## New C-BCSBS-2502 Test Fee, C-BCSBS-2502 Latest Test Dumps

We try our best to provide the most efficient and intuitive C-BCSBS-2502 learning materials to the learners and help them learn efficiently. Our C-BCSBS-2502 exam reference provides the instances, simulation and diagrams to the clients so as to they can understand them intuitively. Based on the consideration that there are some hard-to-understand contents we insert the instances to our C-BCSBS-2502 Test Guide to concretely demonstrate the knowledge points and the diagrams to let the clients understand the inner relationship and structure of the C-BCSBS-2502 knowledge points.

## SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q16-Q21):

### NEW QUESTION # 16

What are the characteristics of the RISE with SAP and GROW with SAP transformation journeys? Note: There are 2 correct answers to this question.

- A. RISE with SAP is the journey for existing SAP ERP customers moving to the SAP Business Suite
- B. GROW with SAP is the mid-market solution hero journey for all net-new customers
- C. RISE with SAP is the journey for large new SAP ERP customers leveraging the SAP Business Suite
- D. GROW with SAP is a hero journey for all net-new customers

Answer: A,B

Explanation:

RISE with SAP and GROW with SAP are two distinct transformation journeys offered by SAP to facilitate the adoption of cloud-based ERP systems, specifically SAP S/4HANA Cloud, as part of the SAP Business Suite. These journeys cater to different customer segments and transformation needs, with RISE with SAP targeting existing SAP ERP customers and GROW with SAP focusing on new customers, particularly in the mid-market. The question asks for the characteristics of these transformation journeys, with two correct answers. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" narrative.

\* Option A: GROW with SAP is the mid-market solution hero journey for all net-new customers. GROW with SAP is specifically designed for net-new SAP customers, particularly mid-sized businesses, and is often referred to as a "hero journey" for its streamlined, standardized approach to cloud ERP adoption.

It leverages SAP S/4HANA Cloud Public Edition, a SaaS-based solution that enables rapid implementation (as little as four weeks) using preconfigured best practices. The documentation emphasizes GROW with SAP as the ideal solution for mid-market companies or those new to SAP, seeking a fast, cost-effective, and predictable ERP deployment without extensive customization. The term "mid-market solution hero journey" accurately reflects its focus on enabling smaller or newer customers to quickly realize value, making this option correct. Extract: "GROW with SAP is a SAP software solution initiative designed exclusively for mid-size companies and initial SAP customers. ...

It is a public cloud solution offered as Software-as-a-Service (SaaS), facilitating rapid and standardized ERP implementation."

Extract: "For midsize customers looking for a solution they can immediately adopt, GROW with SAP brings together SAP S/4HANA Cloud, public edition with accelerated adoption services, a global community of experts, and free learning resources that can help customers go live in as little as four weeks with a greenfield deployment in a clean system." Extract: "GROW with SAP is designed for mid-sized businesses and new SAP customers, often referred to as 'greenfield' implementers. ... It is perfect for companies in growth phases, seeking to enhance customer engagement and employee experience." This option is correct.

\* Option B: RISE with SAP is the journey for existing SAP ERP customers moving to the SAP Business Suite. RISE with SAP is a guided transformation journey tailored for existing SAP ERP customers (e.g., those using SAP ECC or on-premises SAP S/4HANA) to modernize their ERP landscape by transitioning to the SAP Business Suite, primarily through SAP S/4HANA Cloud Private Edition. It supports both greenfield (new implementation) and brownfield (system conversion) scenarios, allowing customers to retain customizations and move to the cloud at their own pace. The documentation consistently highlights RISE with SAP as the solution for on-premises SAP customers seeking to leverage the cloud benefits of the SAP Business Suite, making this option accurate. Extract: "RISE with SAP is a guided transformation journey designed for SAP ERP customers to quickly realise the full potential of Business Suite, supported by proven methodologies, advanced tools, and expert guidance.

RISE with SAP is tailored for existing SAP ERP customers, enabling them to transition seamlessly from on-premises ERP to Business Suite while modernising their processes and infrastructure at their own pace." Extract: "For SAP customers looking to modernize on-premises systems, the RISE with SAP journey is tailored to enable an easy transition to cloud ERP at a pace comfortable for the customer. ... These characteristics align with SAP S/4HANA Cloud Private Edition as the tailored-to-fit cloud ERP that adapts to an organization's unique transformation." Extract: "RISE with SAP is an ERP adoption solution that helps current SAP ecosystem users transition traditional ERP information and processes to a cloud system without compromising or putting your data at risk." This option is correct.

