) across multiple product columns, enabling a tabular comparison layout like the one shown. Views also optimize performance and reduce transformation overhead in the interface layer.

NEW QUESTION # 54

.....

BraindumpQuiz is a leading provider of top-quality Appian Senior Developer (ACD201) preparation material for the ACD201 test. Our Appian Senior Developer (ACD201) exam questions are designed to help customers get success on the first try. These latest Appian ACD201 Questions are the result of extensive research by a team of professionals with years of experience.
