In order to pass the exam and fight for a brighter future, these people who want to change themselves need to put their ingenuity and can do spirit to work. More importantly, it is necessary for these people to choose the convenient and helpful 156-836 test questions as their study tool in the next time. Because their time is not enough to prepare for the exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the 156-836 exam and get the related certification in a short time have to pay more attention to the study materials. In addition, best practice indicates that people who have passed the 156-836 Exam would not pass the exam without the help of the 156-836 reference guide. So the study materials will be very important for all people. If you also want to pass the exam and get the related certification in a short, the good study materials are the best choice for you. Now we are going to make an introduction about the 156-836 exam prep from our company for you.

To earn the CCME certification, candidates must pass the CCME certification exam, which is a combination of multiple-choice questions and scenario-based questions. 156-836 Exam is designed to test a candidate's practical knowledge and skills in deploying and managing Maestro security architecture. Upon passing the exam, candidates will be awarded the CCME certification, which is a globally recognized certification that validates their expertise in managing complex security architectures using CheckPoint's Maestro technology.

Authentic 156-836 Learning Guide carries you pass-guaranteed Exam Questions - Exams4Collection

The clients can consult our online customer service before and after they buy our 156-836 useful test guide. We provide considerate customer service to the clients. Before the clients buy our 156-836 cram training materials they can consult our online customer service personnel about the products' version and price and then decide whether to buy them or not. After the clients buy the 156-836 Study Tool they can consult our online customer service about how to use them and the problems which occur during the process of using. We will help you pass the 156-836 exam in the shortest time.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q44-Q49):

NEW QUESTION # 44

What is the default Distribution mode?

- A. Auto-topology
- B. User

- C. Network
- D. Manual-General

Answer: A

Explanation:

Explanation

Auto-topology is the default distribution mode for Maestro Security Groups. In this mode, the Orchestrator assigns packets to a Security Group Member based on the topology of the port defined in the gateway object.

Each port is either in user mode or network mode depending on the topology. User mode means that the port is connected to the internal network and network mode means that the port is connected to the external network.

The Orchestrator uses a hash function to map each source IP or destination IP to a specific SGM, depending on the mode of the port. This mode ensures that all packets with the same source IP or destination IP are processed by the same SGM, regardless of the port or protocol.

NEW QUESTION # 45

What is the command 'asg diag' used for?

- A. Asg diag is used for system diagnostics
- B. Asg diag is used for creating traffic flow diagrams
- C. Asg diag used for system diagnostics on Chassis only. It does not exist on Maestro
- D. Asg diag is used for system backup

Answer: A

Explanation:

The asg diag command is used for system diagnostics on both Maestro and Chassis systems. The asg diag command can perform various tests and checks on the system components, such as hardware, software, network, clock, ARP, and more. The asg diag command can help identify and troubleshoot any issues or errors that may affect the system functionality or performance.

NEW QUESTION # 46

What is the Correction Layer mechanism?

- A. Ensures asymmetric traffic is handled properly, especially in the case of NAT or VPNs.
- B. The MHO's distribution algorithm which determines the handling SGM for a given connection.
- C. Enforces the access policy on the SGMs and synchronizes the enforcement verdict to other SGMs in the SG.
- D. The load-balancing mechanism used by the MHO.

Answer: A

Explanation:

Explanation

The Correction Layer mechanism is a Maestro component that ensures that packets from the same connection are handled by the same Security Group Module (SGM) in a multi-appliance system. This is especially important when NAT or VPNs are involved, as packets sent from the client to the server can be distributed to a different SGM than packets from the same session sent from the server to the client. The Correction Layer must then forward the packet to the correct SGM.

NEW QUESTION # 47

What happens when you make changes from Clish on the SMO Master?

- A. Changes are applied to all members in the SG.
- B. The changes are synchronized to the SMS/MDS as a backup.
- **C. Changes are only applied on the SMO Master.**
- D. The changes are synchronized to the MHO as a backup.

Answer: C

Explanation:

Explanation

NEW QUESTION # 48

What type of license is required for an MHO?

- A. The MHO requires a VSX license.
- **B. The MHO does not require a license.**
- C. The MHO requires a NGTP license.
- D. A license is needed for each attached SGM.

Answer: B

Explanation:

Explanation

The MHO (Maestro Hyperscale Orchestrator) does not require a license by itself, but each SGM (Security Group Module) that is attached to the MHO needs a license. The license type depends on the features and blades that are enabled on the SGM. For example, if the SGM is running VSX, it needs a VSX license.