\* Option C: GROW with SAP is a hero journey for all net-new customers. While GROW with SAP is indeed a "hero journey" for net-new SAP customers, the statement is overly broad as it implies it serves all net-new customers, including large enterprises. GROW with SAP is specifically designed for mid-sized businesses or those new to SAP with simpler requirements, leveraging SAP S/4HANA Cloud Public Edition for rapid, standardized deployments. Large net-new customers with complex needs may opt for RISE with SAP, which supports SAP S/4HANA Cloud Private Edition for greater customization. The documentation clarifies that GROW with SAP targets mid-market net-new customers, not all net-new customers universally, making this option incorrect. Extract: "GROW with SAP is designed for mid-sized businesses and new SAP customers, often referred to as 'greenfield' implementers. ... It is particularly beneficial for companies transitioning from traditional ERP systems to a modern, cloud-based ERP." Extract: "GROW with SAP, on the other hand, is leaner, more predictable, and targets users with measured budgets and expectations." This option is incorrect.

\* Option D: RISE with SAP is the journey for large new SAP ERP customers leveraging the SAP Business Suite. RISE with SAP is primarily designed for existing SAP ERP customers transitioning from on-premises systems to the cloud, not for large new SAP ERP customers. While RISE with SAP can support net-new customers with complex needs (e.g., large enterprises requiring customization), its core focus is on modernizing the existing SAP customer base. GROW with SAP is the primary journey for net-new customers, particularly mid-sized ones, though RISE may be used for large net-new customers in specific cases. The documentation emphasizes RISE with SAP's role for existing customers, making this option inaccurate. Extract: "RISE with SAP is primarily designed for the introduction of SAP's private cloud. The offer is therefore primarily aimed at existing customers." Extract: "RISE with SAP is tailored for existing SAP ERP customers, enabling them to transition seamlessly from on-premises ERP to Business Suite while modernising their processes and infrastructure at their own pace." This option is incorrect.

Summary of Correct Answers:

\* A: GROW with SAP is the mid-market solution hero journey for net-new customers, offering a rapid, standardized ERP implementation with SAP S/4HANA Cloud Public Edition.

\* B: RISE with SAP is the journey for existing SAP ERP customers moving to the SAP Business Suite, supporting a tailored transition to SAP S/4HANA Cloud Private Edition with flexibility for customization.

#### NEW QUESTION # 17

What are some essential value propositions of SAP Business AI? Note: There are 3 correct answers to this question.

- A. Replacement of human workers with AI agents to reduce cost and human error
- B. Training of large multi-modal foundation models based on customer-specific business data
- C. Use of extensive business data extracted from areas including Finance, Supply Chain, Procurement, and Human Resources
- D. Deployment of Joule, an advanced AI copilot, to help interpret business data and provide intelligent responses to business inquiries
- E. Use of the best technology on the market and strategic partnerships with industry leaders

**Answer: C,D,E**

#### Explanation:

SAP Business AI is a suite of AI capabilities embedded across SAP's enterprise applications, such as SAP S/4HANA, SAP SuccessFactors, and SAP Business Data Cloud, designed to enhance business processes, drive innovation, and deliver intelligent insights. The question asks for the essential value propositions of SAP Business AI, with three correct answers. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" and "SAP Business AI" narratives.

\* Option A: Training of large multi-modal foundation models based on customer-specific business data SAP Business AI focuses on embedding pre-trained AI models and generative AI capabilities into business applications, leveraging SAP's extensive business data and integrations like SAP Databricks.

However, the documentation does not emphasize training large multi-modal foundation models based on customer-specific data as a core value proposition. Instead, SAP prioritizes using existing models, fine-tuned with business context, to deliver out-of-the-box value. Training custom foundation models is more resource-intensive and not a primary focus of SAP's AI strategy, which aims for rapid deployment and scalability. Extract: "SAP Business AI embeds intelligent capabilities directly into your business processes, so you can work faster, smarter, and more efficiently. From automating routine tasks to providing predictive insights, AI is seamlessly integrated into SAP applications to drive better outcomes." This option is incorrect.

\* Option B: Use of the best technology on the market and strategic partnerships with industry leaders A key value proposition of SAP Business AI is its use of cutting-edge technology and strategic partnerships with industry leaders like Microsoft, Google Cloud, and Databricks. These partnerships enhance SAP's AI capabilities, enabling advanced analytics, generative AI, and seamless integration with leading AI platforms. SAP's collaboration with these partners ensures that customers benefit from state-of-the-art technology, making this a prominent value proposition in the documentation and marketing materials. Extract: "SAP Business AI leverages the best AI technology on the market, powered by strategic partnerships with industry leaders like Microsoft, Google Cloud, and Databricks.

These collaborations ensure that our customers have access to cutting-edge AI capabilities, seamlessly integrated into their SAP applications." Extract: "The partnership between SAP and Databricks enables customers to combine the benefits of SAP Business Data Cloud with Databricks' powerful AI and ML capabilities, delivering unparalleled value through advanced analytics and AI." This option is correct.

