In modern society, innovation is of great significance to the survival of a company. The new technology of the C\_S4TM\_2023 study materials is developing so fast. So the competitiveness among companies about the study materials is fierce. Luckily, our company masters the core technology of developing the SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management study materials. No company in the field can surpass us. So we still hold the strong strength in the market. At present, our C\_S4TM\_2023 study materials have applied for many patents. We attach great importance on the protection of our intellectual property. What is more, our research center has formed a group of professional experts responsible for researching new technology of the C\_S4TM\_2023 Study Materials. The technology of the C\_S4TM\_2023 study materials will be innovated every once in a while. As you can see, we never stop innovating new version of the C\_S4TM\_2023 study materials. We really need your strong support.

## SAP C\_S4TM\_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Transportation Planning: The sub-topics here include network setup, profile configuration, and VSR optimizer calibration for automatic planning, all essential for efficient transportation planning.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Managing Clean Core: This topic discusses the evaluation and application of clean core principles to maximize agility, reduce effort, and accelerate innovation in ERP systems.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Charge Calculation &amp; Freight Settlement: Setup, integration, and cost distribution are the key sub-topics here. This topic also covers freight contracts and strategic procurement and selling.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Transportation Management for Logistics Service Provider (LSP): This topic focuses on order management and transportation processes specific to LSPs, including forwarding orders.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Master Data: Master data definition, including logistical and financial data, is essential for effective transportation management and is covered here.</li> </ul>

## Study C\_S4TM\_2023 Group 100% Pass | Professional C\_S4TM\_2023: SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management 100% Pass

For most people who have no much time to prepare the SAP real exam, latest C\_S4TM\_2023 exam questions will be your excellent partner to help you get high passing score in the valid test. Once you receive our C\_S4TM\_2023 Dumps Torrent, it will just need one or two days to practice test questions and answers. If you finished it well, clearing exam will be easy.

### SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q80-Q85):

#### NEW QUESTION # 80

Which of the following are features of the transportation cockpit? Note: There are 3 correct answers to this question.

- A. Cost determination
- B. Multiple screens
- C. Command line
- D. Distance calculation
- E. Gantt chart

**Answer: B,C,E**

Explanation:

Transportation Management Overview and Fundamentals

#### NEW QUESTION # 81

What is the maximum number of freight settlement documents that can be created from a freight order with two deliveries during its lifecycle, given that all the charge elements in the calculation sheet have a value greater than zero?

- A. 0
- B. 1
- C. 2
- D. No limit

**Answer: D**

Explanation:

In SAP S/4HANA Transportation Management, freight settlement documents (FSDs) are created based on freight orders to settle charges with carriers. According to the SAP documentation, there is no limit to the number of FSDs that can be created from a freight order during its lifecycle, as additional FSDs can be generated for changes, such as additional charges, corrections, or disputes, provided the charge elements have non-zero values. For a freight order with two deliveries, multiple FSDs can be created to account for initial settlements, amendments, or additional charges (e.g., detention or assessorial charges) throughout the lifecycle.

The other options are incorrect:

\* A (3), B (1), and C (2) assume a fixed number of FSDs, which is not accurate since the system allows multiple FSDs based on changes or additional requirements.

SAP S/4HANA Cloud Private Edition, Transportation Management Study Guide: Unit 5 - Charge Calculation and Freight Settlement, Section on Freight Settlement Documents.

SAP Help Portal: Transportation Management - Freight Settlement ().

### NEW QUESTION # 82

What is frequently the leading master data system? (1 correct answer)

- A. application reusable
- B. environment PPF
- C. component under
- D. the ERP system

**Answer: D**

### NEW QUESTION # 83

You have defined the transportation zone hierarchy shown in the attached screenshot. Which transportation lanes can you use to transport from transportation zone 5 to transportation zone 3? Note: There are 3 correct answers to this question.

- A. 4->3
- B. 1->1
- C. 2->6
- D. 1->2
- E. 1->3

**Answer: A,B,E**

Explanation:

In SAP S/4HANA Transportation Management, transportation lanes define valid routes between transportation zones, including those within a zone hierarchy. Without the specific screenshot, we assume a standard hierarchical structure where zone 1 is a parent zone containing zones 2, 3, 4, and 5, and zone 6 is outside or unrelated. To transport from zone 5 to zone 3, the following transportation lanes are relevant:

\* 1->1 (B): This lane allows transport within the parent zone 1, which includes both zones 5 and 3, making it valid for the route.

\* 4->3 (C): If zone 4 is an intermediate zone in the hierarchy, this lane could be used as part of a multi- leg route from zone 5 to zone 3.

\* 1->3 (D): This lane allows transport from the parent zone 1 (including zone 5) to zone 3 directly.

The other options are incorrect:

\* 1->2 (A) does not include zone 5 as the destination or zone 3 as the source.

\* 2->6 (E) is irrelevant, as zone 6 is not part of the route from zone 5 to zone 3.

### NEW QUESTION # 84

Which of the following profiles is directly assigned to an organizational unit?

- A. Distribution profile
- B. Dimensional weight profile
- C. Charges profile
- D. Calculation profile

**Answer: A**

Explanation:

In SAP S/4HANA Transportation Management, the distribution profile is directly assigned to an organizational unit to define how costs are distributed across different entities, such as cost centers or internal orders, during freight settlement. According to the SAP

documentation, the distribution profile is linked to the organizational unit (e.g., a purchasing organization) to specify rules for cost allocation in materials management integration scenarios. This ensures that transportation costs are correctly assigned based on organizational structure.

The other options are incorrect:

\* Charges profile (A) defines the structure of charges but is not directly assigned to an organizational unit; it is used in freight agreements or calculation sheets.

\* Calculation profile (B) determines how charges are calculated but is assigned to documents like freight orders, not organizational units.

\* Dimensional weight profile (D) is used for calculating dimensional weight and is linked to calculation profiles, not organizational units.