\* Option C: Deployment of Joule, an advanced AI copilot, to help interpret business data and provide intelligent responses to business inquiries The deployment of Joule, SAP's advanced AI copilot, is a central value proposition of SAP Business AI. Joule is embedded across SAP applications to provide conversational AI, interpret business data, and deliver intelligent, context-aware responses to user inquiries. It enhances productivity by automating tasks and providing insights in natural language, making it a key feature highlighted in SAP's AI strategy. Extract: "Joule, SAP's advanced AI copilot, is embedded across our portfolio to help users interpret complex business data, automate tasks, and respond to inquiries with intelligent, context-aware answers. Joule transforms how businesses operate by delivering AI-driven productivity." Extract: "With SAP Business AI and Joule, customers can ensure accurate results from generative AI, augmenting decision-making with conversational AI and improving productivity through automated workflows." This option is correct.

\* Option D: Use of extensive business data extracted from areas including Finance, Supply Chain, Procurement, and Human Resources SAP Business AI leverages extensive business data from core areas like Finance, Supply Chain, Procurement, and Human Resources, extracted from SAP applications such as SAP S/4HANA and SAP SuccessFactors. This rich, semantically contextual data is a critical value proposition, enabling AI to deliver relevant, business-specific insights and drive intelligent automation.

The documentation emphasizes the power of SAP's data foundation as a differentiator for its AI offerings. Extract: "SAP Business AI is powered by extensive business data from SAP applications, including Finance, Supply Chain, Procurement, and Human Resources. This semantically rich data provides the context needed for AI to deliver precise, actionable insights tailored to your business." Extract: "Built-In Business Semantics: Because SAP data already carries deep business context and semantics, Databricks can provide powerful analytics and machine learning without forcing customers to re-invent data pipelines or guess at the meaning of fields." This option is correct.

\* Option E: Replacement of human workers with AI agents to reduce cost and human error SAP Business AI focuses on augmenting human capabilities, not replacing human workers. The goal is to enhance productivity, automate repetitive tasks, and provide intelligent insights to support decision-making, while keeping humans in the loop. Replacing workers is not a value proposition of SAP Business AI, as it emphasizes collaboration between AI and human expertise. The documentation explicitly highlights augmentation over replacement. Extract: "SAP Business AI enhances human capabilities by automating routine tasks and providing predictive insights, allowing employees to focus on higher-value work. Our AI is designed to augment, not replace, human expertise." This option is incorrect.

Summary of Correct Answers:

\* B: SAP Business AI leverages the best technology and strategic partnerships with industry leaders to deliver cutting-edge AI capabilities.

\* C: Deployment of Joule, an advanced AI copilot, enhances productivity by interpreting business data and providing intelligent responses.

\* D: Using extensive business data from Finance, Supply Chain, Procurement, and Human Resources enables context-rich, actionable AI insights.

### NEW QUESTION # 18

Which SAP module is specifically designed for supplier management and procurement processes? Please choose the correct answer.

- A. SAP SuccessFactors
- B. SAP Transportation Management
- **C. SAP Ariba**
- D. SAP Business Network

**Answer: C**

### NEW QUESTION # 19

What does SAP do to help installed-base customers with their transformation journey to the SAP Business Suite?

- A. Move capabilities into the public cloud wherever possible
- B. Support and accelerate their lift and shift efforts to cloud ERP only
- **C. Position and leverage the GROW with SAP transformation journey**

**Answer: C**

Explanation:

GROW with SAP is SAP's official program designed to help customers (including existing or installed-base customers) transform and accelerate their move to SAP Business Suite (especially S/4HANA Cloud and cloud-based ERP) using best practices, ready-to-run cloud solutions, and guided transformation journeys.

It provides tools, services, and support to simplify and speed up the transition-not just "lift and shift" but true business transformation.

### NEW QUESTION # 20

Which SAP Business Suite components are critical for enterprise-wide integration? There are 3 correct answers to this question.

- A. SAP Predictive Maintenance
- **B. SAP Business Network**
- **C. SAP S/4HANA**
- **D. SAP ERP**
- E. SAP Ariba

**Answer: B,C,D**

## NEW QUESTION # 21

.....

Up to now we classify our C-BCSBS-2502 exam questions as three different versions. They are pdf, software and the most convenient one APP online. Though the content of these three versions is the same, but their displays are different. Each of them has their respective feature and advantage including new information that you need to know to pass the C-BCSBS-2502 test. So you can choose the version of C-BCSBS-2502 training quiz according to your personal preference.

**New C-BCSBS-2502 Test Fee:** <https://www.latestcram.com/C-BCSBS-2502-exam-cram-questions.html>
